7.1. Upgrading from All In One	7

Preface

eXo Platform 3 Administrators Guide

Important

This document is a work in progress and will get richer over time.

Chapter 1. Introduction

1.1. Welcome to eXo Platform

1.2. Who should read this guide ?

1.3. Conventions used in this document

Table 1.1.

Text / Icon type	Meaning
xxx	Txxx

Chapter 2. Installation

2.1. Runtime Considerations

2.2. Installing the Tomcat Bundle

2.3. Installing the EAR distribution

2.4. How to remove the sample demos ?

2.5. Configuring an Apache Frontend

2.6. Startup / Shutdown

Chapter 3. Configuration

3.1. Setup Wizzard

As a convenience we provide a setup wizzard UI that will generate all system configuration. But you can still make them by your own. The following paragraphs will detail manual configuration

3.2. Configuration of eXo platform

3.2.1. Database Configuration

3.2.2. FileSystem Configuration

3.2.3. Connecting to an LDAP Directory

3.3. Configuration of the Application Server

3.3.1. JVM Settings Recommendations

3.3.2. Connection Pools

Chapter 4. Management

4.1. Management of eXo Platform

4.2. JMX Interface

4.3. REST Interface

4.4. Resource Monitoring

4.4.1. Caches

4.4.2. Portlet Container

4.4.3. Portal

Chapter 5. Clustering

5.1. When should you consider clustering ?

5.2. Preparing the cluster infrastructure

5.3. Configuring cluster mode

5.4. Managing a cluster

5.4.1. Using JBoss Farm deployment

Chapter 6. Project Deployment

6.1. How to deploy a customization project

Chapter 7. Upgrade

7.1. Upgrading from All In One
