Overview Of eXo Knowledge

About eXo Knowledge

What is eXo Knowledge?

eXo Knowledge is one of eXo Platform applications. This is a suite of applications, which contains everything you need for the knowledge management. eXo Knowledge is made up of three main portlets: Forum, Answers and Wiki where you can share information, seek supports through helpful answers and post your ideas.

Answers and FAQ

Answers is a collaborative Question & Answer system similar to Yahoo! Answers or StackOverflow.com but for your own enterprise, where the collaboration is encouraged. With this application, you and your collaborators can post a series of common questions and find answers on a specific topic. Here, you can edit questions, provide answers and edit them. FAQ takes this content as input and publish it in a clean and quickly browsable manner. You can point a FAQ portlet to one or several Answers categories. As a publishing portlet, it is impossible to edit questions and answers in FAQ.

Forum

Forum is designed for the group discussion and user-generated content in which participants with common interests can exchange their opinions on a subject. While Answers is an ideal site for you to find answers quickly, Forum gives deep discussion through your posted topics.

Wiki

Wiki is an enterprise wiki application focused on content productivity for portal users as a tool to forge the unstructured knowledge. Wiki allows you to create and edit pages by using a simplified markup language or a WYSIWYG editor. With this application, your company can use Wiki as an internal reference, such as work policy, or a public wiki for a comprehensive product information. Wiki along with other eXo Knowledge applications, such as Answers and Forum will complete the ideal combination that helps users enhance their experiences on collaboration activities and build valuable knowledge center for clients.

About this document

This guide aims at instructing users to use eXo Knowledge features through in-depth examples and explanations. This guide is for all regular users and advanced users who have the administration and moderation privileges.

This user guide is divided into four main parts:

Chapters	Main content
Overview Of eXo Knowledge	

Chapters	Main content
	Introduction to eXo Knowledge, and user roles in different groups, and then ways to access various applications of eXo Knowledge.
How To Use Answers?	Actions in the Answers application, such as submitting, commenting or answering a question, and more.
How To Use Forum?	Actions in the Forum application, related to topics, posts, bookmarks, and more.
How To Use Wiki?	Introduction to Wiki, such as page hierarchy, syntaxes; and how to work with pages, attachments, and more.

For each section describing specific functions of an application, instructions are arranged to the user groups: actions performed by regular users, those by moderators and administrators and the administration actions for the administrators only.

Get started with eXo Knowledge

User roles

In eXo Knowledge, user groups may have different privileges to perform actions. Some actions can be limited to some specific user groups. eXo Knowledge uses a concept of User group, which is designed to give the advanced users the ability to control and assign what functions or features that other users can and cannot do within the application. There are four user groups: administrator, moderator, regular user and guest.

Administrator is an advanced user, who typically has the highest right when using eXo Knowledge. The Administrator can manage user privileges and he has rights to perform all possible capabilities. For example, in Forum, an administrator can create categories, close/delete, lock/unlock forums; promote a regular user to moderator or create a category that is restricted to a specific user group.

Moderator obtains a subset of administrator's rights that means he has certain allowed capabilities and may perform these advanced actions in a specific area only. For example, a moderator in of a category in Forum can only perform advanced actions in the category that he is assigned as the moderator. The moderator role is assigned by the administrator.

Regular user is defined as a logged-in user who can only use the basic features of eXo Knowledge. The regular user can be promoted to the advanced user by the administrator.

Guest (anonymous user) is an unregistered/unlogged-in user who is often limited to a very few features only of eXo Knowledge. For instance, a guest can view topics in Forum but he cannot reply or create new topics.

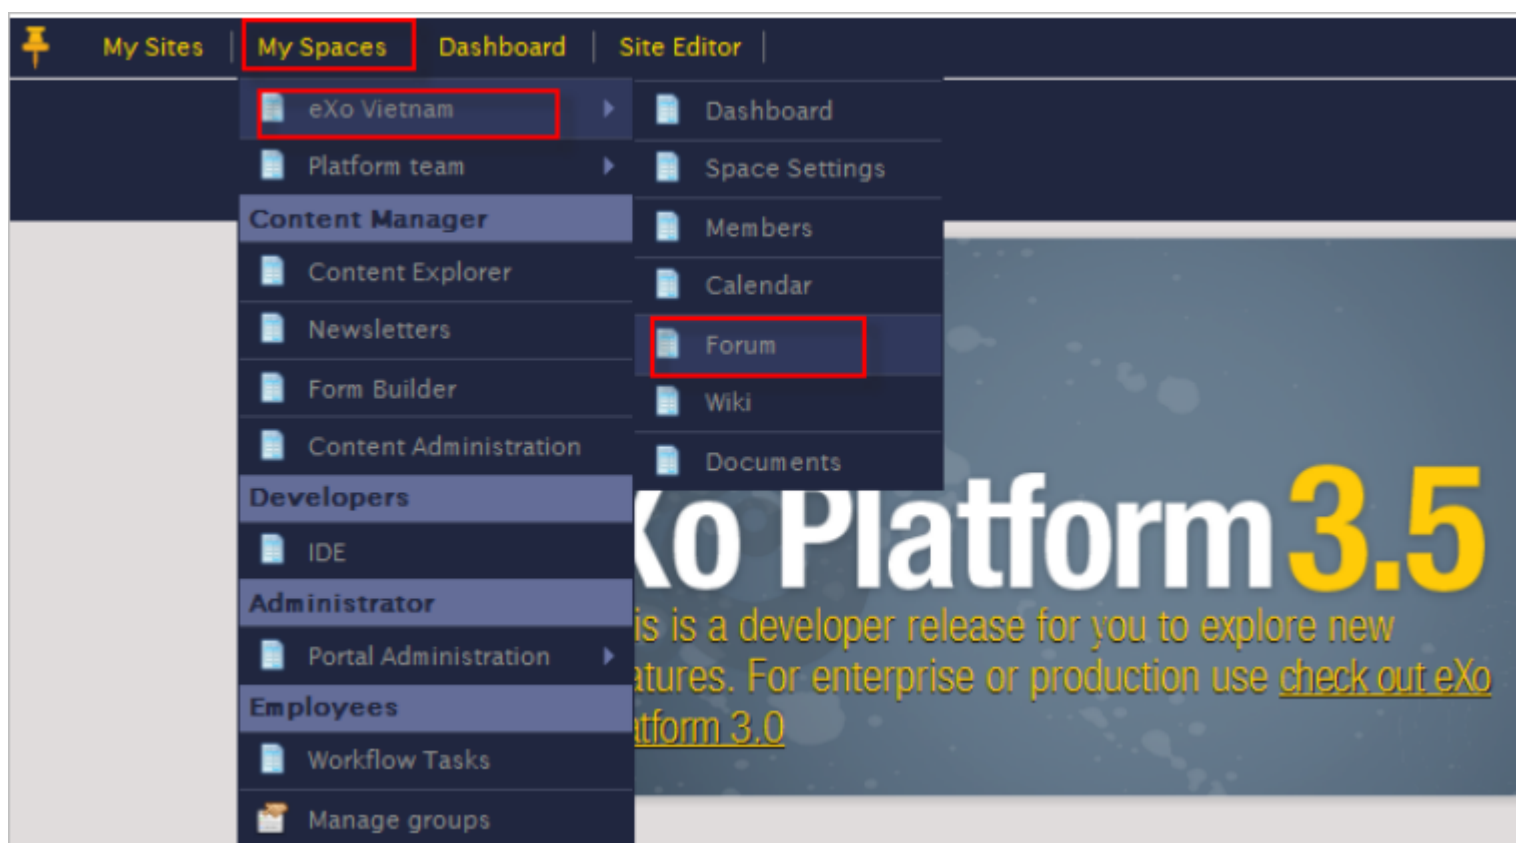

Notice that there will be no section dedicated to this user role. For the actions that an anonymous user can perform, you can refer to the table that summarizes all the actions in each applications.

Access applications of eXo Knowledge

When eXo Knowledge is deployed as standalone, applications are often displayed right on the administration bar. To access it, simply click one specific application name shown as below:

When being integrated into eXo Platform, you should access eXo Knowledge applications, such as Forum, Wiki, through a space by hovering your cursor over **My Spaces** and then clicking the relevant application from the drop-down menu.

The application page appears, allowing you to do many actions when you directly access the application. Also, when you have any activities in the application, these activities will be added to the Activity Stream of the Space and other members in the space can see them when they access the space as below:

How To Use Answers?

Before using the features in **Answers**, you should get familiar with the **Answers** interface. Once you have logged in and accessed **Answers**, the interface looks like this:

1	The Status pane displays information of the currently viewed category, including the total number of open questions, pending questions and the total questions.
2	The Categories pane lists all categories in the hierarchical system. With one click on your desired category, you will be directed to the Answers viewing pane.
3	The Breadcrumb bar is to navigate between categories and sub-categories easily. This bar also includes the search box with simple and advanced options.
4	The Action bar is to add categories, questions, and to manage questions, import, export, print, and do settings.
5	The Answers Viewing pane displays all questions and information about score and the number of answers of each question in the selected category.

Remember that this interface may look different for each user group. Some actions for advanced users will not be shown in the interface when you log in as a regular user.

The following table summarizes actions which each user group can execute in Answers.

Chapter 2. How To Use Answers?

Features	Description	Administrator	Moderator	Owner	User	Guest
View details of the Answers application	See all categories in Answer and their activated questions, details of a question (its content, its answers, uploaded files, image preview).					
Download attachments	Download attachments included in questions or answers.					
Submit a question	Submit a question with an attachment in multiple languages.					
Send a question	Send a question via email.					
Print	Print all questions with their answers of a category and of its sub-categories, or print details of a question.					
Search	Simple and advanced searches					

Features	Description	Administrator	Moderator	Owner	User	Guest
	for a specific category or question.					
Watch/Unwatch a category	Watch a category to receive email notifications on new questions or any changes. If you do not want to receive email notifications any longer, unwatch the category.					
RSS	Subscribe by RSS.					
View user profile	View the profile of a specific user: questions, answers or comments.					
User settings	Preferences: Sort type, Sort by.					
Comment on a question	Give opinions on a specific question in multiple languages.					

Chapter 2. How To Use Answers?

Features	Description	Administrator	Moderator	Owner	User	Guest
Vote	Vote for questions and answers by rating stars.					
Discuss in forum	Discuss a question in the forum. When a question is discussed, it becomes a topic in Forum.					
Manage a category	Add, edit, delete and move categories.					
Export	Export answers in the format of a .xml or .zip file to back up data.					
Import	Import data into Answers from a .xml or .zip file.					
Moderate a question	Add or edit a question in multiple languages, delete and move questions.					
Answer a question	Give an answer for a question					

Features	Description	Administrator	Moderator	Owner	User	Guest
	in the rich text format.					
Edit an answer	A question could have multiple answers in multiple languages that can be edited separately.					
Activate/Deactivate a question	Activate/inactivate a specific question. Inactivated questions are hidden and regular users cannot view.					
Approve/Disapprove a question	Set the approved/disapproved status to a specific question. The disapproved question is hidden in the Approve mode and normal users cannot view the unapproved question.					

Features	Description	Administrator	Moderator	Owner	User	Guest
Activate/Deactivate an answer	Set the activated/inactivated status to a specific answer. The inactivated answer is hidden and normal users cannot view the inactivated answer.					
Approve/Disapprove an answer	Approve/disapprove a specific answer. The disapproved answer is also hidden and regular users cannot view.					
Promote a comment to answer	Promote a comment to be an answer of a question.					
Initialize Answers	Create a category and assign the moderator role.					
Set properties of Answers	Define basic properties					

Features	Description	Administrator	Moderator	Owner	User	Guest
	(for example, Order Type, Order by, Notify content, theme, icon) and advanced properties (for example, enabling RSS, vote, comment) and more.					
Set up the FAQ portlet	Add and configure the FAQ portlet on the page.					

Note

Owners are those posting questions or answers. Actually, they are regular users but can perform some extra actions on their questions or answers.

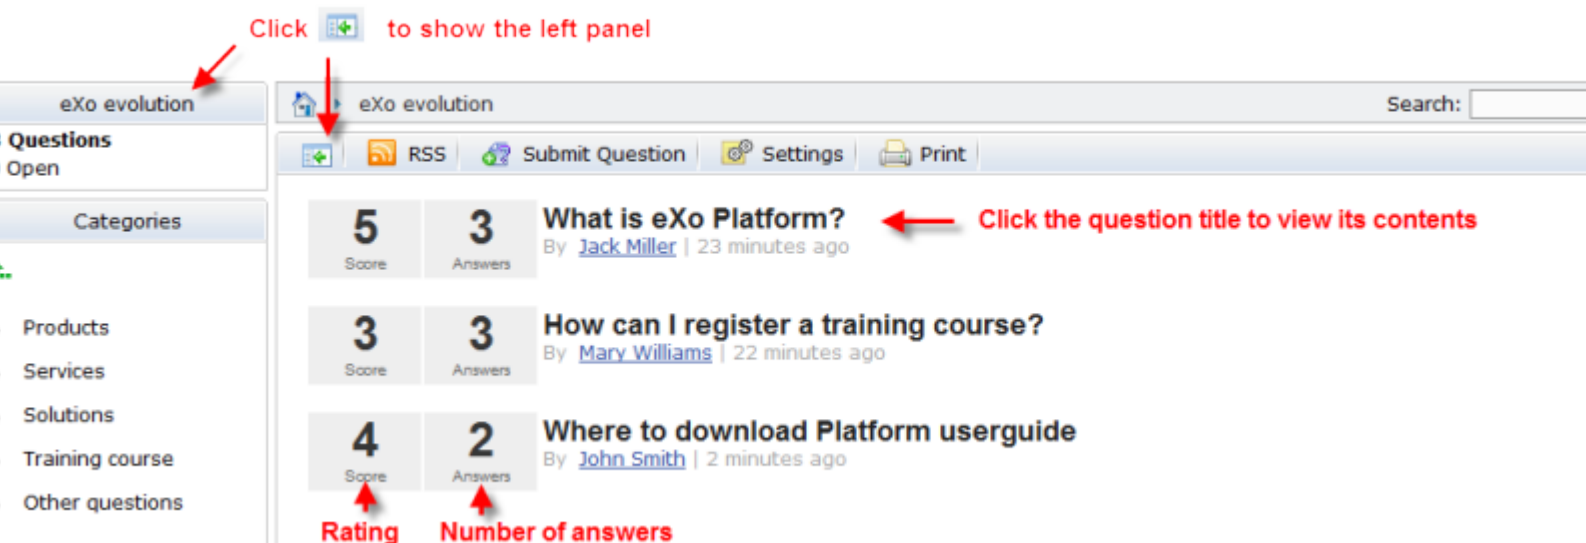

Regular user

View details of Answers

After accessing **Answers**, the left pane is hidden by default. To toggle the left panel, click

on the **Action** bar. To view details of a category, simply left-click it to open its details in the right pane.

Here, you can view all activated questions of this category, some basic information of questions, such as authors, scores, number of answers.

To view details of a question, simply click it to open its details, including its content, answers and comments, uploaded files, preview the attached image, or download the attached files.

Submit a question

The **Answers** application allows you to raise your questions on any issues and helps you find the best answer.

1. Right-click the category/sub-category where you want to submit your question and then select

from the drop-down menu;

Or go into the category that you want to submit questions, then click

on the **Action** bar.

The **Submit Question** form appears as below.

Submit Question

Question : *

Details :

Language : Author : *Email : *Attach Files : [Attach a file](#)

Save

Cancel

2. Type your question into the **Question** field.

In this form, you can also:

- i. Give details to your question into the **Details** field.
- ii. Select your desired language in the **Language** drop-down list.
- iii. Enter your email in the valid format, such as: username@abc.com, into the **Email** form.
- iv. Attach different-typed files to your question by clicking the **Attach a file** link. The max size for the attachment is 20Mb. To remove the attached files, click the corresponding **Remove** link next to the file attachments.

3. Click **Save** to complete submitting your question.

A message will appear informing that your question has been added successfully. If the moderation option was ticked when your selected category was created by the owner, there will be a message informing that your question needs to be approved before being displayed in that category.

Edit a question

Regular users can only edit their own questions.

1. Open the **Edit Question** form by following one of these ways:

The first way

- Right-click the question that you want to edit and then select **Edit** from drop-down menu.

The second way

- Click a question, then select

as below.

How can I register a training course?

How can I register a training course for Platform 3.5? Which course is right for me?

Thu, Nov 24, 2011

Answer

Comment

2. Make changes to your question. You can add more or remove the language options, attach files, approve or disapprove the question and its answers.

3. Click **Save** to save all the changes.

Answer a question

A question may have multiple answers and each can be moderated separately.

1. Open the **Answer** form by following one of these approaches:

The first way

- Right-click the question you want to answer and select **Answer Question**.

The second way

- Open a question, then click **Answer**.
2. Enter your answer into the **Answer** field.
3. Select/Deselect the **Approved** and **Activated** checkboxes if you want to approve this answer (optional). If this answer is in the category that requires moderation, the **Approved** checkbox will be selected by default.

The **Activated** option enables your answer to be shown or hidden. By default, an answer is always shown.

4.

Click

to link the question to reference entries (optional).

5. Click **Save** to submit your answer.

- [Vote for an answer](#)

Edit an answer

Regular users can only edit their answers.

1.

Click

on the top right of the answer that you want to edit.

2. Make changes to your selected answer.

3. Click **Save** to save all the changes.

See also

- [View details of Answers](#)

Comment on a question

You can leave comments on a question when you are not sure about the answer, or want to give your ideas. Then, the moderator can promote your comment to answer if necessary.

1. Follow one of these following ways:

The first way

- Click the question you want to leave comments, then select the **Comment** button.

The second way

- Right-click a specific question and select **Comment** from the drop-down menu.
2. Type your answer in the text-input field.
 3. Click **Save** to finish.

Note

Comments can be written in different languages. If a question is posted in multiple languages, it can also have comments in multiple languages.

Send a question to others

When you find a question interesting, you can share it with others easily. Regular users cannot send pending questions.

1. Follow one of these following ways:

The first way

- Right-click the question that you want to send and select **Send** from the drop-down menu.

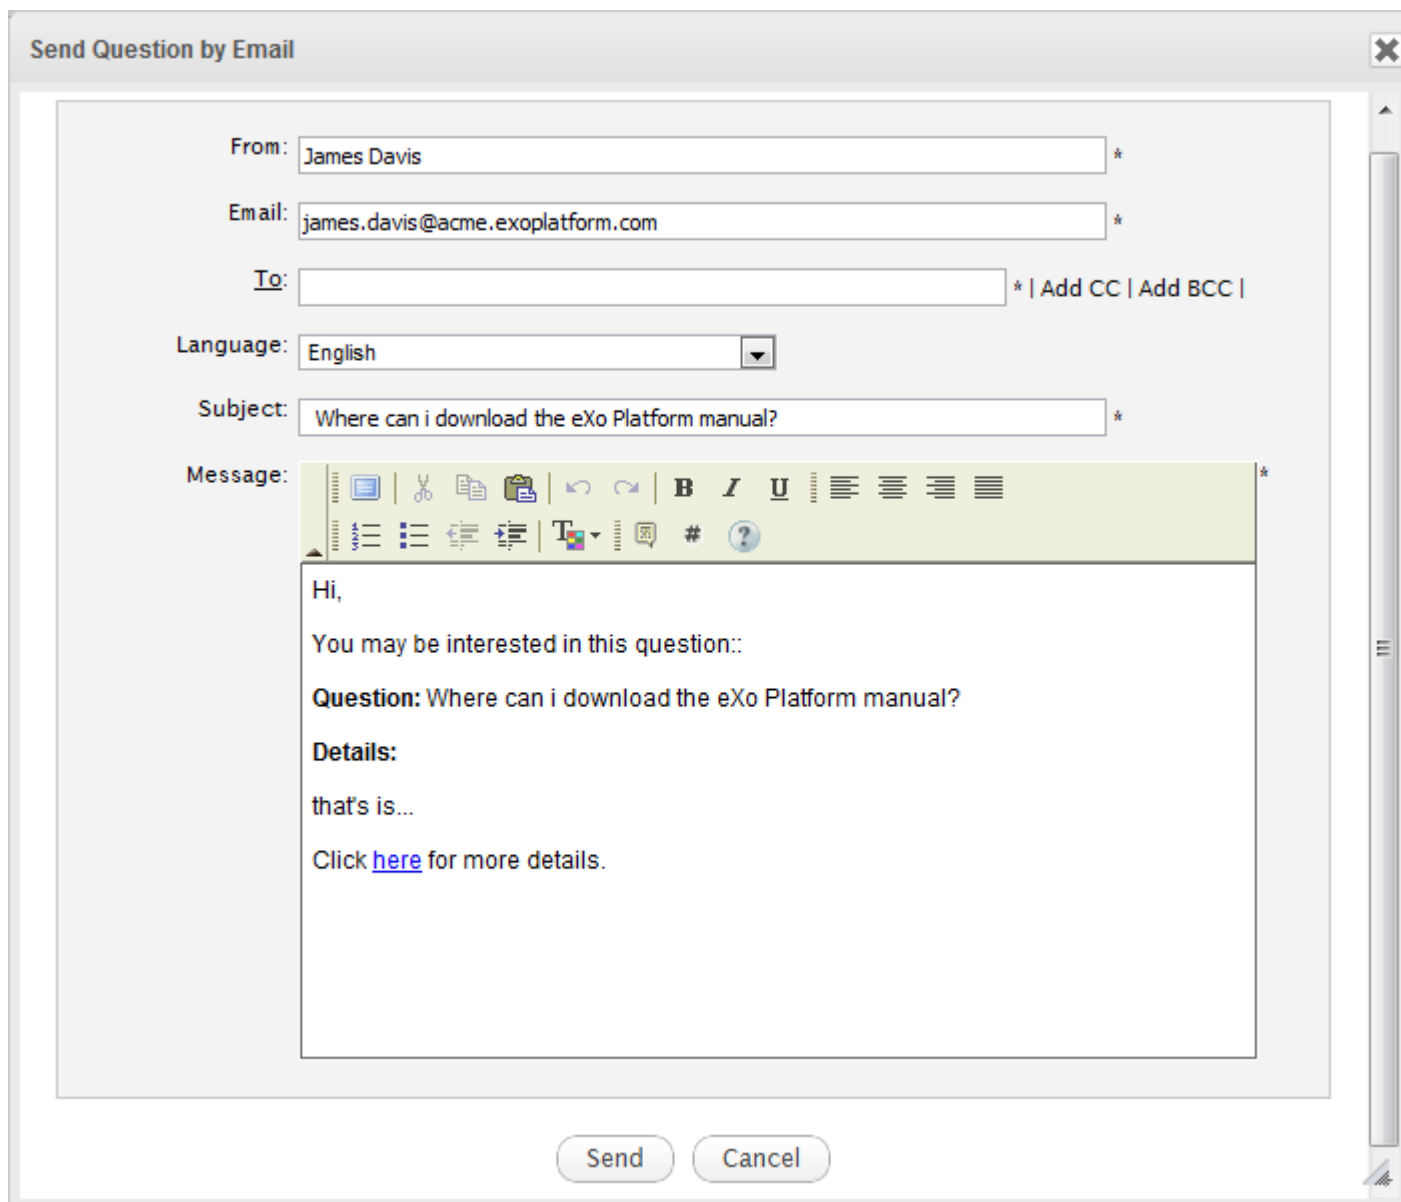

The second way

- Click your desired question and select

.

2. Enter the receiver's email address into the **To** field.

The screenshot shows a 'Send Question by Email' dialog box. It contains the following fields and controls:

- From:** James Davis *
- Email:** james.davis@acme.exoplatform.com *
- To:** * | Add CC | Add BCC |
- Language:** English (dropdown menu)
- Subject:** Where can i download the eXo Platform manual? *
- Message:** A text area with a rich text editor toolbar. The message content is:
Hi,
You may be interested in this question::
Question: Where can i download the eXo Platform manual?
Details:
that's is...
Click [here](#) for more details.

At the bottom of the dialog are 'Send' and 'Cancel' buttons.

3. Select the display language for the question content. English is set by default.
4. Click **Send**.

Note

Add CC/Add BCC allows you to send this message to multiple receivers. Use **Add CC** if you want all receivers to refer to this message. Use **Add BCC** if you want all receivers to get this message but cannot see email addresses of other receivers.

If the submitted question has been existing in another language, you can select your desired language from the **Language** drop-down list. If you change the language, the question's subject and the message content will be changed accordingly.

The users with email addresses in the **To**, **CC** and **BBC** fields will receive this message. The receivers can click the **here** link in the content of the message to view the question in details in the **Answers** application.

Discuss a question in forum

This feature is not enabled by default. Only **Administrators** can activate this feature.

When you want further discussion on a question rather than getting quick replies from **Answers**, you can make that question posted in **Forum** as a new topic. The topic created in **Forum** will have the same title and content as your question in **Answers**. All the comments will become posts in that topic. Once there is a new reply in that **Forum** topic, your question in **Answers** will be updated correspondingly.

Discuss or view the question discussion

The first way

- Open the question and click

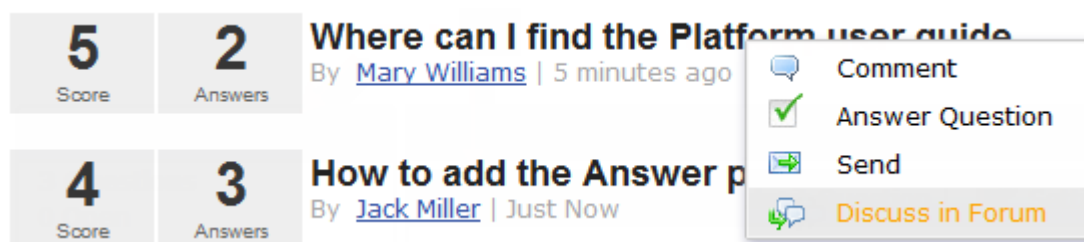

on the top right of the question pane.

The second way

- Right-click a specific question and select **Discuss in Forum**.

The topic posted in **Forum** needs to be approved by the administrators or moderators before you can view it. To go to that topic, right-click the question title and select **Discuss in Forum** from the drop-down menu again.

Rate a question

If you want to evaluate the quality of the question, you can use the intuitive rating feature provided by **Answers** to the five-star scale with the ascending level from the left to the right.

1. Open the question which you want to rate.
2. Click the star on the top left of the question content.

After being rated, the vote statistics will be updated.

3. Click **OK** on the confirmation message.

Note

Each user can only rate a question once. Rating is not available to anonymous users.

- [Advanced search](#)

Advanced search

The **Advanced search** allows you to do a search with multiple criteria corresponding to the object that is expected to be found. Using the advanced search, you can find questions/categories more exactly.

1.

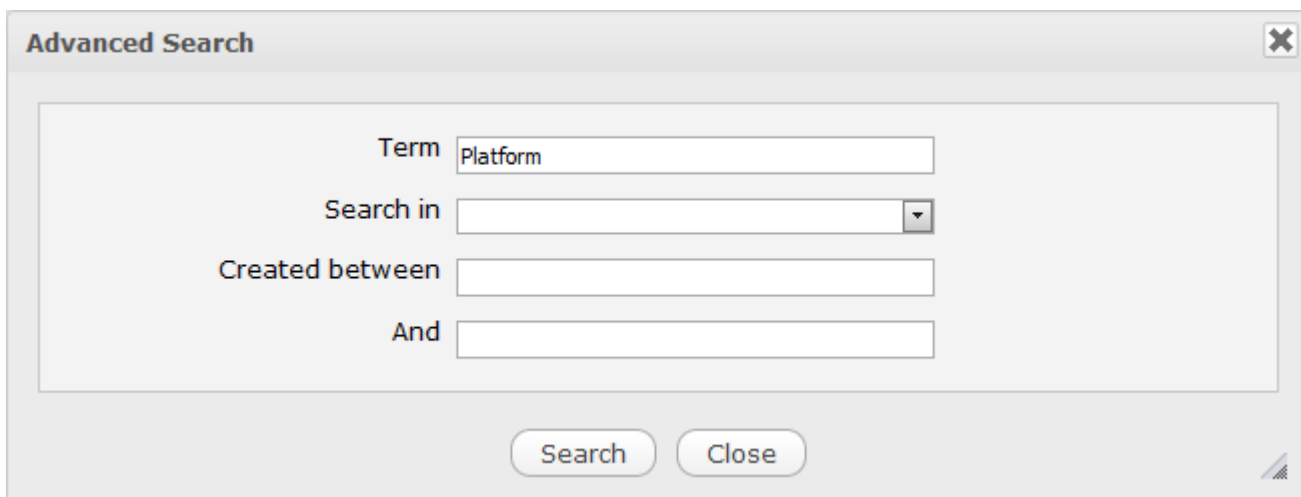

Click

on the **Search** area.

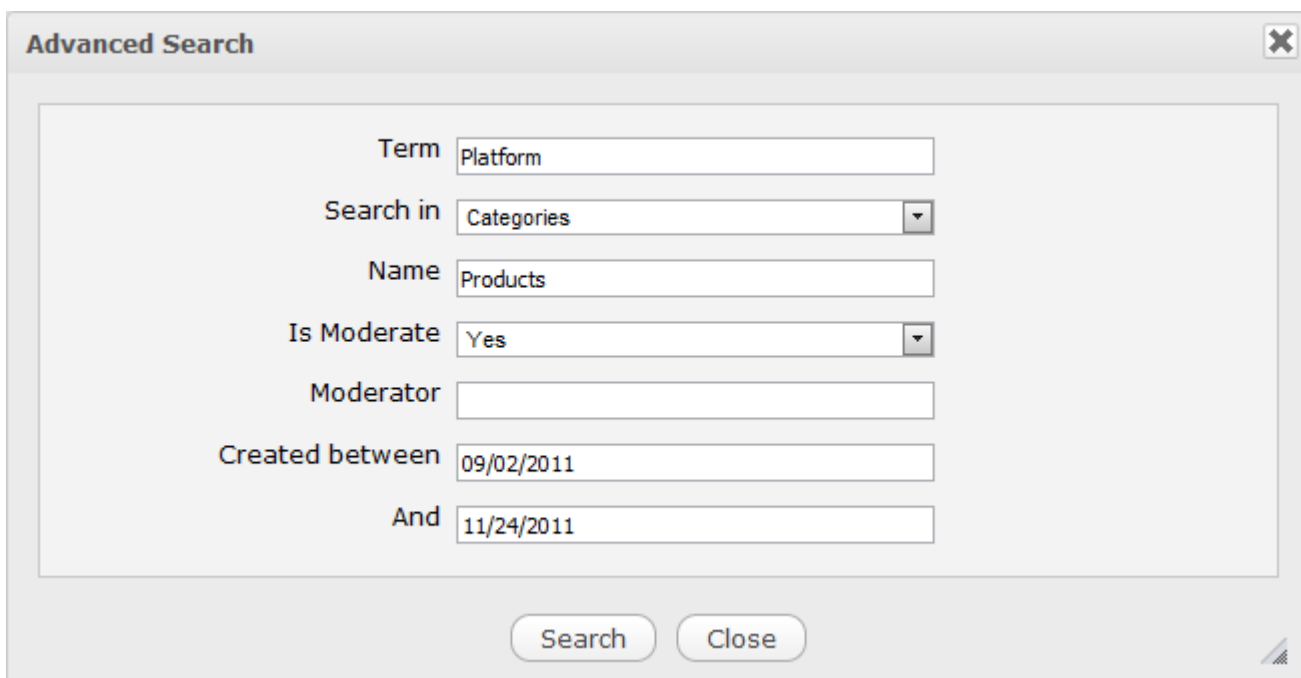

2. Define some search criteria in the **Advanced Search** form. The criteria may vary, depending on where you want to search.

- Search in both categories and entries/questions by unselecting the categories or entries from the "**Search in**" drop-down menu. This form is set by default.

The screenshot shows the 'Advanced Search' dialog box. It has a title bar with a close button. Inside, there are four input fields: 'Term' with the value 'Platform', 'Search in' with a dropdown arrow, 'Created between' with an empty text box, and 'And' with an empty text box. At the bottom, there are 'Search' and 'Close' buttons.

- Search in categories by selecting **Category** from the drop-down menu. You will do a search with some specific criteria to find expected categories. Search results will only include categories.

The screenshot shows the 'Advanced Search' dialog box with specific criteria entered. The 'Term' field contains 'Platform'. The 'Search in' dropdown menu is set to 'Categories'. The 'Name' field contains 'Products'. The 'Is Moderate' dropdown menu is set to 'Yes'. The 'Moderator' field is empty. The 'Created between' field contains '09/02/2011' and the 'And' field contains '11/24/2011'. At the bottom, there are 'Search' and 'Close' buttons.

- Search in entries/questions to find your expected questions, answers or comments by selecting **Entries** from the drop-down menu.

Print

Print all questions with their answers of a category and its sub-categories

1. Select one parent category from the **Categories** list on the left pane.
2. Click the **Print** button on the action bar under the selected category.

3. Click the **Print** button to accept printing or **Close** to quit the **Print Preview** form without printing.

Print details of a question

1. Click your desired question.

2.

Click

on the top right of the question pane. You will see the question and its details as below:

Where can i download the eXo Platform manual?

that's is...

Fri, September 30, 2011

The eXo Platform manual is included with the Platform package so you don't have to download it.

Mon, October 03, 2011

Moderator

Moderators in **Answers** manage the content of questions and answers before and after they are posted to a moderated category. The Moderator can read new contents (editing or removing if necessary), approve or activate answers, and more. The moderator has the category-specific role.

Manage categories

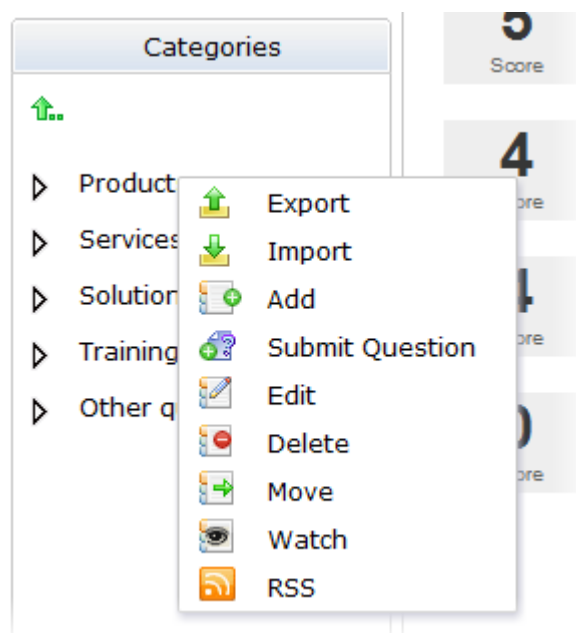

Moderators can only manage categories that he moderates.

In this section, you will learn how to manage categories. With a category, you can group all questions of a specific subject into one place.

To perform an action on a category, you can select one of these approaches:

The first way

1. Right-click a category from the categories list.
2. Select an appropriate action from the drop-down menu.

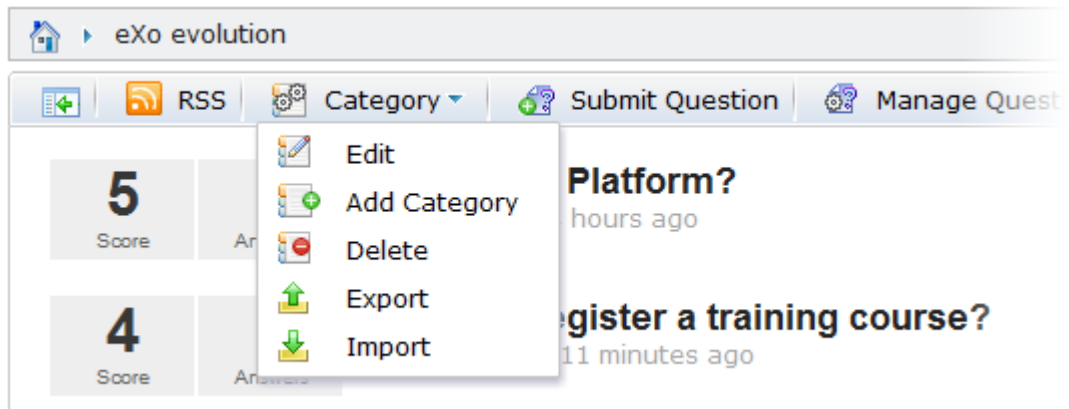

The second way

If you are already in a category that you moderate, you can perform all actions on this category by clicking

on the **Action** bar, then select an action from the drop-down menu.

Add new categories

Notice that only administrators can initialize **Answers** by creating first categories and assigning to moderators for each category. Moderator can only add new sub-categories in a category that he moderates.

Add a new category

1. Click **Category** on the **Action** bar, and select **Add Category** from the drop-down menu. The **Add Category** form will be displayed.

The image shows a 'Add Category' dialog box with a title bar containing a close button. The dialog contains several input fields and checkboxes. The 'Category' field is required, indicated by an asterisk. The 'Order' field contains the value '1'. The 'Restricted Audience' field is empty and has a user selection icon to its right. The 'Description' field is empty and has a diagonal line icon to its right. There are three checkboxes: 'Moderate New Questions' (checked), 'View Question Authors' (unchecked), and 'Moderate Answers' (unchecked). The 'Moderator' field contains the name 'john' and has a user selection icon to its right. At the bottom are 'Save' and 'Cancel' buttons.

Export/Import categories

Both functions can be executed on all categories and questions in the **Answers** home or a specific category in **Answers**.

Export categories and questions

1. Click

to open the **Export** form.

2. Input the file name to export.
3. Click **Save** to accept exporting all categories and questions.

The exported file is in the .zip format and it can be used to import to **Answers** or keep it as backup.

Import categories and questions

1. Click

to open the **Import** form.

2. Locate the file to import, then upload the selected file.
3. Click **Save** to finish.

After being imported, all categories and questions will be displayed in the **Answers** homepage.

Approve/Disapprove a question

In a category that requires question to be moderated, any new questions will be in the unapproved status and need to be approved before being published.

There are two options for answers: **All** and **Approved**.

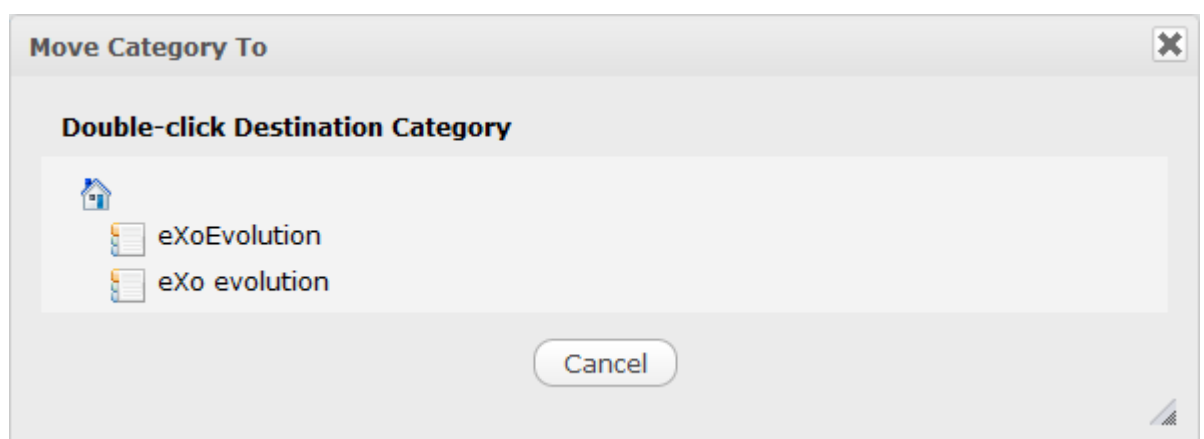

- **All**: all approved and unapproved questions are displayed and visible for all users.
- **Approved**: only the approved questions are displayed and visible while the unapproved questions are not displayed and invisible.

If you select **Approved**, the **Moderate Question** function will determine the unapproved questions to be displayed or not.

Approve/disapprove a question

The first way

1. Right-click the question title and select **Edit** from the drop-down menu. The **Edit** form will be displayed.

2. Select/Deselect the **Approved** checkbox.

The second way

1. Right-click the question title and select **Answer Question** from the drop-down menu. The **Answer** form is displayed.

2. Select/Deselect the **Approved** checkbox.

The third way

1. Click

on the **Action** bar. The **Manage Questions** form appears.

2. Click

or

to approve or disapprove the respective question.

Activate/Deactivate a question

When a question is activated, it will be displayed and visible to all users. If not, it will be hidden and invisible.

The first way

1. Edit a question to open the **Edit Question** form.

2. Select/Deselect the **Activated** checkbox.

The second way

1. Go to the **Answer** form.

2. Select/Deselect the **Activated** checkbox.

The third way

1. Click

on the **Action** bar.

2. Click

or

to activate or deactivate the respective questions.

Promote a comment to answer

This function enables users to log in and give comments on specific questions.

If the comment is considered as the best answer for the question, it can be promoted to the answer.

Leave a comment

1. Follow one of the following two ways:

The first way

- Click the question you want to leave comments and select

.

The second way

- Right-click a specific question and select

from drop-down menu.

2. Enter your comment in the text-input field.

3. Click **Save** to finish.

To promote a comment as an answer, click

on the top right of the comments panel.

Note

Comments can be written in different languages. If a question is posted in multiple languages, it can also have comments in multiple languages.

Administrator

The administrators have the global role and take care of the entire management tasks.

Set up Answers portlet

Note

In case the **Answers** portlet has not been activated yet, you need to add it to a page by dragging and dropping it from **Page Editor/Edit Inline Composer --> Applications --> Collaboration --> Answers** to the main pane. This can be done when [creating a new page](#) or [editing an existing page](#) or [editing the layout of a portal](#). You can also configure the **Answers** portlet as in the [sect-User_Guide-Dashboard_Portlet-Edit_Specific_Portlet](#) section.

When adding a portlet to a page, you have to configure this portlet to make it work in your desired way.

Configure the Answers portlet

1. Open the page edit mode via one of the following ways:

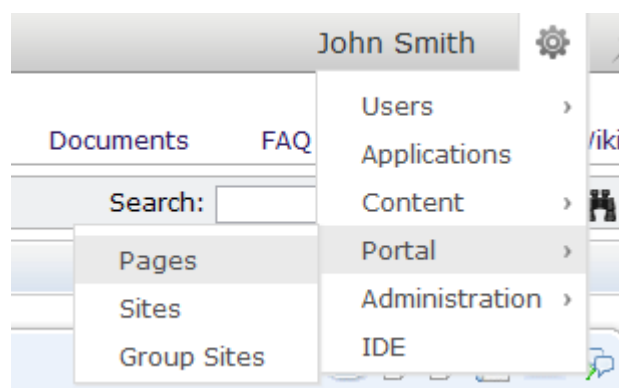

- **The first way**

i.

Click

--> **Portal --> Page** on the **Administration** bar.

ii.

Click

that corresponds to the page containing the **Answers** portlet in the **Page Management** page.

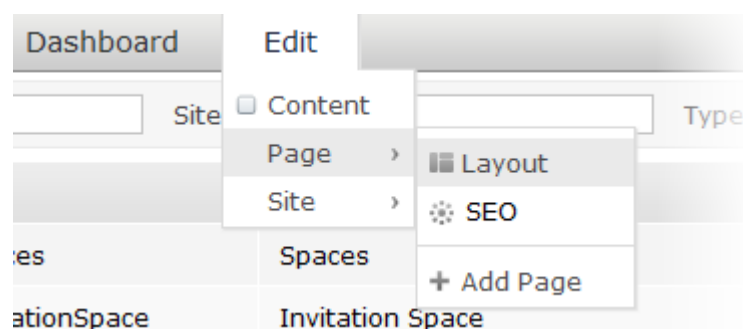

de	Site Name	Type portal	
Page Id	Title	Access Permission	Edit Permission
portal::intranet::spaces	Spaces	[*/platform/users]	manager:/platform/administrators
portal::intranet::invitationSpace	Invitation Space	[*/platform/users]	manager:/platform/administrators
portal::intranet::pendingSpace	Pending Space	[*/platform/users]	manager:/platform/administrators
portal::intranet::publicSpace	Public Spaces	[*/platform/users]	manager:/platform/administrators
portal::intranet::forum	Forum	[*/platform/users]	*/platform/administrators
portal::intranet::mail	Mail	[*/platform/users]	*/platform/administrators
portal::intranet::calendar	Calendar	[*/platform/users]	*/platform/administrators
portal::intranet::contact	Contact	[*/platform/users]	*/platform/administrators
portal::intranet::documents	documents	[*/platform/users]	*/platform/administrators
portal::intranet::detail	Detail	[Everyone]	*/platform/administrators
portal::acme::overview	Overview	[Everyone]	editor:/platform/web-contributors
portal::acme::news	News	[Everyone]	editor:/platform/web-contributors
portal::acme::products	Products	[Everyone]	editor:/platform/web-contributors
portal::acme::searchResult	SearchResult	[Everyone]	editor:/platform/web-contributors

Add New Page

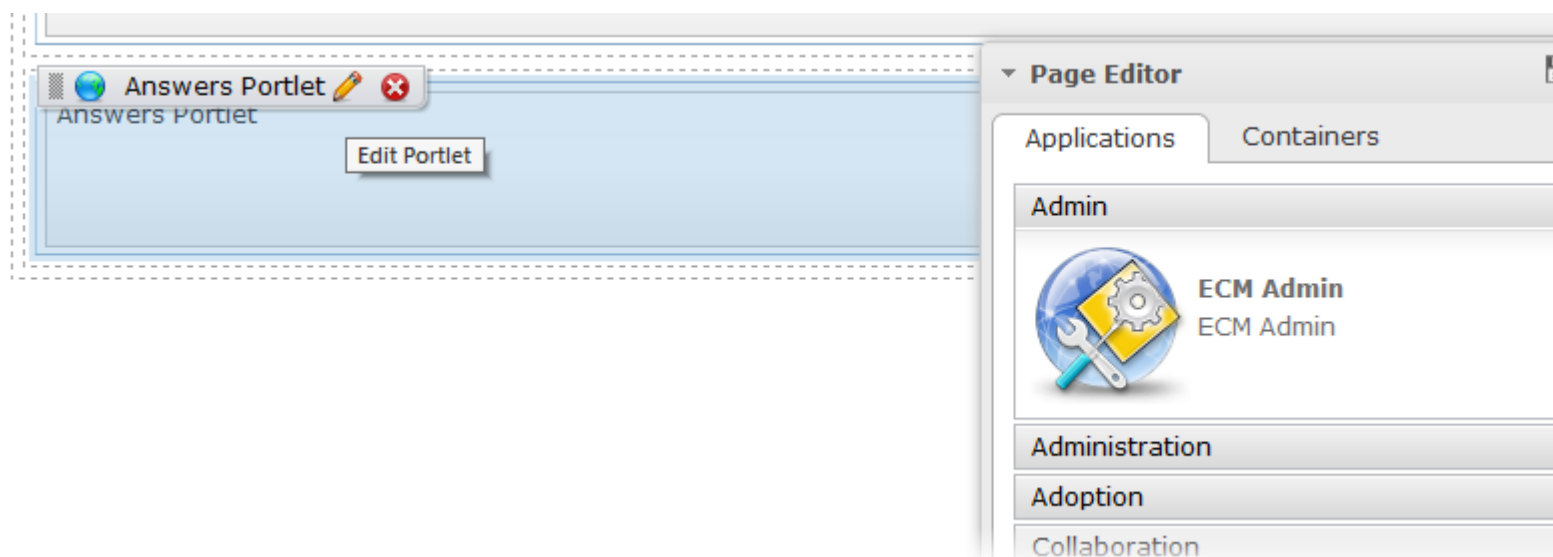

- **The second way**

i. Select a portal that contains a page with the **Answers** portlet, then open the page.

ii. Hover your cursor over **Edit --> Page**, then click **Layout**.

Now, you should be in the page edit mode.

3. Hover your cursor over the **Answers** portlet, then click

on the quick toolbar that appears.

4. Make changes in the **Answer Portlet** form.

The image shows a configuration form for the 'Answer Portlet'. The form has a top navigation bar with five tabs: 'Edit Mode' (selected), 'Window Settings', 'Select Icon', 'Decoration Themes', and 'Access Permission'. Below this is a sub-navigation bar with four tabs: 'Display Mode' (selected), 'Email Notifications', 'Discussion', and 'Category Scoping'. The 'Display Mode' tab contains the following settings: 'Display:' with a dropdown menu set to 'All'; 'Order by:' with a dropdown menu set to 'Created Date'; a third dropdown menu set to 'Ascending'; 'Enable Votes and Comments' with a checked checkbox; 'Anonymous users may submit questions' with a checked checkbox; 'Enable Automatic RSS' with a checked checkbox; 'Display Avatars' with a checked checkbox; and 'Allow users to post questions in the root category' with a checked checkbox. At the bottom right of the form is a 'Close' button.

In this form, you can:

- [Change the display mode](#)

- [Customize email notification template](#)
- [Enable the "Discuss in Forum" feature](#)

Change the display mode

In the **Display Mode** tab, you can set all the default display properties of the **Answers** application, including:

- **Display:** Display all entries in the **Answers** application.
 - **'All':** all entries, including approved and unapproved entries/questions, are displayed in a list when users view.
 - **'Approved':** Only approved entries are displayed in the list when users view.
- **Order by:** The order to display all questions in the **Answers** application.
 - **Created Date:** Entries in the list are displayed to the entries's created date order.
 - **Alphabet/Index:** Entries in the list are displayed to the alphabet order.

The type of sorting entries in the list may be: **Ascending** or **Descending**.

- **Enable Votes and Comments:** Enable votes and comments to be available in **Answers**. If this checkbox is selected, users can comment and vote in **Answers**. If not, these functions are disabled.
- **Anonymous users may submit questions:** Enable anonymous users to submit questions in **Answers** or not. If this checkbox is selected, anonymous users are entitled to submit questions. If not, they cannot submit questions.
- **Enable Automatic RSS:** Enable the RSS feeds function to be available in **Answers** or not. If this option is selected, users can get RSS information in **Answers**. If not, the RSS function is disabled.
- **Display Avatars:** Enable avatars to be viewed in **Answers** or not. If this checkbox is selected, the avatar of eXo members are shown in **Answers**. If not, they are hidden.
- **Allow users to post questions in the root category:** Enable users to post questions in the root category or not.

Customize email notification template

When there are new questions or answers in the category or topic that a user has watched, the user will receive the email notification. In the **Email Notifications** tab, change the content of the email notification manually or edit the template for each email notification.

- **New Question** tab: The content of the email notification.
- **Edit/Answer** tab: The content of the email notification that has been answered or edited.
- **Move Question** tab: The content of the email notification that notifies about the question that has been moved to another category.

The followings are variables that you can use in your template:

&categoryName_: will be replaced by the watched category.

&questionContent_: will be replaced by the content of the new questions.

&questionResponse_: will be replaced by the content of the new questions' reply.

\$questionLink_: will be replaced by the link to new questions in the **Answers** portlet.

These variables are used to load the content dynamically. Thus, you should not edit them. In case the template is changed unexpectedly, you can go back to the default template by clicking

You can use the text editor to format the template as you wish.

Enable the "Discuss in Forum" feature

In the **Discussion** tab, enable/disable the **Discuss in Forum** function in **Answers** and set the default forum for this function by selecting/deselecting the checkbox.

The screenshot shows the configuration interface for the 'Discuss in Forum' feature. At the top, there are tabs: 'Edit Mode', 'Window Settings', 'Select Icon', 'Decoration Themes', and 'Access Permission'. Below these, there are sub-tabs: 'Display Mode', 'Email Notifications', 'Discussion' (which is active), and 'Category Scoping'. In the 'Discussion' tab, the 'Discuss in Forum' checkbox is checked. Below it, the 'Select a forum' dropdown menu is open, showing 'General Discussion/Industry News' as the selected option. A '+' icon is next to the dropdown. At the bottom of the configuration area, there is a 'Save' button. At the very bottom of the window, there is a 'Close' button.

Define the default category for discussions

1.

Click

next to the **Select the forum** field to open the **Select a forum** form in the **Discussion** tab.

2. Click a specific category/forum title to select it.

3. Click **Save** to accept saving changes in the **Discussion** tab.

Select the category scoping

In the **Category Scoping** tab, show/hide categories in **Answers**. The hidden category is not displayed in **Answers**.

The screenshot shows a configuration window for the FAQ portlet. At the top, there are five tabs: 'Edit Mode', 'Window Settings', 'Select Icon', 'Decoration Themes', and 'Access Permission'. Below these, there are four sub-tabs: 'Display Mode', 'Email Notifications', 'Discussion', and 'Category Scoping'. The 'Category Scoping' tab is currently selected. It contains a list of categories, each with a document icon and a checkbox. The categories are: 'eXoEvolution' (unchecked), 'eXo evolution' (checked), 'Services' (checked), 'Products' (checked), 'Solutions' (checked), 'Training course' (checked), and 'Other questions' (checked). At the bottom right of the main content area is a 'Save' button. At the very bottom of the window is a 'Close' button.

Category	Selected
eXoEvolution	<input type="checkbox"/>
eXo evolution	<input checked="" type="checkbox"/>
Services	<input checked="" type="checkbox"/>
Products	<input checked="" type="checkbox"/>
Solutions	<input checked="" type="checkbox"/>
Training course	<input checked="" type="checkbox"/>
Other questions	<input checked="" type="checkbox"/>

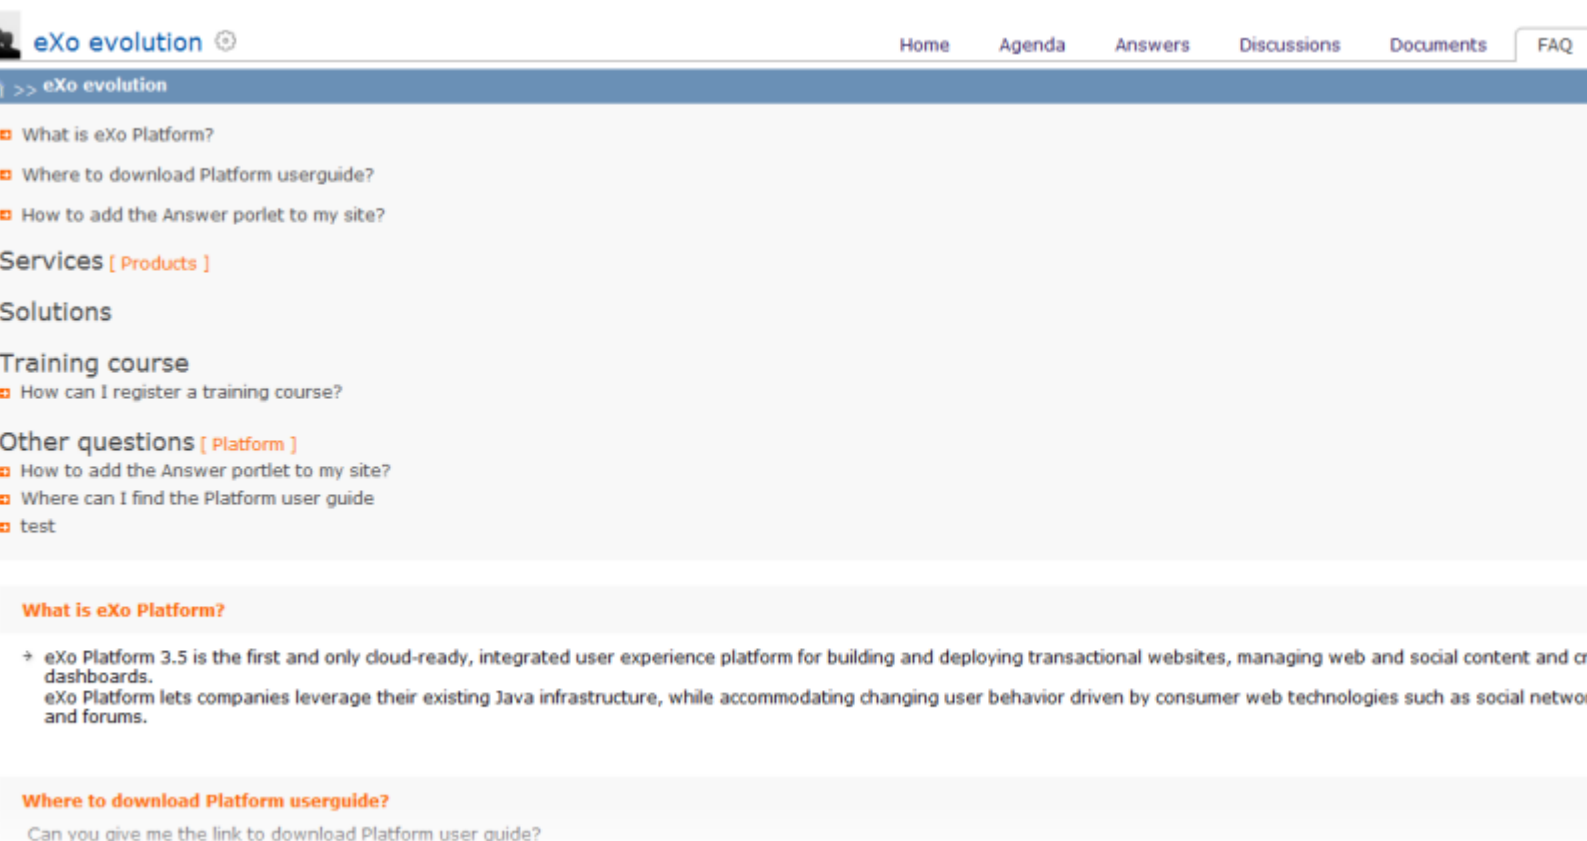

To hide/show any category, simply deselect/select its checkbox and click **Save**.

Set up FAQ portlet

The **FAQ** portlet can be added to a page for users to view questions and answers quickly and easily.

The screenshot shows the eXo evolution website. The top navigation bar includes links for Home, Agenda, Answers, Discussions, Documents, and a highlighted FAQ tab. Below the navigation bar, there is a search bar and a list of questions. The first question is "What is eXo Platform?". The second question is "Where to download Platform userguide?". The third question is "How to add the Answer portlet to my site?". Below the questions, there are sections for "Services [Products]", "Solutions", "Training course", and "Other questions [Platform]". The "Other questions" section contains a list of questions, including "How to add the Answer portlet to my site?", "Where can I find the Platform user guide", and "test".

What is eXo Platform?

Where to download Platform userguide?

How to add the Answer portlet to my site?

Services [Products]

Solutions

Training course

How to add the Answer portlet to my site?

Other questions [Platform]

How to add the Answer portlet to my site?

Where can I find the Platform user guide

test

What is eXo Platform?

eXo Platform 3.5 is the first and only cloud-ready, integrated user experience platform for building and deploying transactional websites, managing web and social content and dashboards. eXo Platform lets companies leverage their existing Java infrastructure, while accommodating changing user behavior driven by consumer web technologies such as social networks and forums.

Where to download Platform userguide?

Can you give me the link to download Platform user guide?

The **Edit Mode** of the **FAQ** portlet allows you to set the properties to display questions and answers in the View mode.

Configure the FAQ portlet

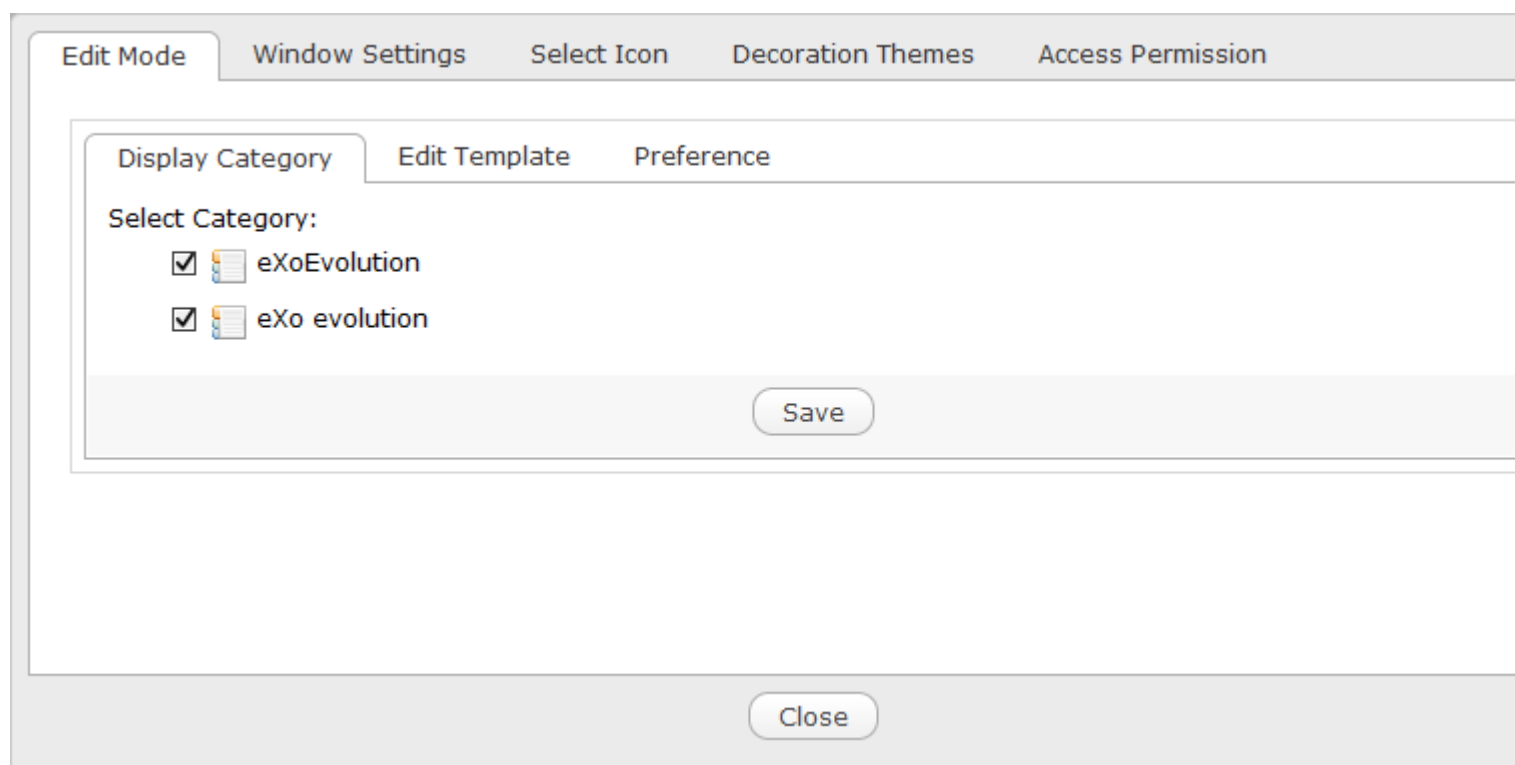

1.  Click **--> Portal --> Pages.**

The **Page Manager** page will be displayed.

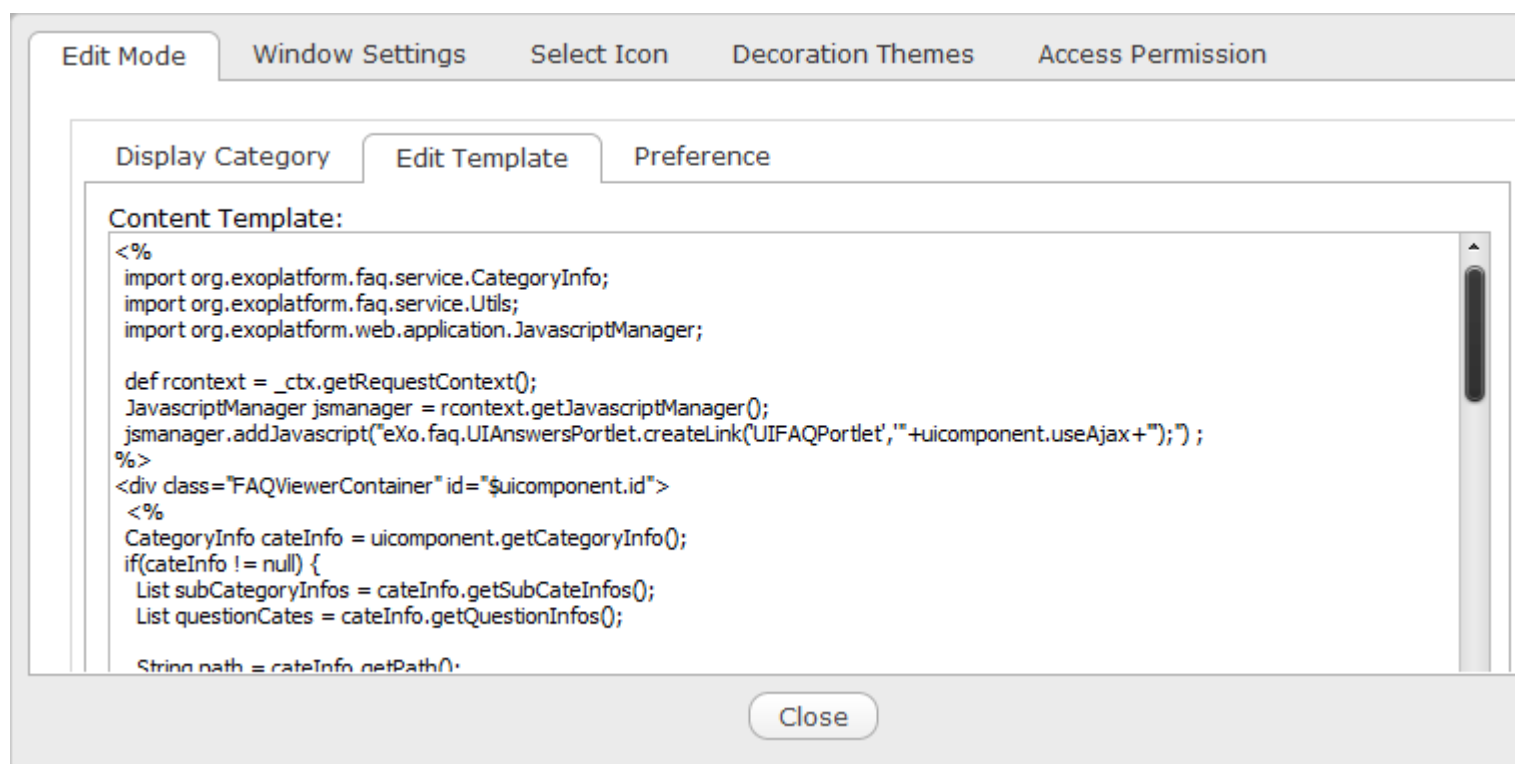

2. Click

3. Hover your cursor over the **FAQ** portlet and click

ii. In the **Edit Template** tab, you can use CSS to customize the **FAQ** template.

This is an example of the **FAQ** template after applying the new style.

The screenshot shows the eXo evolution website interface. At the top, there is a navigation bar with links: Home, Agenda, Answers, Discussions, Documents, and FAQ. Below this, a sidebar on the left contains a list of questions under the heading 'eXo evolution'. The main content area displays a list of questions, with the first one, 'What is eXo Platform?', expanded to show its answer. The answer text states: 'eXo Platform 3.5 is the first and only cloud-ready, integrated user experience platform for building and deploying transactional websites, managing web and social content and dashboards. eXo Platform lets companies leverage their existing Java infrastructure, while accommodating changing user behavior driven by consumer web technologies such as social networks and forums.'

iii. In the **Preference** tab, you can enable or disable the bookmarkable URLs in **FAQ**.

The screenshot shows a configuration window for the FAQ portlet. The window has a title bar with tabs: Edit Mode, Window Settings, Select Icon, Decoration Themes, and Access Permission. The 'Preference' tab is selected. Inside the 'Preference' tab, there is a section titled 'Display Category' and 'Edit Template'. Below this, there is a checkbox labeled 'Use Ajax:'. The checkbox is currently unchecked. At the bottom right of the 'Preference' tab, there is a 'Save' button. At the bottom center of the window, there is a 'Close' button.

By not using Ajax, the **FAQ** will generate plain URLs in the links. The added benefit will be bookmarkability and better SEO as the links will be permalinks. Using Ajax, the links will be

JavaScript-based and generate Ajax calls. This should make browsing faster because the whole page is not reloaded.

How To Use Forum?

The section provides you a guide to use all **Forum** features or to configure the **Forum** portlet to make it work in your desired manner.

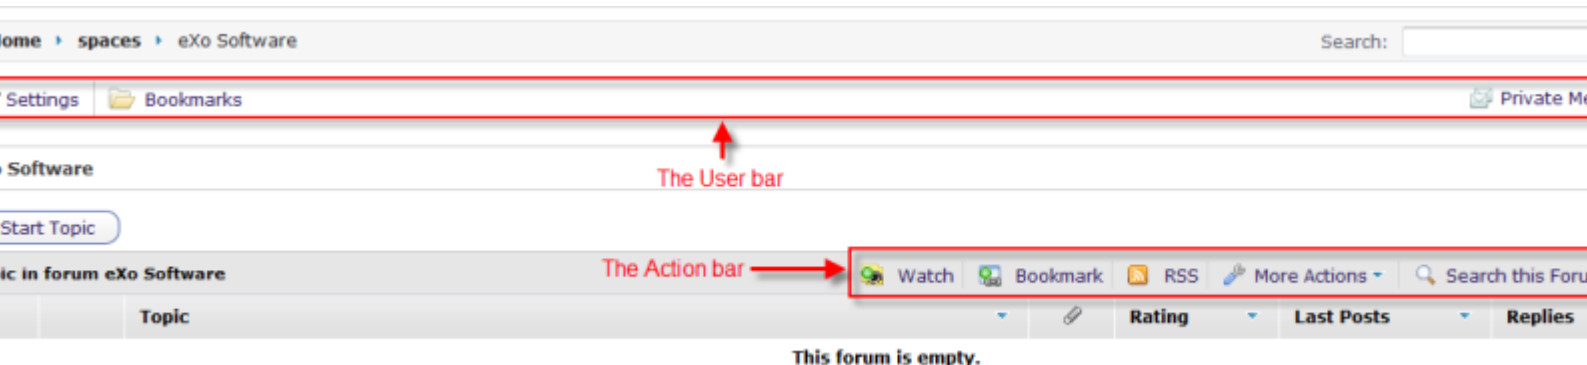

In **Forum**, the role of each user group is clear and very important. Each role has a set of tasks that they can execute. Administrators and moderators are responsible for setting up and maintaining **Forum**. With the highest rights, the administrators are in charge of the entire management tasks, including form configurations, users management, permissions, categories, forums, topics, and messages. With sub-sets of administrative permissions, the moderators will manage the respective sub-sets of the forum.

The user interface will indicate which features are available to you, based on your role.

- As a regular user, you will have the **User** bar and **Action** bar with the basic actions.

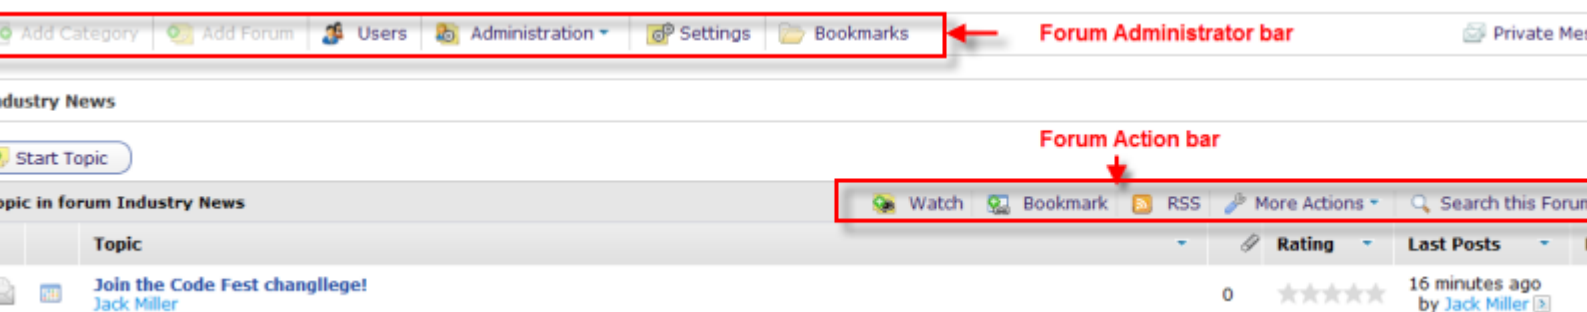

- As a moderator, you will have the **User** bar and **Action** bar with a sub-set of certain capabilities.

Chapter 3. How To Use Forum?

- As an administrator, you will have the **Administration** bar which is basically the **User** bar with more administrative actions. You also see the **Action** bar with the advanced actions on forums and categories. Most of management tasks are shown via these bars.

To have an overall look of actions which users of each role can do in the **Forum** application, see the following table:

Features	Description	Administrato	Moderator	Owner	Regular user	Guest
View details of Forum	View categories, forums, and many another information.					
Subscribe to RSS feeds	Provide the link to Forum for easy sharing.					
Attach a file	Upload attachments to a topic/post, preview and download attachments.					
Search	Do the simple and advanced search.					
Bookmark	Bookmark category,					

Features	Description	Administrator	Moderator	Owner	Regular user	Guest
	forum, topic.					
Add a post	Post reply, quote, private post, quick reply.					
Edit a post	Edit post, quote and private post.					
Delete a post	Delete post inside specific topic.					
Add a topic	Start a new topic.					
Edit a topic	Edit topic in a specific forum.					
Delete a topic	Delete topic inside a specific forum.					
Lock/Unlock a topic	Lock/Unlock topics inside a specific forum.					
Add a poll & Vote	Add a poll to topic and vote poll.					
Rate a topic	Evaluate a topic by rating star.					
Add a tag	Create new tags and tag a topic.					

Chapter 3. How To Use Forum?

Features	Description	Administrator	Moderator	Owner	Regular user	Guest
<i>Private message</i>	Send or receive private messages.					
<i>Watch</i>	Subscribe to categories, forums, topics to receive notification mails of new posts or topics.					
<i>User Settings</i>	Change profile settings, personal forum settings.					
<i>Stick/unstick a topic</i>	Stick/unstick topics inside a specific forum.					
<i>Lock/unlock a topic</i>	Close/open topic inside a specific forum.					
<i>Split a topic</i>	Divide one topic into two separate topics.					
<i>Merge topics</i>	Combine two or more topics into one.					

Features	Description	Administrator	Moderator	Owner	Regular user	Guest
Manage a poll	Create, edit, delete, close and reopen polls.					
Move a topic/post	Move one topic/post from a forum/topic to the other forum/topic.					
Approve a topic/post	Change new topics/posts from pending status to normal status so that guest, normal user can view.					
Uncensor a post	Allow a topic which has censored content to be displayed.					
Show/hide a post	Allow posts to be shown/hidden.					
Manage pending tasks	Manage all topics/posts waiting for moderation in one place.					

Features	Description	Administrator	Moderator	Owner	Regular user	Guest
Manage a watch	Subscribe (watch). Edit and delete subscribed email.					
Ban a user	Ban users from accessing specific forums or categories					
Add a forum	Add a new forum to a specific category.					
Edit a forum	Change the title, description, moderator, permissions of a forum. However, moderators cannot set moderators for a forum.

Search

Like in **Answers**, you can do either of two search types (**Quick Search** or **Advanced Search**) anywhere in the **Forum** application, right on the homepage or inside each specific forum or topic that makes it easy to find the expected information.

Quick search

With **Quick Search**, users can directly type a search term in the textbox. All the categories, forums, topics and posts that have the keyword matching the search term will be quickly displayed in the **Search Result** form.

For example:

- The **Search** function on the main bar to search for items related to categories, forums, topics, and posts.

- The **Search** function inside one specific forum to find topics, and posts in the forum only.

- The **Search** function inside one specific topic to find posts related to the topic only.

Do a quick search

1. Enter a search term into the relevant search textbox.

2.

Click

or press the **Enter** key to perform your search, or click the **Search** button if you want to search in one forum or topic.

Depending on your selected object, the results which contain the matching keyword will be displayed in the **Search Result** form.

See also

- [View details of the Forum application](#)
- [Advanced search](#)

Advanced search

The **Advanced Search** allows users to make a search with the particular criteria corresponding to the object you want to find. Using the **Advanced Search**, you can find forums/topics/posts exactly.

The **Advanced Search** icon is placed anywhere in the **Forum** application. To perform the advanced search, do as follows:

1. Click

at the top right of the **Forum** homepage when being in the **Forum** application or in the search pop-up or in the **Search this category/Search this forum/Search this topic/** on the **Action** bar of each selected object.

Basing on where you want to search: category, forum or post, the search criteria will be changed accordingly.

2. Define values of properties corresponding to each object that you want to search.

3. Click the **Search** button to do search or **Cancel** to quit. Also, click the **Clear Fields** button to reset the inputted values.

The list of the found objects will be displayed in the **Search Result** form or there will be an alert message when no objects match with the input properties.

- To find in categories, select **Category** from the **Search in** drop-down menu.

[guide] Use BBCode in your post. *

Message

BB code is a set of tags based on the HTML language that you may already be familiar with. They allow you to add formatting to your messages in the same way as HTML does, but have a simpler syntax and will never break the layout of the pages you are viewing. The ability to use BB code is set on a forum-by-forum basis by the administrator, so you should check the forum rules when you post a new message.

[b] Below is a list of the BB code tags you can use to format your messages[b]:

- [b], [i], [u] : Bold / Italic / Underline
- [color]: Color
- [size]: Size
- [font]: Font
- [highlight]: Highlight
- [left], [right], [center], [justify]: Left / Right / Center / Justify
- [indent]: Indent
- [email]: Email Linking
- [url], [link]: URL Hyperlinking
- [list]: Bulleted Lists / Advanced Lists

4. Click **Preview** to see before submitting, or **Submit** to finish your topic.

Note

If the moderation feature is activated for a forum, it means that new topics must be reviewed and approved by a moderator before they are published. Once a new message is posted in a moderated forum, the forum will tell you that the topic must be approved before being published.

When creating a topic, you can also add extra properties to this topic:

- [Select a topic icon.](#)
- [Set the topic options.](#)
- [Control who can view or post in your topic.](#)

Select a topic icon

When posting a new topic, you may also assign an icon to the topic for the quick visual identification as follows:

1. Go to the **Icon** tab in the **New Topic** form.
2. Select an icon category and click your desired icon in the right pane. The selected icon is surrounded with the red border and with its name as below.

Preview Submit Cancel

To set the "post" or "view" right to certain users, enter usernames manually in each textbox or click one relevant selector next to the textbox.

- Click

to select users.

- Click

to select users defined by specific roles.

- Click

to select groups.

Edit a topic

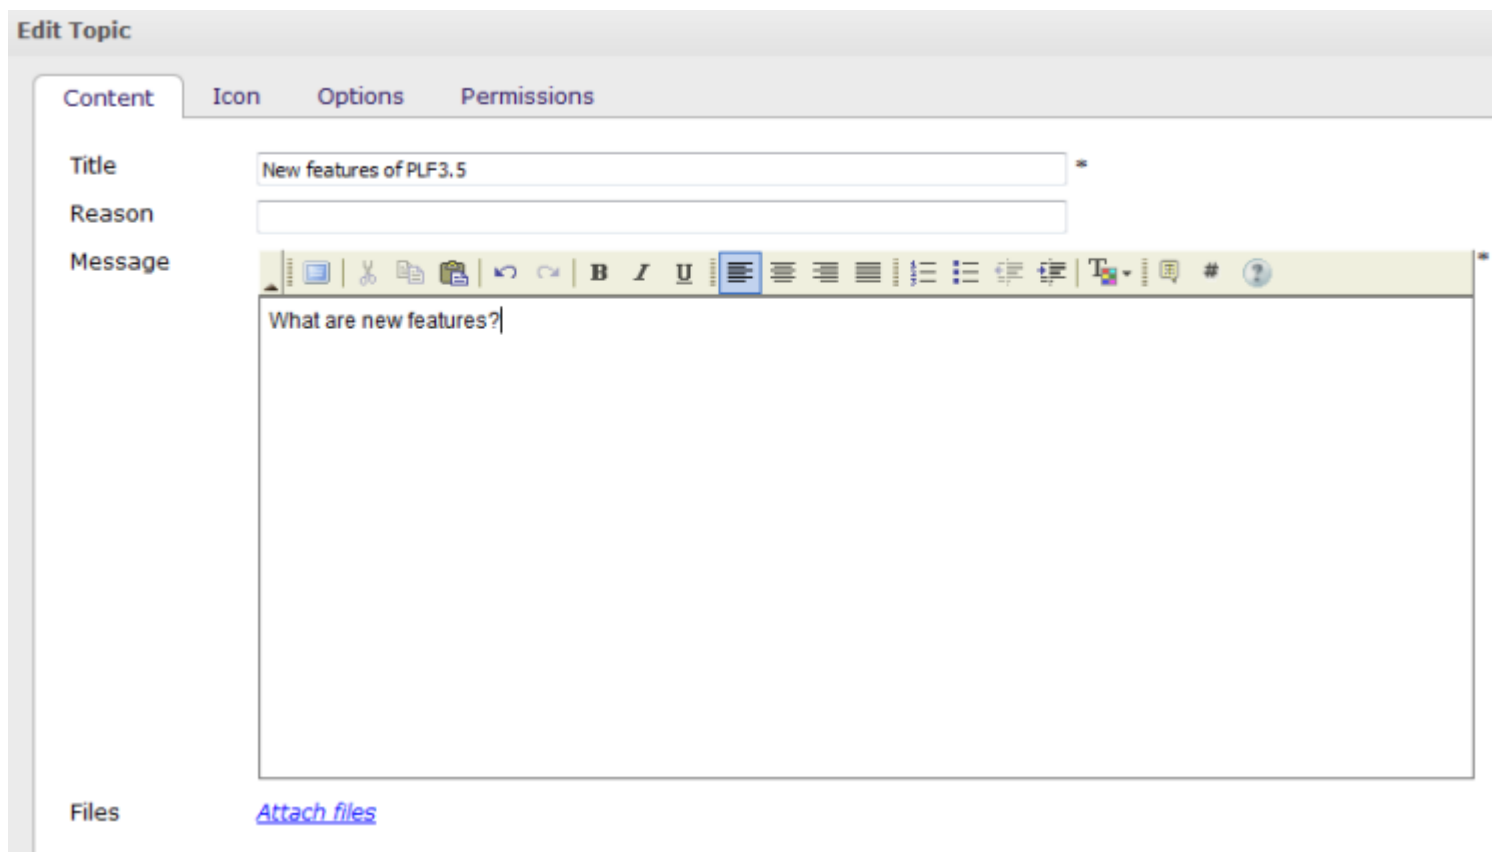

Follow this method when you are in your topic.

1. Click

on the **Action** bar. For regular users, this button is only shown when you are the creator.

2. Click **Edit** from the drop-down menu to open the **Edit Topic** form.

The "Edit Topic" form has a title bar and four tabs: "Content", "Icon", "Options", and "Permissions". The "Content" tab is active. It contains three input fields: "Title" with the text "New features of PLF3.5", "Reason", and "Message". The "Message" field is a large text area with the text "What are new features?". Above the text area is a rich text editor toolbar with icons for bold, italic, underline, list, link, unlink, and other formatting options. At the bottom left, there is a "Files" section with a link to "Attach files".

3. Make changes to your desire. Also, leave the reason in the **Reason** field if needed.

4. Click **Submit** to finish.

Create a poll

Each topic may have a poll question with pre-defined options for users to select. As a regular user, you can only add a poll question to your own topic. Meanwhile, administrator and moderator can add the poll to any topics.

1. Go to the topic you want to add a poll.

2. Click

on the **Action** bar and select **Add Poll** from the drop-down menu.

3. Enter the poll question and options.

Poll

Vote Now

Rate a topic

The **Forum** application provides an intuitive rating experience through a five-star scale. Your choice of five stars means the highest rating for the topic.

1. Go to the topic you want to vote.

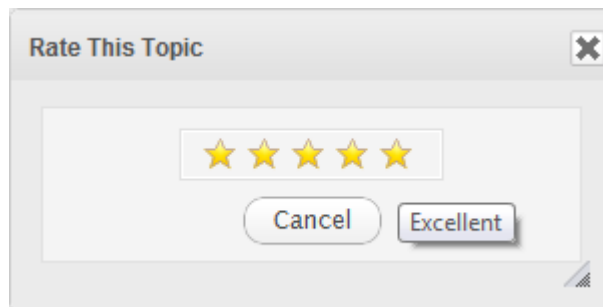

2.

Click

on the **Action** bar.

The **Rate This Topic** form will appear.

3. Rate the topic by clicking the star. The number of selected stars will be changed from grey into yellow.

Note

Each user can only vote for a topic once. The function is disabled in closed topics and with banned users.

Tag/Untag a topic

This function is for all logged-in users. Tags are keywords which are used as labels to describe or categorize the topic contents. One topic may have several tag names. Using tags allows you

to categorize topics based on the actual content. Even, it can be a better way to find a specific topic than a full-text search.

Tag a topic

1.

Click

on the **Action** bar.

An input text box will pop up.

2. Enter a tag name or multiple tags separated by a space or select existing tags in the suggestion list that appears when typing.

3. Press **Enter** or click **Add Tag**.

Tags assigned to the topic appears as follows.

New Content Management features in eXo Platform 3.5

We've added more than 100 new features in this new release but I will focus on just a few of these in this post.

New Features for a Better User Experience

Inline editing

Last year, in eXo Platform 3.0, we released a new way to edit and publish content in the context of a website. This was a major step forward in term of improvement in term of product reliability.

eXo Platform 3.5 will offer an improved in-line editing experience. With this new feature, you can edit a specific individual content item then submit it. That's bypassing the redirection to the Content Editor (which is useful for more complex edits) means faster content updates:

Featured Products

- [Edit your post](#)

Post a private reply

You can send a private reply in a topic, which only allows the responded user to view the message content.

Chapter 3. How To Use Forum?

1. Go into the topic you want to post the reply.

2. Click

under the post to open the **Private Post** form.

3. Enter your message and send your messages as described in the [Post an advanced reply](#).

Note

Private posts will not be checked for approval when it is posted in a topic that has the 'Posts moderation' enabled. Private posts are displayed with the label 'private!'.

Reply with a quote

You can include a quote from the previous message in your reply to a specific post. This may substantially increase the readability of the discussion topics when it is used correctly.

1. Click

under the post you want to quote.

This will bring up the "Quote" form, with the previous message already quoted in the textbox.

[/QUOTE]

Quoted content

Attach File

[Attach files](#)

Preview

Submit

Cancel

2. Enter your message. Edit the quotation if necessary.

i. In the **Content** tab, the quoted content is wrapped between BB Codes tags [QUOTE][/QUOTE] which is automatically generated. Add your message content before or after this quoted content. You can create a quoted content manually by clicking

from the **WYSIWYG** editor toolbar:

This will generate the quotation BB Codes tag for your message. After getting the quotation tag, enter your quotation between [QUOTE] and [/QUOTE].

ii. In the **Icons and Smileys** tab, select an icon for your reply here.

3. Click **Submit** to finish.

Edit a post

After submitting your post, and you want to change it, you can do as follows:

1.

Click

under the post you want to edit.

2. Make changes on the post, then click **Submit** to accept your changes. When you edit a post, you also have the opportunity to upload an attachment, or delete an existing one.

Delete a post

1.

Click

under your post that want to delete.

2. Click **OK** in the confirmation message.

Use BB Codes

BB Codes (Bulletin Board Codes) are special tags in bulletin boards to help users enrich their posts with formatting and inclusions. They are useful to provide guarded formatting capabilities to the forum users without the risk of breaking the html markup of the page. BBCode itself is similar in style to HTML: tags are enclosed in square braces "[" and "]" rather than "<" and ">" and it offers greater control over what and how something is displayed.

Chapter 3. How To Use Forum?

Depending on the *BBCode template customized* by administrators only, you may find it very easy to add BBCode tags to your posts through a toolbar above the message area on the posting form. You can either type the BBCode tags manually or use the toolbar in the posting form. To easily get the BBCode tags without typing them, simply click on the respective icon which is shown in the toolbar above the message area.

BBCode

Click

on the tool bar to get the full list of build-in BBCode explanations and examples.

Help BB Code

BB Code

BB code is a set of tags based on the HTML language that you may already be familiar with. They allow you to add formatting to your messages in the same way as HTML does, but have a simpler syntax and will never break the layout of the pages you are viewing. The ability to use BB code is set on a forum-by-forum basis by the administrator, so you should check the forum rules when you post a new message.

Below is a list of the BB code tags you can use to format your messages.

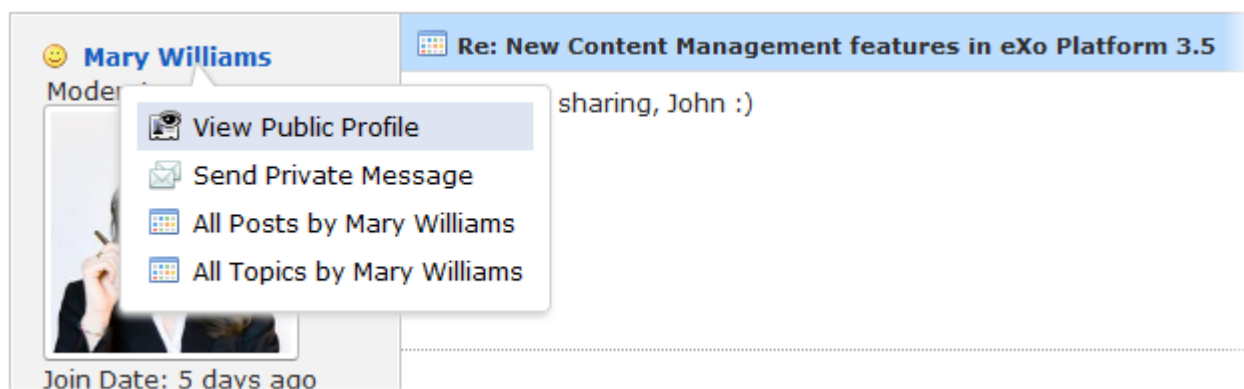

BB Code List

[b] , [i] , [u]	Bold / Italic / Underline
[color]	Color
[size]	Size
[font]	Font
[highlight]	Highlight
[left] , [right] , [center] , [justify]	Left / Right / Center / Justify
[indent]	Indent
[email]	Email Linking
[url] , [link]	URL Hyperlinking
[list]	Bulleted Lists / Advanced Lists
[img]	Images
[html]	HTML Code
[wiki]	Wiki Markup
[quote]	Quote

Public user profile

Every forum member has a publicly viewable profile. This includes information provided by the member, either during the registration process or later via the [User settings](#).

Whenever you see a member's name in a topic, you can view his public profile quickly by clicking his username and select **View Public Profile** in the drop-down menu.

The **View User Profile** form will be displayed.

Private messages

This function is for all logged-in users to send messages to other users privately. These messages will not be moderated and only viewable to the receiver.

Send a private message

1. Click the user name of the member you want to send message, then select **Send Private Message** in the drop-down menu.

The **Private Messages** form will appear.

 A screenshot of the 'Private Messages' form. It has a title bar 'Private Messages' with a close button. The form contains:

- 'Send to' field with the text 'mary' and a dropdown arrow.
- 'Title' field with a dropdown arrow.
- 'Message' field with a rich text editor toolbar containing icons for undo, redo, bold, italic, underline, list, link, unlink, and help.

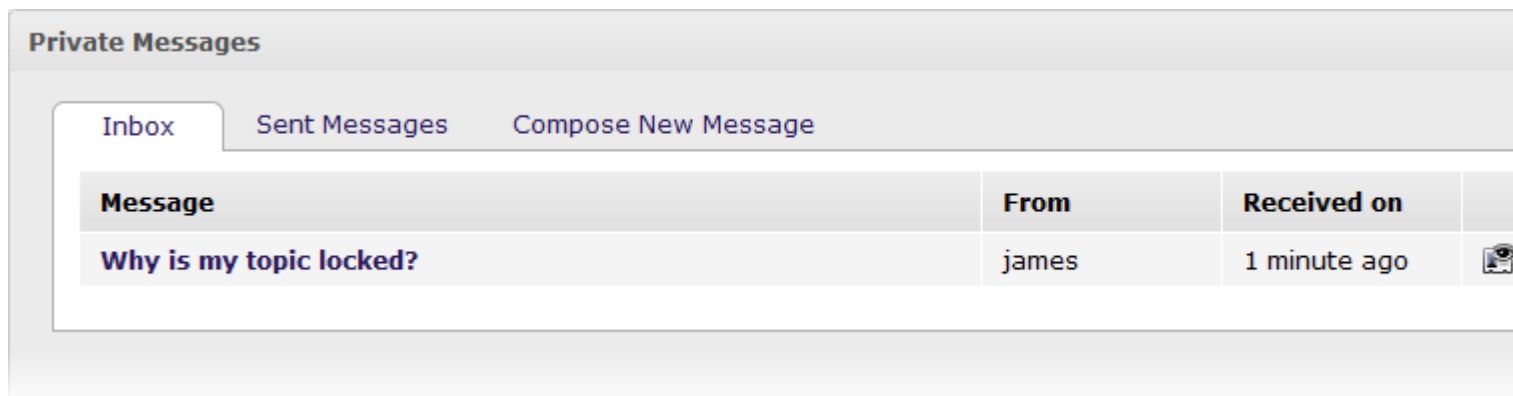

2. Enter the username of the receivers and type your message title and contents.
3. Click **Save** to send the message.

Receive a private message

When you have received a private message, there will be a notification on your **User** bar.

Click **Private Messages** to open the **Private Messages** form.

Details:

Tab	Description
Inbox	All received messages which can be viewed and deleted.
Sent Messages	All sent messages which can be forwarded and deleted.
Compose New Message	Where to compose new messages.

Bookmarks

In the **Forum** application, the **Bookmark** function is to collect links to a category, forum or topic you have visited, so that you can return to that category, forum or topic directly. Bookmarks can be created and managed by yourself.

Add a bookmark

This function is for all logged-in users to save links to categories, forums or topics into the Forum Bookmark.

1. Go into the object (category, forum or topic) you want to bookmark.

2.

Click

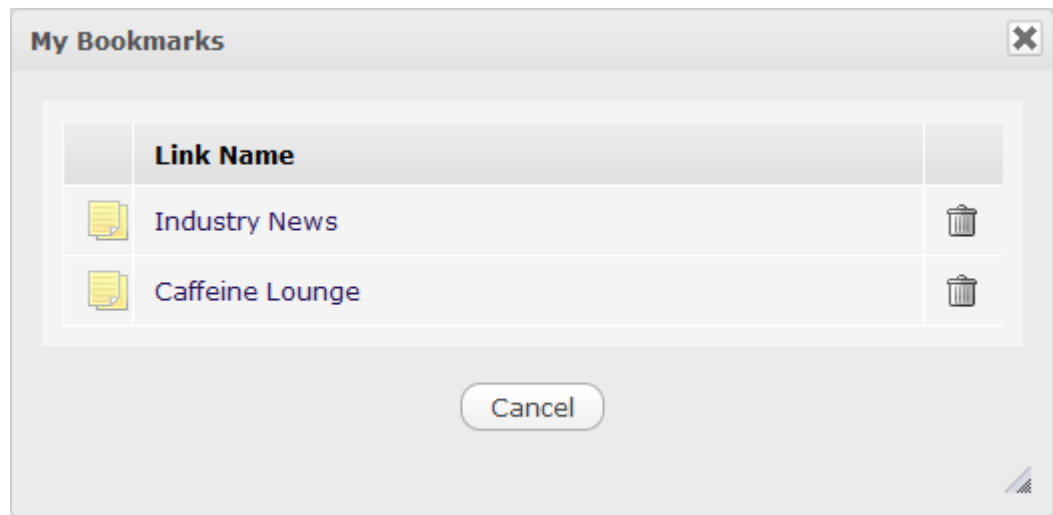

on the **Action** bar or right-click the object title and select **Bookmark** in the drop-down menu. The bookmarked link will be added to your bookmarks list.

View bookmarks

To view bookmarks, click

on the **Action** bar. This will bring up the **My Bookmarks** form, with the list of your bookmarked links. To view the bookmark, click a desired bookmark title from the list.

Delete a bookmark

Simply click

corresponding to the link that you want to delete.

The selected bookmarks will be removed from the bookmarks list.

Subscribe to RSS feeds

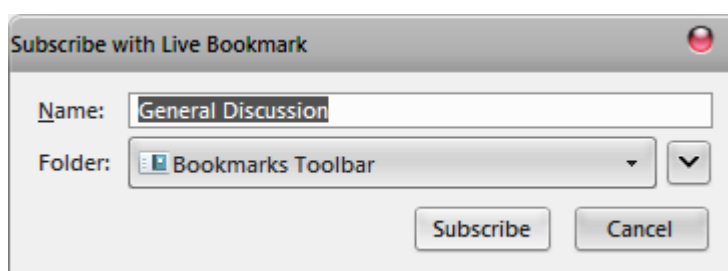

This function is for all users to subscribe to a specific category, forum, topic. If there are any changes, the feed of the subscribed category, forum or topic will be updated. To get the RSS feed, click on the **Action** bar;

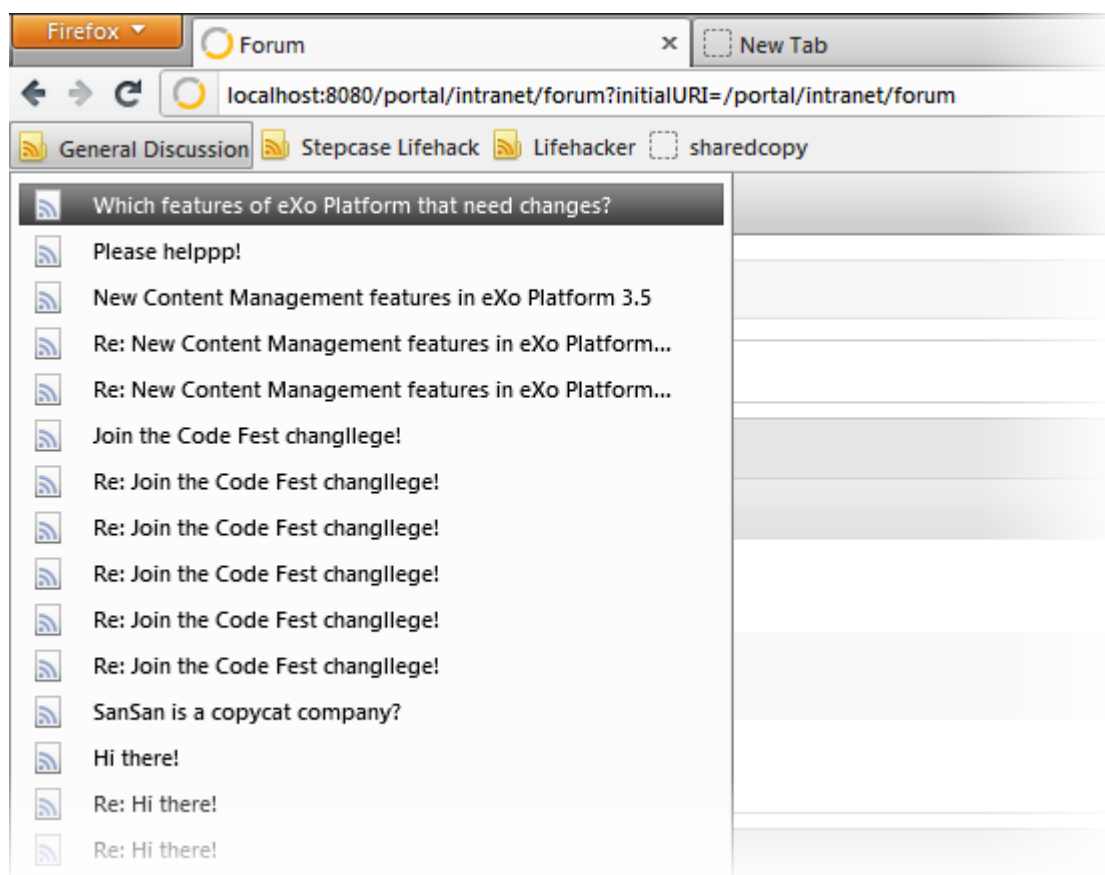

Or right-click the item you want to subscribe to.

The detailed information of the category/forum/topic is displayed on another tab. Depending on which browser you are using, this page may look different. In this example, the browser is Firefox 8.0.

The following illustration demonstrates the RSS feed subscription using the Firefox Live Bookmark:

- Category feeds contain all posts from all topics in all forums in a category. The category feeds shows the title (title of the category), description (category description), link (permalink to the category), pubdate (creation date of the category).
- Forum feeds contain all posts in all topics in a forum. The forum feeds show title (name of the forum), description (description of the forum), link (permalink of the forum), pubdate (creation date of the forum).
- Topic feeds contain all posts in a topic. The topic feeds show title (title of the topic), description (the content of the topic's initial post), link (permalink to the topic), pubdate (the creation date of the topic).

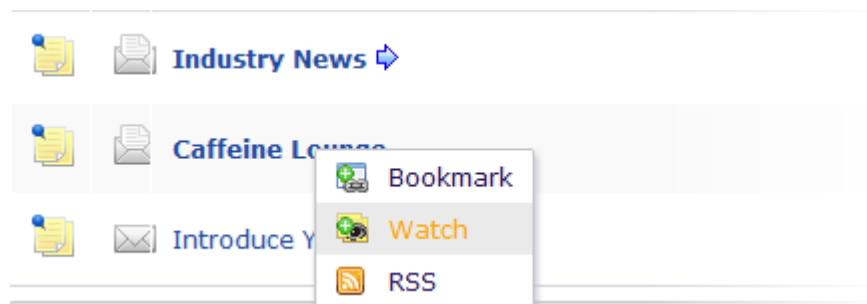

Watch

This function is for all logged-in users to keep track of changes in categories, forums or topics via notification emails. Whenever there are new changes, such new categories, new topics or new posts, you will receive a notification from the **Forum** application.

To watch a desired object, go into the object (category, forum or topic), and click

on the **Action** bar; Or right-click the object title and select **Watch** from the drop-down menu:

The watched objects are also listed in the **My Subscriptions** tab in the **User Settings** form. When being unwatched, they also have been existed in this list.

You will receive the notification message of the successful watching. You will receive the email notifications about new posts/replies of the forum that you are watching as well. In the notification email, you will be provided links that help you go directly to the topic or go to reply to the post. After clicking this link, the new posts in your watched topic will be highlighted.

Note

Once a category/forum or a topic has already been watched, the **Unwatch** option will appear in the right-click menu or on the *Action* bar, so you can unsubscribe from the object.

Permanent links

This function is for all users to view and copy the link to a specific forum/topic and share it with others.

1. Go to Forum/Topic which you want to share link.
2. Click **Permalink** label at the right corner.

Note

The page link you want to share is displayed in the address bar of the web browser. You can copy and share it to others.

User settings

You yourself may configure your settings, such as personal profile, forum settings, and subscriptions.

Click

on the **User** bar to go to the **Settings** form. Once you opened the **Settings** form, you can control your personal settings, options and preferences via the following actions:

- [Edit your profile.](#)
- [Change your avatar.](#)
- [Change the watch settings.](#)
- [Change forum settings.](#)
- [Edit your subscriptions.](#)

Edit a profile

By selecting the **Profile** tab, you can see your personal information and other preferences.

A screenshot of a "Settings" dialog box with three tabs: "Profile", "Forum Settings", and "My Subscriptions". The "Profile" tab is active. It contains fields for "Username" (value: mary), "Screen Name" (value: Mary Williams), "User Title" (value: Moderator), and a "Signature" text area. Below these is a "Display Signature" checkbox (unchecked). The "Avatar" section shows a photo of a woman with the text "Update | Reset" below it. At the bottom are "Display Avatar" (checked), "Watch topics I start" (unchecked), and "Watch topics I post in" (unchecked). "Save" and "Cancel" buttons are at the bottom right.

Settings

Profile Forum Settings My Subscriptions

Username : mary

Screen Name : Mary Williams

User Title : Moderator

Signature :

Display Signature : ☐

Avatar :

[Update](#) | [Reset](#)

Display Avatar : ☒

Watch topics I start : ☐

Watch topics I post in : ☐

Save Cancel

Chapter 3. How To Use Forum?

Here, you can:

- Edit your screen name and title displayed in forums in the **Screen Name** and **User Title** fields.
- Edit your signature which will be displayed at the bottom of your post. Enter your signature in the **Signature** textbox. Tick/Untick the **Display Signature** checkbox to enable/disable your signature.
- Change your avatar by clicking the **Update** link. Tick/Untick the **Display Avatar** checkbox to show/hide your avatar.
- Follow your created topics by selecting the **Watch topics I start** checkbox. You will receive email notifications when there are any new posts added to your topics.
- Follow topics which you have posted by ticking the **Watch topics I post in** checkbox. You will receive email notifications when there are any new posts added to your created topic.

Change forum settings

Go to the **Forum Settings** tab in the **Settings** form. You can change preferences, such as time zone, date and time formats and other display options.

The screenshot shows a 'Settings' dialog box with three tabs: 'Profile', 'Forum Settings' (selected), and 'My Subscriptions'. The 'Forum Settings' tab contains several configuration options, each with a label and a dropdown menu or checkbox. The options are: 'Time Zone' (set to '(GMT 0:00) Greenwich Mean Time: Dublin, LI'), 'Short Date Format' (set to 'mm/dd/yyyy (11/23/2011)'), 'Long Date Format' (set to 'eee, mmmm dd, yyyy (Wed, November 23, 2011)'), 'Time Format' (set to '12-hour'), 'Topics Per Page' (set to '10'), 'Posts Per Page' (set to '10'), and 'Show Forum Jump' (checked). At the bottom of the dialog are 'Save' and 'Cancel' buttons.

Setting	Value
Time Zone	(GMT 0:00) Greenwich Mean Time: Dublin, LI
Short Date Format	mm/dd/yyyy (11/23/2011)
Long Date Format	eee, mmmm dd, yyyy (Wed, November 23, 2011)
Time Format	12-hour
Topics Per Page	10
Posts Per Page	10
Show Forum Jump	<input checked="" type="checkbox"/>

Check/Uncheck the **Show Forum Jump** if you want to show/hide the **Forum quick navigation** at the bottom of the **Forum** page.

Edit a subscription

Go to the **My Subscriptions** tab in the **Settings** form, where you can update or delete existing subscriptions.

The screenshot shows the 'Settings' dialog box with the 'My Subscriptions' tab selected. The dialog has three tabs: 'Profile', 'Forum Settings', and 'My Subscriptions'. Inside, there is a table with the following structure:

	Title			
	Industry News	<input type="checkbox"/>	<input type="checkbox"/>	

Below the table, there are two input fields:

- Your personal feed URL is :
- Your watches are sent to :

At the bottom right of the input fields is an 'Update' button. At the bottom center of the dialog are 'Save' and 'Cancel' buttons.

- In the **RSS** column, you can subscribe or unsubscribe your subscriptions by selecting/deselecting the respective checkboxes, then click **Save**. The selected objects (categories, forums, topics) will be updated to the **Your personal feed URL is** field. You can use this link to view the content of your subscriptions.

- In the

column, you can edit or delete your subscription email. Select an email, then click the trash icon to delete. Enter a new email address into the **Your watches are sent to** field. Click **Update** to add your entered email addresses in the

column.

- Click

to remove your watched category, topic, post. After being removed, you will no longer receive any email notifications of the removed object.

Next, click **Save** to accept your changes.

Moderator

Moderators in **Forum** are responsible for managing contents of posts and replies before and after they are posted to the category where they are assigned as moderators.

Moderate forums

Moderators can manage all the forums inside their assigned category. If you are a moderator of any category, you can do the following actions:

- [Edit a forum](#)
- [Lock/Unlock a forum](#)
- [Close/Open a forum](#)
- [Move a forum](#)

Edit a forum

1. Go to the relevant forum.

2.

Click

on the **Action** bar, then click **Edit** from the drop-down menu.

3. Edit the forum properties.

4. Click **Save** to save all the changes.

Lock/Unlock a forum

Locking a forum will prevent all members from creating new topics and posting replies in this forum. All topics in a locked forum will be locked also, but their contents are still viewable. Moderators can only lock/unlock the forum that they manage.

1. Go to the forum.

2. Click

on the **Action** bar, then click **Lock/Unlock** from the drop-down menu.

Close/Open a forum

Closed forums are invisible to regular users. To administrators and moderators, the contents in a closed forum are still viewable, but creating topics and comments is disabled. Moderators can only close the forum that they are assigned to manage.

1. Go into the forum you want to close or open.

2.

Click

on the **Action** bar, then select **Close** or **Open** from the drop-down menu.

Move a forum

You can move a forum into another category as follows:

1. Go into the forum you want to move.

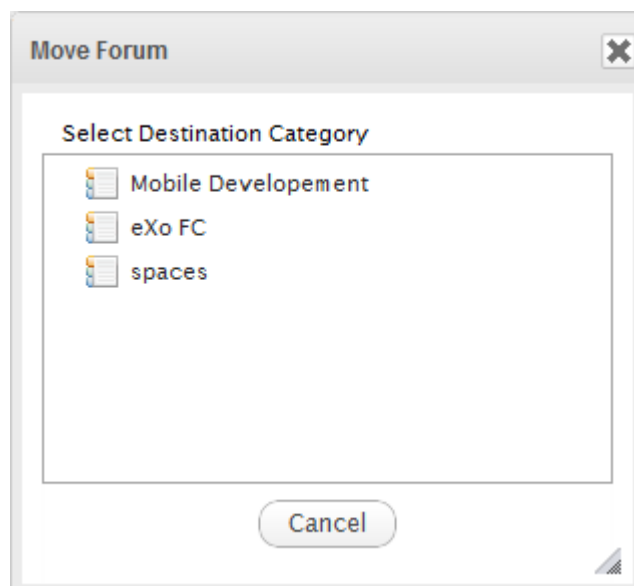

2.

Click

on the **Action** bar, then select **Move** from the drop-down menu.

A list of existing categories will appear. Select a destination category to which your selected forum will be moved.

Moderate topics

The followings are actions that a moderator can execute on topics:

- [Approve a topic](#)
- [Edit a topic](#)
- [Move a topic](#)
- [Delete a topic](#)
- [Close/Open a topic](#)
- [Lock/Unlock a topic](#)

- [Stick/Unstick a topic](#)
- [Merge topics](#)
- [Split a topic](#)

Approve a topic

Moderators can approve pending topics in forums that enable the '[Moderate Topic](#)' option. All new topics added to these forums will be pending for approval. It means that nobody can view these topics except administrators and moderators of the forums. Pending topics are only viewable when they are approved.

Search:

The administrator and moderator will know the total number of pending topics at the right corner of their **Forum Administration** bar and **User** bar:

View Topic

How i can change my avatar?

Posted: Fri, September 30, 2011, 09:28 AM

Hi guys, I want to change my avatar, please help!

Moderator can view the list of topics to be moderated. See [View all pending moderation tasks](#) for more details.

Approve topics

The first way

1. Select topics by checking their relevant checkboxes, then click

on the **Action** bar if you are in a list of topics.

- Or if you are in a topic, simply click

on the **Action** bar.

2. Click **Approve** from the drop-down menu.

The second way

1. Click

on the **Action** bar and click **Approve** from the drop-down menu. The **Waiting for Approval** form opens.

2. Select checkboxes corresponding to the posts you want to approve. You can preview the post when hovering your cursor over the post title.

Waiting for Approval

Type	Name	Created Date
	How i can change my avatar?	09/30/2011 09:28 AM
	Please help!!! <div>Hi guys, I want to change my avatar, please help!</div>	09/30/2011 09:19 AM

Close

3. Click **Approve** to accept your approval. Approved posts are shown normally for regular users to view and take some actions.

Edit a topic

1. Select a topic to edit by ticking its respective checkbox.

2. Click

on the **Action** bar.

3. Click **Edit** from the drop-down menu that appears.

4. Edit the topic as you wish. Leave the reason for the editing in the **Reason** field if needed.

Close/Open a topic

Only administrators and moderators can perform these actions. Closed topics will be invisible to regular users. Moderator can only close or open topics in the category that he manages.

1. When you are in a topics list, select a topic by checking its corresponding check-box, then click

on the **Action** bar.

When you are in a topic, click

on the **Action** bar.

2. Click **Close** or **Open** from the drop-down menu that appears.

The topic is automatically.

Move a topic

Only administrators and moderators can perform this action. This function is used to move topics from a forum to another one. Moderator can only move topics between forums that he manages.

1. Select a topic by checking its corresponding check-box,

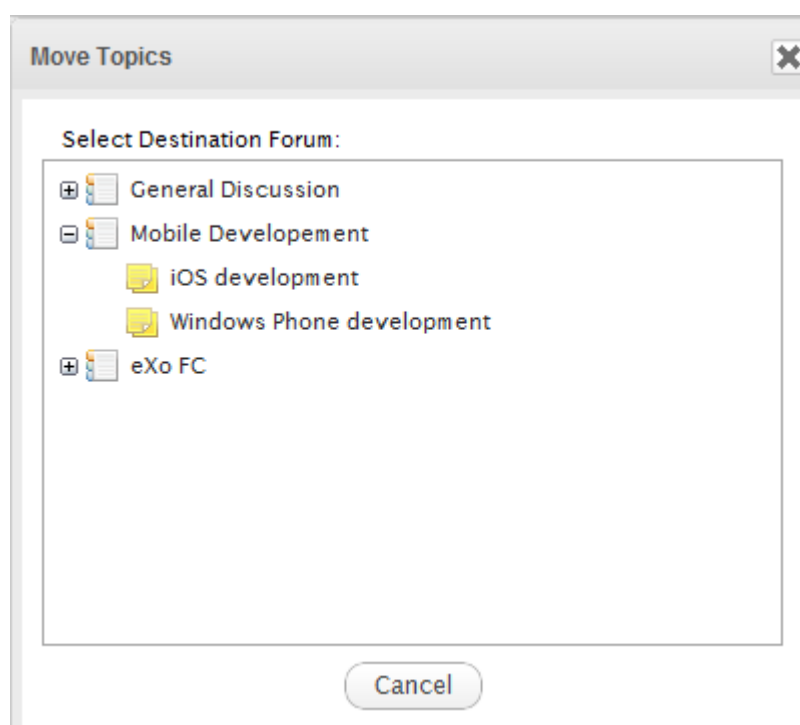

on the **Action** bar when you are in a topics list.

- Or, if you are in a topic, click

on the **Action** bar.

2. Click **Move** from the drop-down menu.
3. Click to select a destination forum to move.

Note

The moderator of a forum will be checked for permission. The moderator cannot move topics to:

Closed/locked forums that he does not manage.

Forums to which he does not have the right to add topics.

Forums which are in categories that he is restricted.

Therefore, only the forums which the moderator can move topics are shown in the list of destination forums.

Delete a topic

Delete a specific topic

1. Select topics by checking their corresponding checkboxes, then click

on the Action bar when you are in a topics list.

- Or, if you are already in a topic, click

on the **Action** bar.

2. Click **Delete** from the drop-down menu, then click **OK** in the confirmation message.

Delete topics of a specific user

1. Click the username of the poster or simply hover mouse over the poster's avatar.
2. Click **All Topics By [User name]**.

All topic posted by the selected user will be displayed.

Topics by User

Total pages: 2

<< < 1 2 > >>

		Topic	Rating	Last Posts	Replies	Views	Delete
		New SDK released	★★★★★	21 hours ago	0	2

Close

3. Click

corresponding to the desired topic, then click **OK** in the confirmation message.

Lock/Unlock a topic

This function is for administrators and moderators only to lock inappropriate topics. All posts in a clocked topic are still viewable, but posting reply will be disabled.

1. Select a topic by checking its corresponding checkbox, then click

on the **Action** bar when you are in a topics list.

Or, click

on the **Action** bar when you are in a topic.

2. Click **Lock** or **Unlock** from the drop-down menu that appears.

Stick/Unstick a topic

This function is for administrators and moderators only to stick topics which will be located at the top of the topics list. The topics will not fall down the list if any new posts are added.

1. Select a topic by ticking its corresponding checkbox, then click

on the **Action** bar when you are in a topics list.

Or, click

on the **Action** bar when you are already in a topic.

2. Click **Stick** or **Unstick** from the drop-down menu that appears.

You can see the stucked topic in the top of the topics list.

Topic in forum Android Development		Watch	Bookm
	Topic		
	Sticky: Android development forum rules - Read before posting! John Smith		
	ICS source code 's out Mary Williams		
	Chainfire 3D OpenGL Jack Miller		
	APK manager! Mary Williams		
	How to root Samsung Galaxy S i9000? John Smith		

When creating a new topic, you can also make this topic sticked by ticking the **Sticky** checkbox in the [Options tab](#).

Merge topics

When there are two or more related topics, you may want to merge these topics into one as follows.

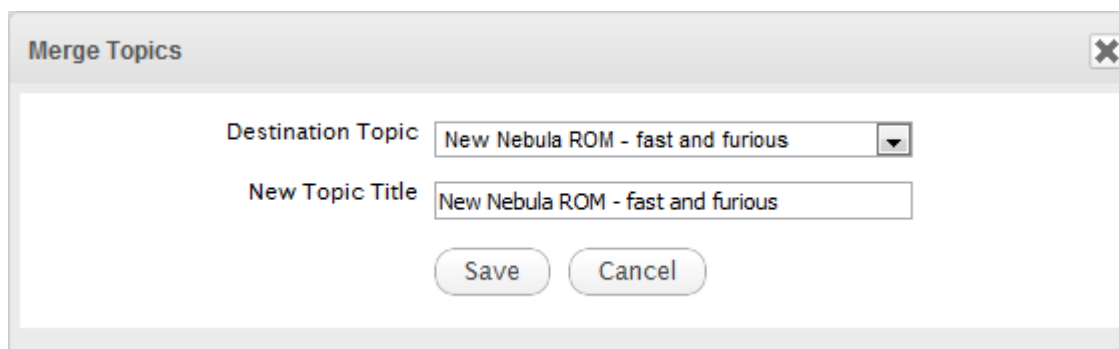

1. Go to the topics list.
2. Select more than two topics to be merged by checking their checkboxes.

3. Click

on the forum **Action** bar.

4. Click **Merge** from the drop-down menu that appears. The **Merge Topics** form opens.

A dialog box titled "Merge Topics" with a close button (X) in the top right corner. It contains two input fields: "Destination Topic" with a dropdown menu showing "New Nebula ROM - fast and furious" and "New Topic Title" with a text box containing "New Nebula ROM - fast and furious". At the bottom are "Save" and "Cancel" buttons.

Merge Topics

Destination Topic

New Topic Title

5. Select a destination topic which will be the main entry of the merged topic from the list of the existing topics. Give one name for the new topic in the **New Topic Title** field if you want.

6. Click **Save** to accept. After being merged, selected topics will be joined into one topic. All posts of the other topics are displayed as posts below the main entry.

Split a topic

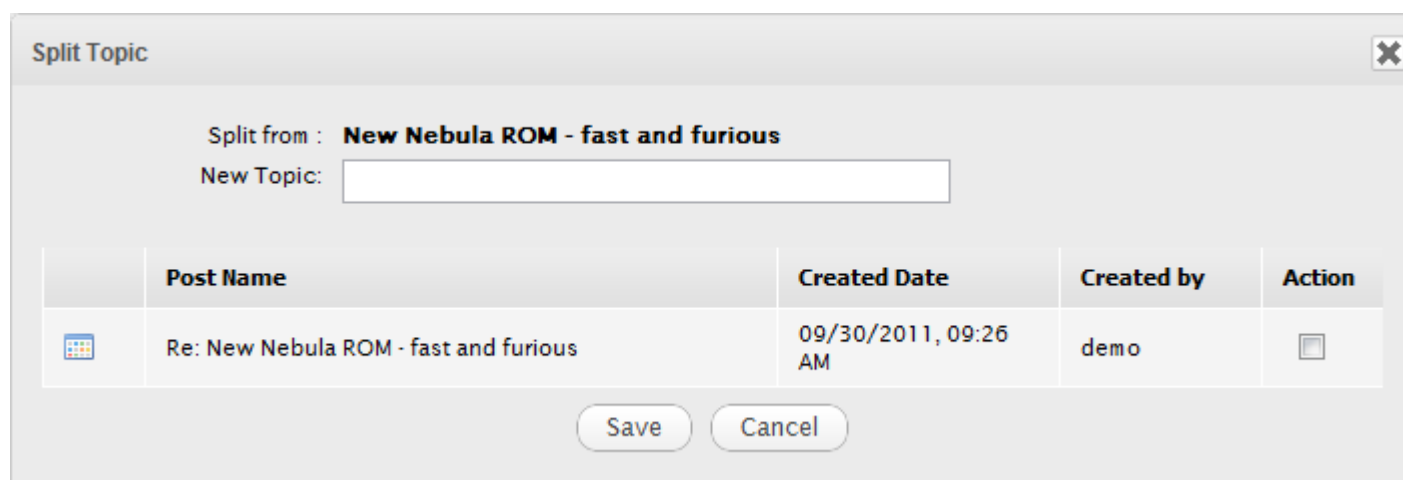

A topic with more than two posts can be split into separate topics.

1. Go into the topic you want to split.

2. Click

on the **Action** bar and select **Split** from the drop-down menu. The **Split Topic** form opens.

A dialog box titled "Split Topic" with a close button (X) in the top right corner. It contains a "Split from" label followed by the text "New Nebula ROM - fast and furious", and a "New Topic:" label followed by an empty text box. Below this is a table with 5 columns: Post Name, Created Date, Created by, and Action. The first row shows a post titled "Re: New Nebula ROM - fast and furious" created on "09/30/2011, 09:26 AM" by "demo". At the bottom are "Save" and "Cancel" buttons.

Split Topic

Split from : **New Nebula ROM - fast and furious**

New Topic:

	Post Name	Created Date	Created by	Action
	Re: New Nebula ROM - fast and furious	09/30/2011, 09:26 AM	demo	<input type="checkbox"/>

3. Enter the name for the new topic in the **New Topic** field.

4. Select posts by checking their respective checkboxes.

5. Click **Save** to complete.

The new topic will be displayed in the topics list with the new name. The last selected post will become the main entry of the new topic.

Moderate posts

As a moderator, you have some specific rights on a post. To moderate a post, you need to select that post first by checking its relevant checkbox.

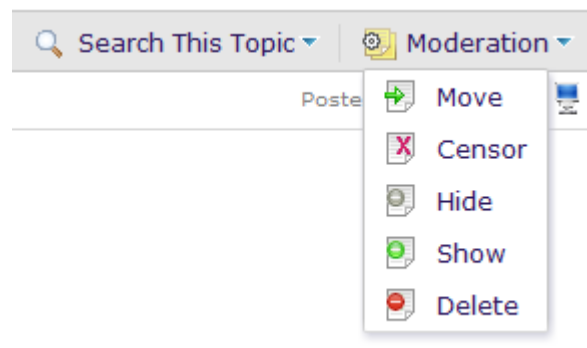

Next,

click

on the **Action** bar and select a desired action from the drop-down menu. All the moderation actions will be reached via this menu.

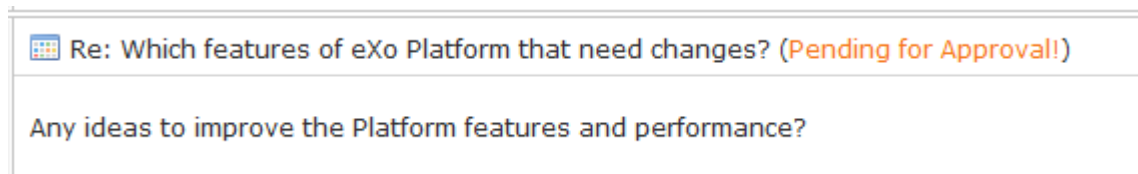

The followings are actions that a moderator can perform on a post:

- [Approve posts](#)
- [Move posts](#)
- [Delete posts](#)
- [Hide posts](#)
- [Show posts](#)
- [Uncensor posts](#)

Approve a post

All posts in a topic that requires *post moderation* will not be viewable before approval. This function is to approve posts which are pending for approval.

You can select to approve a single post or multiple posts at the same time. The moderator can view the list of tasks to be moderated. See [View all pending moderation tasks](#) for more details.

The first way

1. Select the posts to approve.

2.

Click

on the **Action** bar and select **Approve** from the drop-down menu.

The second way

1.

Click

on the **Action** bar and click **Approve** in the drop-down menu. The **Waiting for Approval** form opens.

2. Select checkboxes corresponding to the posts you want to approve. You will see the preview of the post when mouse over the post title.

3. Click **Approve** to accept your approval.

Approved posts are shown normally for regular users to view and take some actions.

Delete a post

The first way

1.

Click

on the **Action** bar and click **Show** in the drop-down menu.

2. Click **OK** in the confirmation message.

The second way

1.

Click

under the post you want to delete.

2. Click **OK** in the confirmation message.

Move a post

You can move posts to a topic of your choice.

1. Select the post that you would like to move.

2.

Click

on the **Action** bar and select **Move** from the drop-down menu.

3. Select a destination topic in the topics list that appears.

The moderator will be checked for moving permission. He can only move post inside the forum that he manages. Therefore, at the destination topics list, only the topics which the Moderator who have the move permission, are listed for moving.

Hide a post

When a post is hidden, only administrators and moderators can view and manage it.

To hide a post, select

on the **Action** bar and click **Hide** from the drop-down menu.

After being hidden, the hidden post is marked by 'Post Hidden!' label and regular users cannot view it.

Show a post

You can show a single or multiple hidden posts at the same time:

The first way

- Select the post to be unhidden and click

on the **Action** bar, then click **Show** in the drop-down menu.

The second way

- Follow this method to show multiple posts.

1.

Click

on the **Action** bar and click **Show** from the drop-down menu.

2. Select hidden posts by selecting its checkboxes.

3. Click **Show**.

Uncensor a post

The administrators and moderators can censor all topics, posts containing censored keywords. These censored keywords are [specified by Administrator](#). All topics and posts containing these keywords will be labeled with 'Pending and Censored' (for post).

The first way

- Follow this method to uncensor a specific post/topic.

1. Select hidden posts/topics by selecting its checkboxes.

2. Click the **Moderation** on the **Action** bar and select **Show** from the drop-down menu.

The second way

- Follow this method to uncensor posts/topics in the list of existing hidden posts/topics.

1. Click **Moderation** on the **Action** bar and select **Show** from the drop-down menu. A list of hidden posts appears.

2. Select hidden posts by selecting the respective checkboxes.
3. Click **Show**.

View all pending moderation tasks

Administrators and moderators can manage all pending tasks in **Forum** easily. The total number of pending topic/posts that need to be moderated are shown right on the **User** bar/**Forum Administration** bar.

Chapter 3. How To Use Forum?

This form lists all the pending topics, posts and the created dates. From here, you can approve or delete topics/posts.

Approve a pending topic/post

1. Click the topic/post title in the list.

2. Click the **Approve** button to accept approving topic/post.

Delete a pending topic/post

To delete pending topics/posts, simply click the **Delete This Topic/Delete This Post** button. The pending topic/post will be removed completely from the pending list and its forum.

Ban IPs

This function allows banning IPs that may be used by users who abuse the forum functions or violate the forum rules and policies.

This function is similar to the [Ban IPs tool used by administrators](#). However, the Ban IPs tool used by administrators can ban IP from the whole forum, while moderator can only ban IP in a specific forum only.

Ban IP on a specific forum

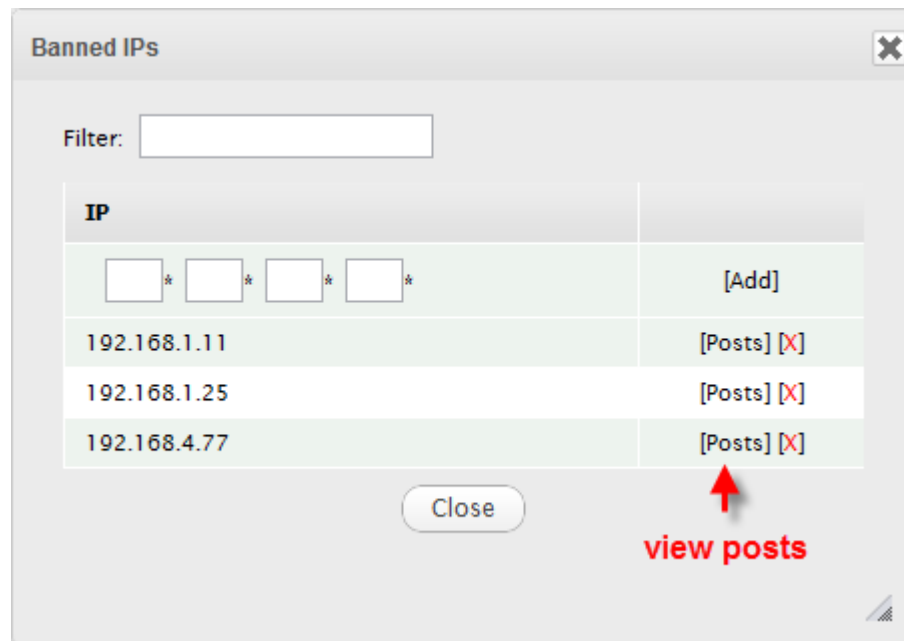

1. Go to the forum you want to ban IP.

- 2.

Click

on the **Action** bar and select **Banned IPs** from the drop-down menu. The **Banned IPs** form opens.

3. Do the *same actions* as the **Ban IPs** section of Administrators.

Administrator

With the highest rights, administrators are in charge of the entire management tasks, including *configuring and customizing the Forum portlet*, *backing up data*, *managing users and granting permissions*, *managing categories* and *forums*. Administrator has the global role.

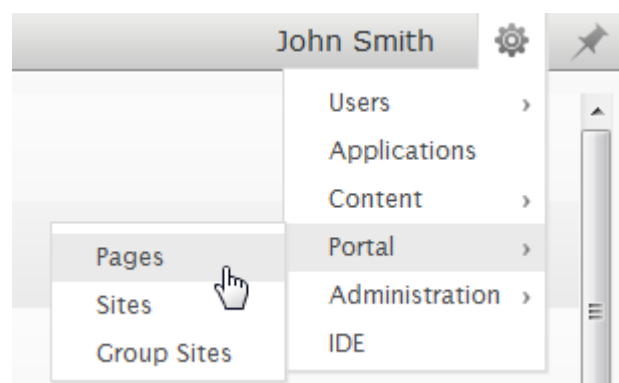

Set up the Forum portlet

After adding the application to your **Space**, you have to configure the portlet settings to make it work in your desired way.

1. Click

--> Portal --> Pages.

The **Page Manager** page will be displayed.

Site Name

Type

portal

Page Id	Title	Access Permission	Edit Permission	
portal::intranet::spaces	Spaces	[*/platform/users]	manager:/platform/administrators

Add New Page

2. Click that corresponds to the **Forum** page in the pages list.

3. Hover your cursor over the **Forum** portlet, then click  in the quick toolbar.

The settings form allows you to configure the **Forum** portlet in various aspects.

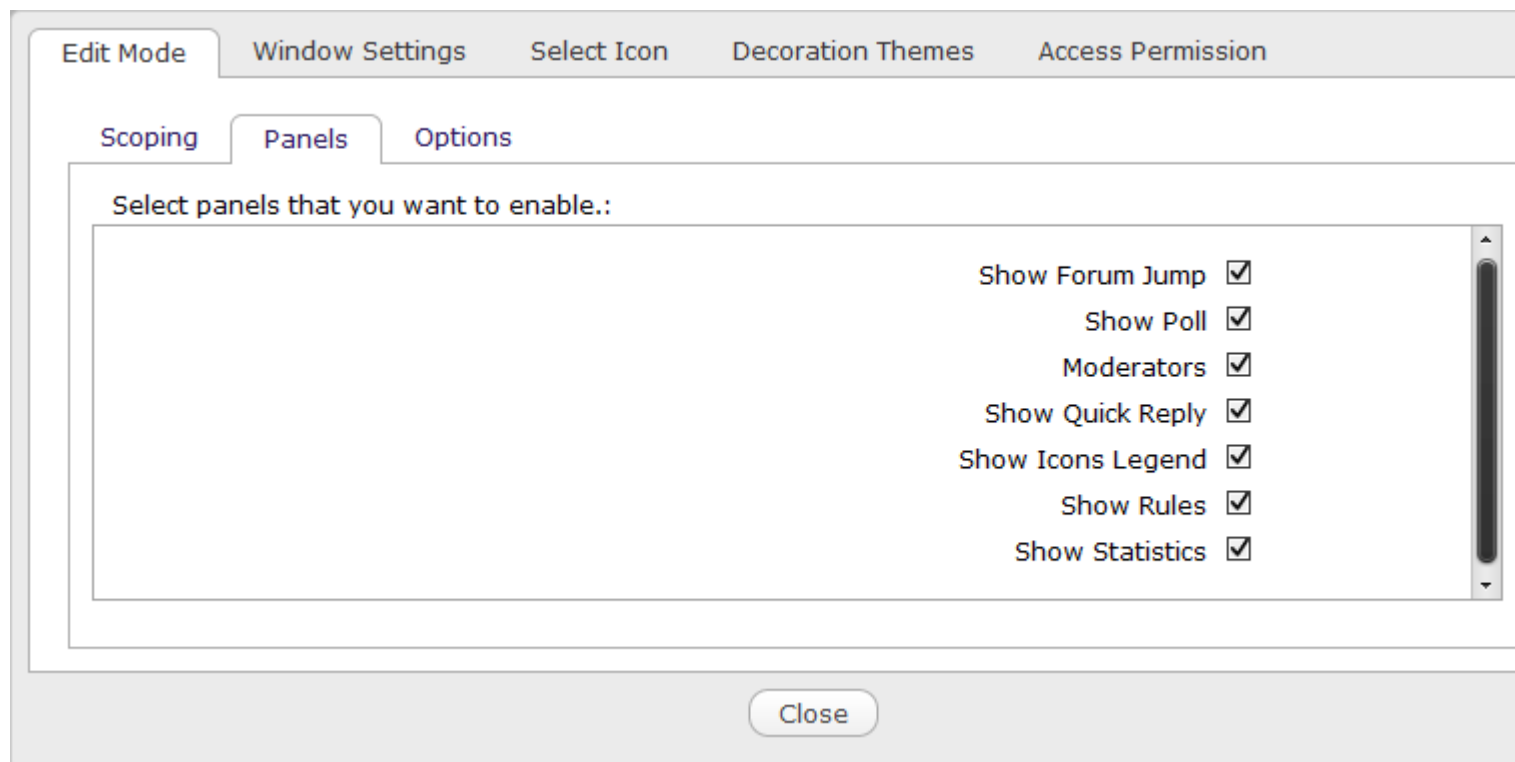

Specify the category scoping

In the **Scoping** tab, you can show/hide categories and forums in the **Forum** portlet by selecting or deselecting their respective checkboxes.

Enable/Disable Forum components

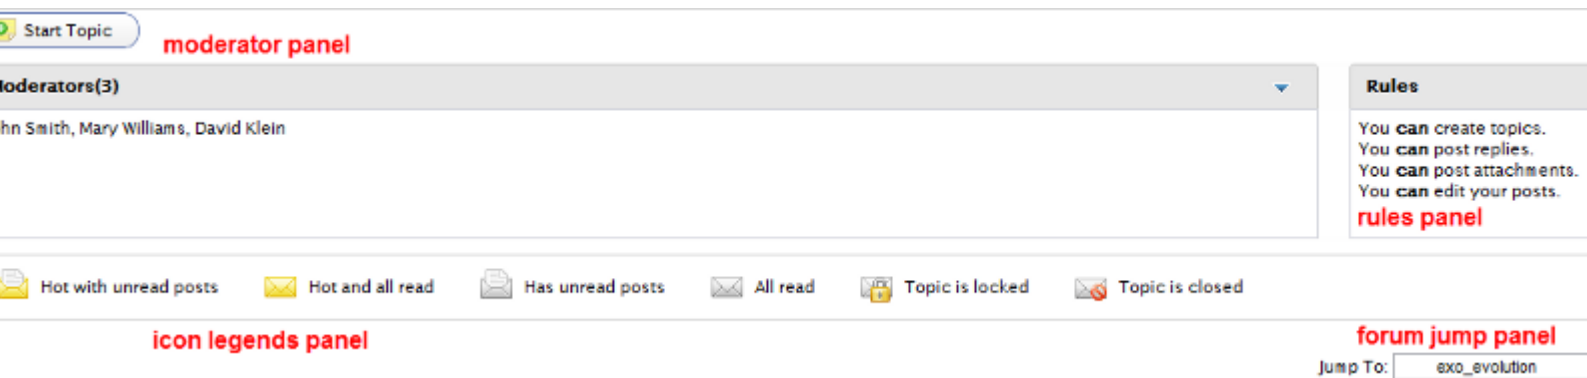

In the **Panels** tab, you can enable/disable some components in the Forum portlet.

Simply select/deselect checkboxes of the components that you want to enable or disable.

The following components can be enabled/disabled:

- Show Forum Jump
- Show *Poll*
- Moderators
- Show *Quick Reply*
- Show Icons Legend
- Show Rules
- Show Forum Statistics

Enable/Disable a bookmarkable Forum URL

Before doing this function, you first need to have a knowledge of Ajax. Ajax (Asynchronous JavaScript and XML) is used in the **Forum** application, aiming at updating a whole webpage or a part of the webpage.

Edit Mode
Window Settings
Select Icon
Decoration Themes
Access Permission

Scoping
Panels
Options

Options:

Use Ajax (not recommended for Search Engine indexing) ☒

Save

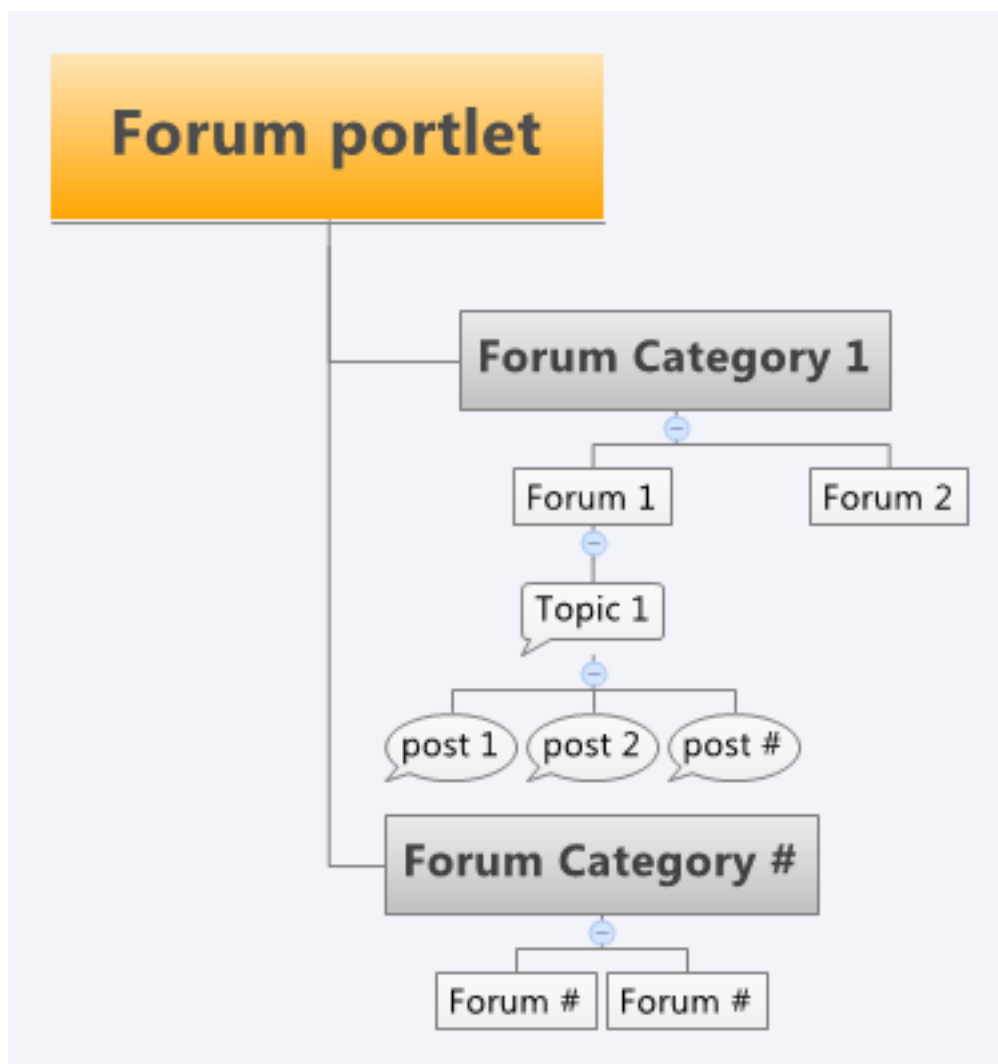

Close

This feature defines how the links are generated in the **Forum** portlet. You can select to use Ajax or not.

- By not using Ajax, the **Forum** will generate plain URLs in the links. The added benefit will be bookmarkability and better SEO as the links will be permalinks.
- Using Ajax, the links will be Javascript based and generate Ajax calls. This makes your browsing faster because the whole page is not reloaded.

Manage categories

Only administrators can do categories-related management tasks. To manage forums better, the administrators usually build a good forum structure using categories. So, a category is a set of forums containing all discussions about the same subject. See the following diagram to learn about one typical **Forum** structure.

Add a new category

Only when you are assigned as an **administrator**, you can do this function. Normally, one category is created as public and it allows everyone to access without any restrictions. Meanwhile, one *restricted category* only allows specific users/groups/memberships to access. Also, you can assign moderators to your category and specify a set of permissions for members in the category.

1.

Click

on the **Forum Administration** bar. The **Category** form will be displayed.

The screenshot shows a 'Category' dialog box with two tabs: 'Category' and 'Permissions'. The 'Category' tab is active. It contains the following fields:

- Title:** A text box containing 'Manager zone' with a required field asterisk (*).
- Order:** A numeric text box containing '0'.
- Restricted Audience:** A large text box that is currently empty. To its right are three user icons (a single person, a group of two, and a group of three).
- Description:** A text box containing 'For Forum Administrators and Moderators only'.

At the bottom of the dialog are 'Save' and 'Cancel' buttons.

2. Enter the category title into the **Title** field which is required. (Special characters are accepted).

In the **Category** tab, optionally you can also:

- Enter the order of category in the numeric format into the **Order** field.
- Give a brief description for your category into the **Description** field.
- Make the created category restricted by limiting the number of audiences via one of the following ways:

The first way

Enter names of users/groups/memberships that can access this category into the **Restricted Audience** textbox. The different values are separated by commas.

The second way

Use selectors next to the **Restricted audience** textbox.

- i. Click

to select a specific user from the groups list.

- ii. Click

to select all users with the specific membership in a group.

iii.

Click

to select a group of users.

Optionally, select the **Permissions** tab to specify the category permissions.

- Do the same ways as setting the "*Restricted audiences*" of a category.

3. Click **Save** to finish.

Edit a category

1. Select a category to edit from the **Forum** homepage, then click

on the **Action** bar when you are in the categories list.

2. Click **Edit** from the drop-down menu.
3. Make changes on the category properties.
4. Click **Save** to save your changes.

Delete a category

1. Select a category to delete from the **Forum** homepage, then click

on the **Action** bar.

- 2. Click **Delete** from the drop-down menu.
- 3. Click **OK** in the confirmation message.

Note

When a category is removed, all its forums are also removed.

Manage forums

Add a new forum

When creating a new forum, you can also configure the forum notification settings and specify the permissions for members in that forum.

Add a new forum to a specific category

- 1. Go into the category to which you want to add new forum.
- 2.

Click

on **Forum Administration** bar or click

on the **Action** bar and select **Add Forum**.

Add Forum

Edit

- 3. Enter the forum title which is required and description in the corresponding fields in the **Forum** form. The forum title must be less than 50 charaters.

The screenshot shows a 'Forum' dialog box with a close button in the top right corner. At the top, there is a label 'Add Forum to Category:' followed by a text field containing 'Mobile development' and a small square button. Below this is a tabbed interface with three tabs: 'Add Forum' (selected), 'Moderation Options', and 'Permissions'. The 'Add Forum' tab contains the following fields:

- Title:** A text field with 'Industry News' and an asterisk (*) indicating it is required.
- Order:** A text field with the value '0'.
- State:** A dropdown menu with 'Open' selected.
- Status:** A dropdown menu with 'Unlocked' selected.
- Description:** A large text area with a small 'ABC' icon and a checkmark in the bottom right corner.

At the bottom of the dialog box are two buttons: 'Save' and 'Cancel'.

4. Click **Save** to finish.

The administrators and moderators of a forum may want to get updated of what is new in forums under their management. This can be done when creating a new forum.

Configure the moderation settings

When creating a forum, you can set moderation-related options as follows:

1. Select the **Moderation Options** tab in the **Forum** form.
2. Do actions in the relevant fields.

	is selected, new topics will be pending for approval before being viewable.

Delete a forum

Only administrators can perform this action. When a forum is removed, all of its topics will then be deleted.

1. Go into the forum you want to remove.
2. Click

on the **Action** bar, then select **Delete** from the drop-down menu.

3. Click **OK** in the confirmation message to accept your deletion.

Manage users

To take this action, click

on the **Forum Administrator** bar. The **User Management** form will be displayed.

Administrative tasks

All of administrative tasks can be reached via the menu that appears after clicking

on the **Forum Administration** bar. You can select a desired action from the following drop-down menu.

In this section, you are going to learn how to perform all of these administrative tasks and customizations:

- [Set up Sort Settings](#)
- [Define censored keywords](#)
- [Customize email notification template](#)

- [Customize BBCode](#)
- [Customize the topic types](#)
- [Set up Auto-pruning](#)
- [Ban IPs](#)
- [Back up Category/Forum](#)

Set up Sort Settings

Click

on the **Forum Administration** bar and click **Sort Settings** from the drop-down menu. The **Sort Settings** form opens. Now, you can set properties for how forums and topics are sorted in **Forum**.

 A dialog box titled "Sort Settings" with a close button (X) in the top right corner. It contains four dropdown menus arranged in two pairs. The first pair is for "Sort Forums by" with "Name" selected, and "Direction" with "Ascending" selected. The second pair is for "Sort Topics by" with "Name" selected, and "Direction" with "Ascending" selected. At the bottom are two buttons: "Save" and "Close". A vertical scrollbar is on the right side.

- **Sort Forums by:** Sort forums by several criteria: name, order, lock status, creation date, modification date, topic count, and post count.
- **Direction:** Sort forums in the Ascending or Descending order.
- **Sort Topics by:** Sort topics by name, lock status, creation date, modification date, date of last post, post count, view count, attachments count.
- **Direction:** Sort topics in the Ascending or Descending order.

Define censored keywords

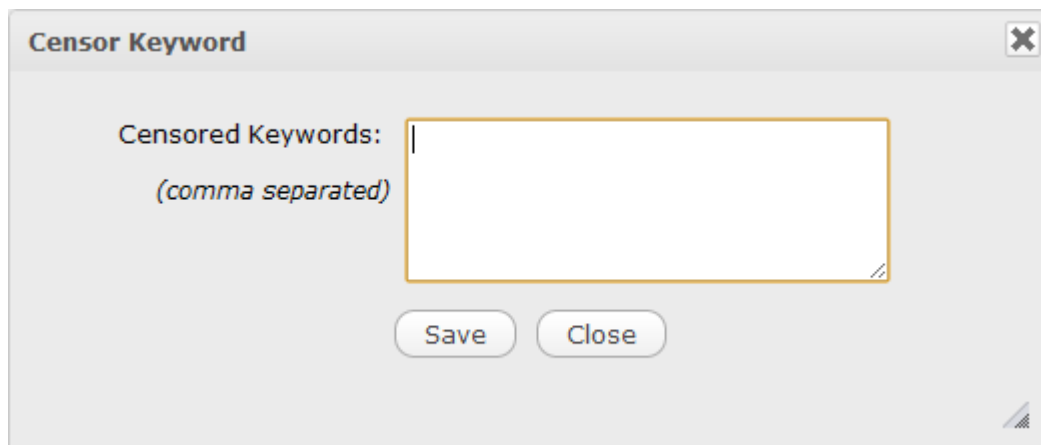

Censored keywords are those which are specified as inappropriate in the **Forum** application. If any topics or

Chapter 3. How To Use Forum?

posts contain censored keywords, they will be hidden until being verified by Administrators or Moderators. Click

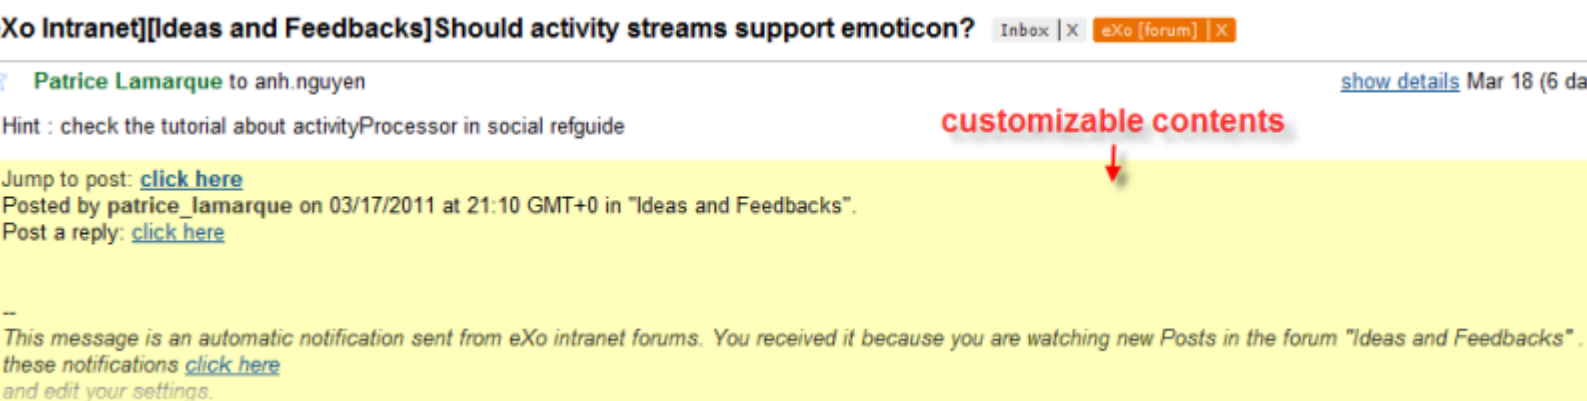

on the **Forum Administration** bar and click **Censor Keywords** from the drop-down menu. The **Censor Keyword** form will be displayed.

Enter censored keywords in the **Censored Keywords** field. Keywords are separated by commas.

Customize an email notification template

If there are new posts in the category or topic that a user has watched, the user will receive the email notification like this.

This section will describe how to create and edit the email templates that can be used to send notification emails to users.

Click

on the **Forum Administration** bar, and click **Notifications** from the drop-down menu to open the **Notifications** form.

Notifications

New Posts Notification **Moved Notification**

Add a prefix to notifications ☐

Notification Subject Template:

Content Notification

Hi,
 you receive this email because you registered for the Forum and Topic
 Watching notification.
 We would like to inform you that there is a new \$ADD_TYPE in the
 \$OBJECT_WATCH_TYPE \$OBJECT_NAME with the following content:
 \$POST_CONTENT
 At \$TIME on \$DATE, posted by \$POSTER .
 Go directly to the post: [Click here](#).
 Or go to reply to the post: [Click here](#).

Save Close

The **Notification** form consists of two tabs:

- **New Post Notification:** allow you to customize the template of the notification email when there is a new post/topic in categories/forums/topics that users are watching.
- **Moved Notification:** allow you customize the template of the notification email when a category/forum/topic/post that is being watching is moved to another location.

Details:

- **Notification Subject Template:** The template for the notification subject.
- **Add a prefix to notifications:** Tick the checkbox to add a prefix to the email notification.
- **Content Notification:** The template content of the notification email of new topics/posts that can be modified with the built-in Editor.

The followings are variables which can be used in the template:

The common variables for both tabs:

- **\$VIEWPOST_LINK**: Will be replaced by the public link referring to the new topic/post.
- **\$VIEWPOST_PRIVATE_LINK**: Will be replaced by the private link referring to the new topic/post.
- **\$REPLYPOST_LINK**: Will be replaced by the private link referring to the topic and a form to reply will be automatically opened.

The variables used in the New Post Notification tab:

- **\$OBJECT_WATCH_TYPE**: Will be replaced by the watched object type (category/forum/topic).
- **\$OBJECT_NAME**: Will be replaced by the name of the watched object (category/forum/topic).
- **\$ADD_TYPE**: Will be replaced by the newly added object type (topic/post).
- **\$ADD_NAME**: Will be replaced by the newly added object name (topic name/post name).
- **\$POSTER**: Will be replaced by the topic/post owner.
- **\$POST_CONTENT**: Will be replaced by the topic/post contents.
- **\$TIME**: Will be replaced by the time when the topic/post was added.
- **\$DATE**: Will be replaced by the date when the topic/post was added.
- **\$CATEGORY**: Will be replaced by the category name.
- **\$FORUM**: Will be replaced by the forum name.
- **\$TOPIC**: Will be replaced by the topic name.

The variables used in the Moved Notification tab:

- **\$OBJECT_PARENT_NAME**: Will be replaced by the forum name (if moving topics) or the topic name (if moving posts).
- **\$OBJECT_PARENT_TYPE**: Will be replaced by the type of the moved parent object, such as forum (if moving topics) or topic (if moving posts).
- **\$OBJECT_NAME**: Will be replaced by the name of the moved object (topic name/post name).
- **\$OBJECT_TYPE**: Will be replaced by the type of the moved object (topic/post).

These variables are used to load the content dynamically. Thus, you should not edit them. In case the template is changed unexpectedly, you can go back to the default template by clicking

You can use the text editor to format the template as you wish.

Customize a BBCode

By default, there are some default BBCode tags that are initialized via plugins: "[B]", "[I]", "[HIGHLIGHT]", "[IMG]", "[CSS]", "[URL]", "[GOTO]", "[QUOTE]", "[LEFT]", "[RIGHT]", "[CENTER]", "[JUSTIFY]", "[SIZE]", "[COLOR]", "[CSS]", "[EMAIL]", "[CODE]", "[LIST]", "[WIKI]", "[SLIDESHARE]".. You can add, edit or delete the BBCode tags.

Click

on the **Forum Administration** bar, and click **BBCode** from the drop-down menu to open the **BBCode Manager** form.

TAG	Description	Active	Edit/Delete
URL (Option)	The [url=option] tag allows link to other websites and files and usean optional parameter to 'name' of thislink.	<input checked="" type="checkbox"/>	
JUSTIFY	The [justify] tag allows alignment text to justify.	<input checked="" type="checkbox"/>	
B	Set text in bold	<input checked="" type="checkbox"/>	
HIGHLIGHT	The [highlight] tag allows you to make highlight of your text.	<input checked="" type="checkbox"/>	
I	Set text in italic	<input checked="" type="checkbox"/>	
U	Set text in underline	<input checked="" type="checkbox"/>	
RIGHT	The [right] tag allows alignment text to right.	<input checked="" type="checkbox"/>	
EMAIL (Option)	The [email=option] tag allows link to an email address and use an optional parameter to 'name' of this link.	<input checked="" type="checkbox"/>	

Here, you can do the following actions:

- [Add a new BBCode.](#)
- [Edit a BBCode.](#)
- [Delete a BBCode.](#)
- [Activate/Deactivate a BBCode.](#)

Add a new BBCode

1. In the **BBCode Manager** form, click **Add BBCode** to open the **Add BBCode** form.

2. Input values into the **Add BBCode** form.

Details:

Field	Description
Tag	This is the text for BBCode, which goes inside the square bracket.
Replacement	The HTML codes that replace the user-entered BBCode.
Description	The brief description about this BBCode tag.
Example	The sample of the BBCode in use.
Use {option}	Show that the new BBCode tag supports option or not.
Preview dialog	Preview the rendered BBCodes.
	Click this icon to see descriptions of each field.

3. Optionally, click **Preview** to preview your created BBCode tag.

4. Click **Save** to finish or **Reset** to clear all input fields.

Edit a BBCode

1.

Click

corresponding to the relevant BBCode tag in the **BBCode Manager** form.

2. Make changes to the BBCode tag.

3. Click **Preview** to preview the BBCode tag after being edited, or click **Save** to finish your changes.

Delete a BBCode

Simply

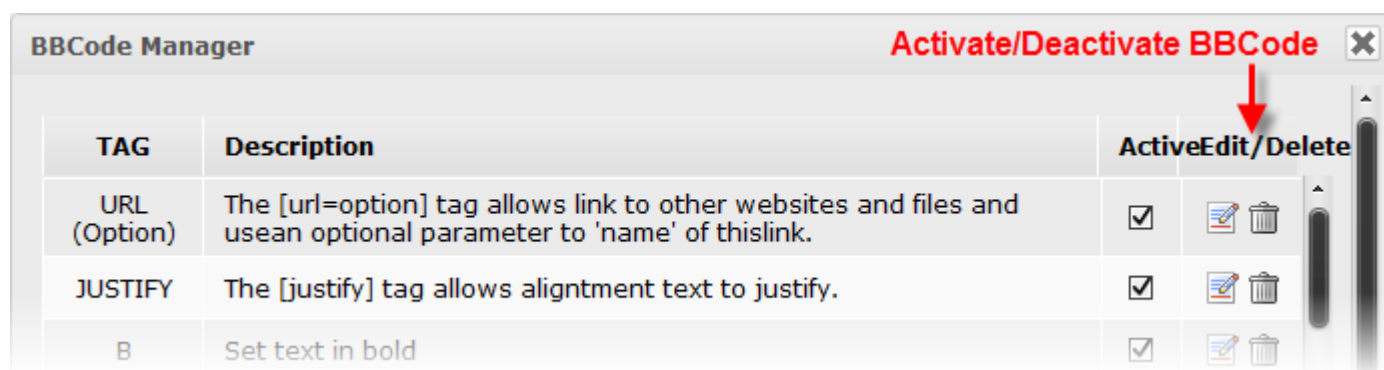

click

corresponding to the BBCode you want to delete in the **BBCode Manager** form and then select **OK** in the confirmation message to accept your deletion.

Activate/Deactivate a BBCode

Any BBCode can be activated/deactivated.

- To activate an existing BBCode tag, tick the relevant checkbox.
- To deactivate an existing BBCode tag, simply deselect the relevant checkbox. The entered BBCode will be displayed as the plain text.

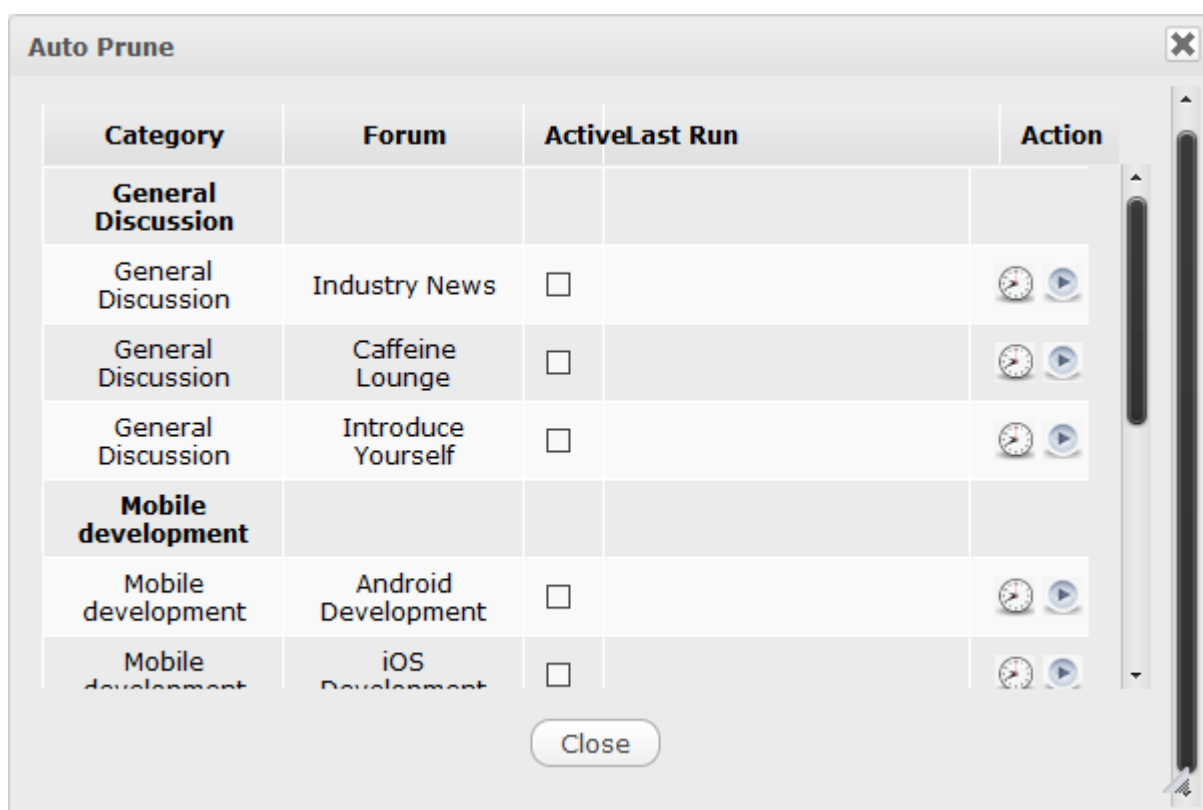

Set up auto-pruning

The pruning allows you to clean a large amount of obsolete and inactivate topics based on criteria.

1. Click

on the **Forum Administration** bar and click **Pruning** from the drop-down menu to open the **Auto Prune** form.

2.

Click

corresponding to the forum you want to set the prune settings.

3. Specify the criteria.

4.

Click

to check how many topics will be pruned.

5. Click **Save** to accept settings.

After setting the prune successfully, the auto-prune will be run automatically on the forum that has been set to check for the inactivate topics.

Create a topic type

The topic type is the visual indication for other users to know what is topic about at a glance. When creating new topic, users can select the topic type that they are going to start. The administrator can define these topic types.

	Topic	
	Sticky: Android development rules - Read before posting! David Klein	0

Preview and select an icon

Name of the selected icon: Bomb

Save Cancel

3. Click **Save** to accept adding your new topic type.

You will see the new topic type added.

- To edit the topic type, click

.

- To delete the topic type, click

.

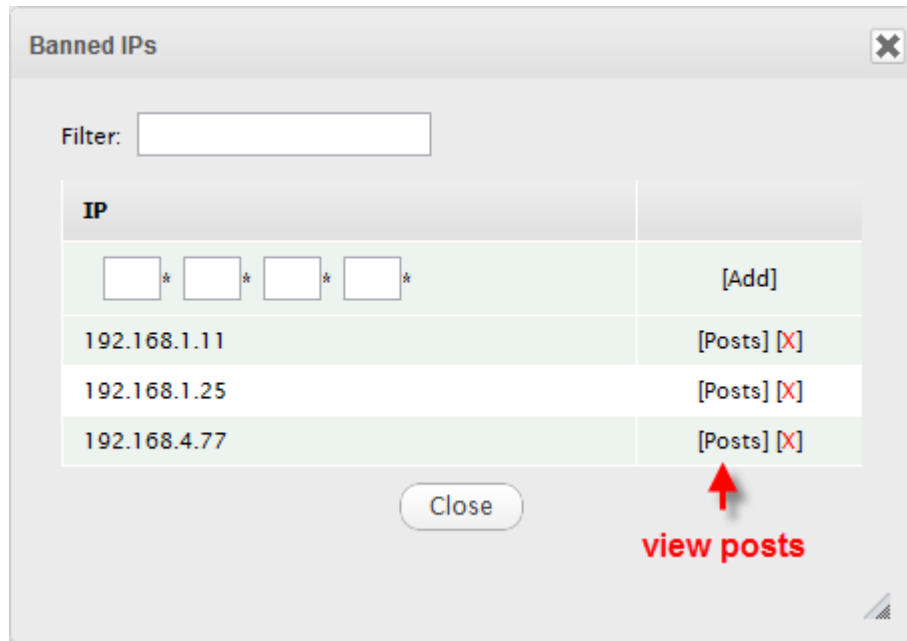

Ban IPs

Administrators can ban IP addresses used by users who abuse the forum functions or violate the forum rules and policies. All banned IPs cannot be used to add posts to all forums in the **Forum** application. Any user who uses banned IPs to add post, will be recognized as the banned user. As a result, the banned user can only view and is prevented from most of basic actions to the forum, such as adding topics, posting, or rating.

Click

on the **Forum Administration** bar, then click **Banned IPs** from the drop-down menu. The **Banned IPs** form opens.

- To ban an IP, simply enter the IP address into the IP textboxes and click **[Add]**. All banned IPs will be listed in the banned IPs table. You can view all posts which are posted from the specific banned IP or delete them from the banned IPs list.
- To view all posts submitted from a specific IPs, click the **[Posts]** link of the respective IPs. These posts can be viewed and deleted by the administrator.
- To remove banned IPs from the banned IP list, click the **[x]** icon of the respective IP.

Besides, you can also filter the banned IPs if there are so many banned IPs.

To filter banned IPs, enter a part of the IPs address into filter text box, all IPs matching with filter term will be displayed.

Back up a category & forum

The **Export** function is a best way to back up data in the **Forum** application. This function allows you to export categories and forums in the **Forum** application into the .zip or .xml file. When a category/forum is exported, all its forum, topics, posts and its properties are also exported. The exported file can be used to import into the **Forum** application.

Export a category

1.

Click

on the **Forum Administration** bar.

2. Click **Export** from the drop-down menu to open the **Export Categories** form.

4. Click **Save**.

Export a forum

This function is used to export forums and all topics inside the **Forum** application in the .xml or .zip format.

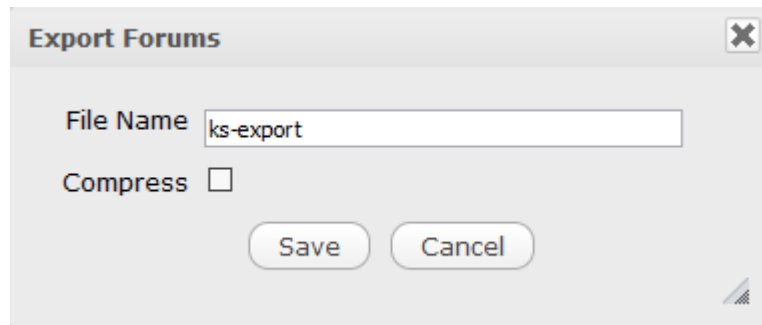

The first way

1. Go into a forum and click

on the **Action** bar.

2. Click **Export Forum** from the drop-down menu to open the **Export Forums** form.

A dialog box titled "Export Forums" with a close button (X) in the top right corner. It contains a "File Name" text input field with the value "ks-export". Below it is a "Compress" checkbox, which is currently unchecked. At the bottom are two buttons: "Save" and "Cancel".

3. Input the file name to export.
4. Tick the **Compress** checkbox to export the file into the .zip file or leave it blank to export into .xml file.
5. Click **Save** to get and store the exported file in your local device.

The second way

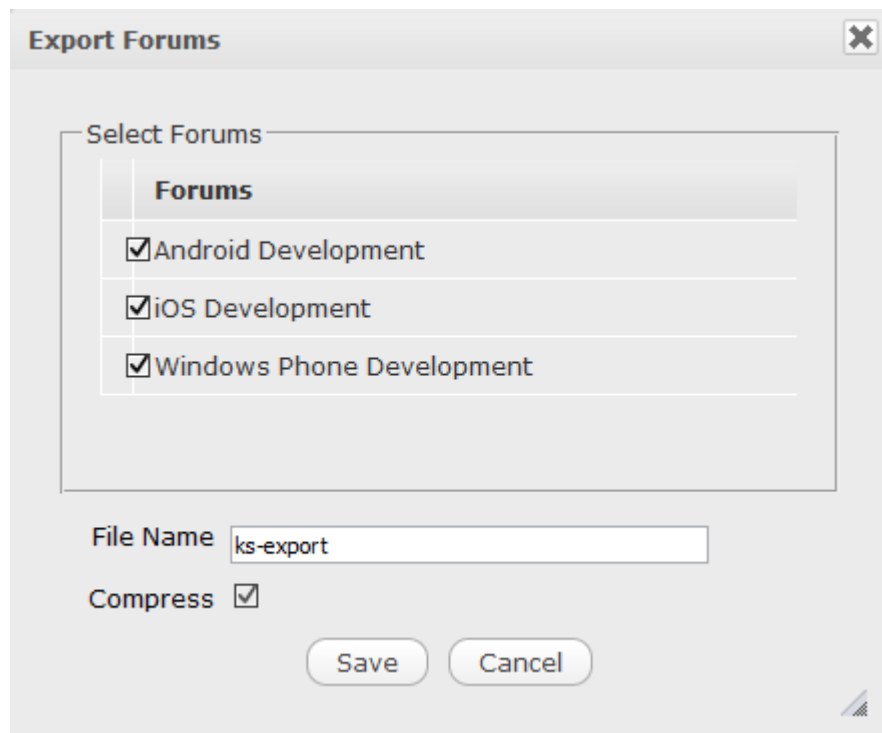

1. Go into a category containing the forum you want to export.

2.

Click

on the **Action** bar, then click **Export Forums** from the drop-down menu.

A dialog box titled "Export Forums" with a close button (X) in the top right corner. It features a "Select Forums" section containing a table with the following content:

Forums
<input checked="" type="checkbox"/> Android Development
<input checked="" type="checkbox"/> iOS Development
<input checked="" type="checkbox"/> Windows Phone Development

Below the table is a "File Name" text input field with the value "ks-export". Below that is a "Compress" checkbox, which is now checked. At the bottom are two buttons: "Save" and "Cancel".

3. Select a forum you want to export by ticking the relevant checkbox.

4. Select the **Compress** checkbox to export the file in the .zip format or leave it blank to export in the .xml format.

5. Click **Save** to get and store the exported file in your local device.

Import a category

1. Click

on the **Forum Administrator** bar, then click **Import** from the drop-down menu to open the **Import Category** form.

2. Browse the file to import.

3. Click **Save**.

Import a forum

1. Go into one category, then click

on the **Action** bar.

2. Click **Import Forum** from the drop-down menu.

3. Browse and upload the selected file in the **Import Forum** form.

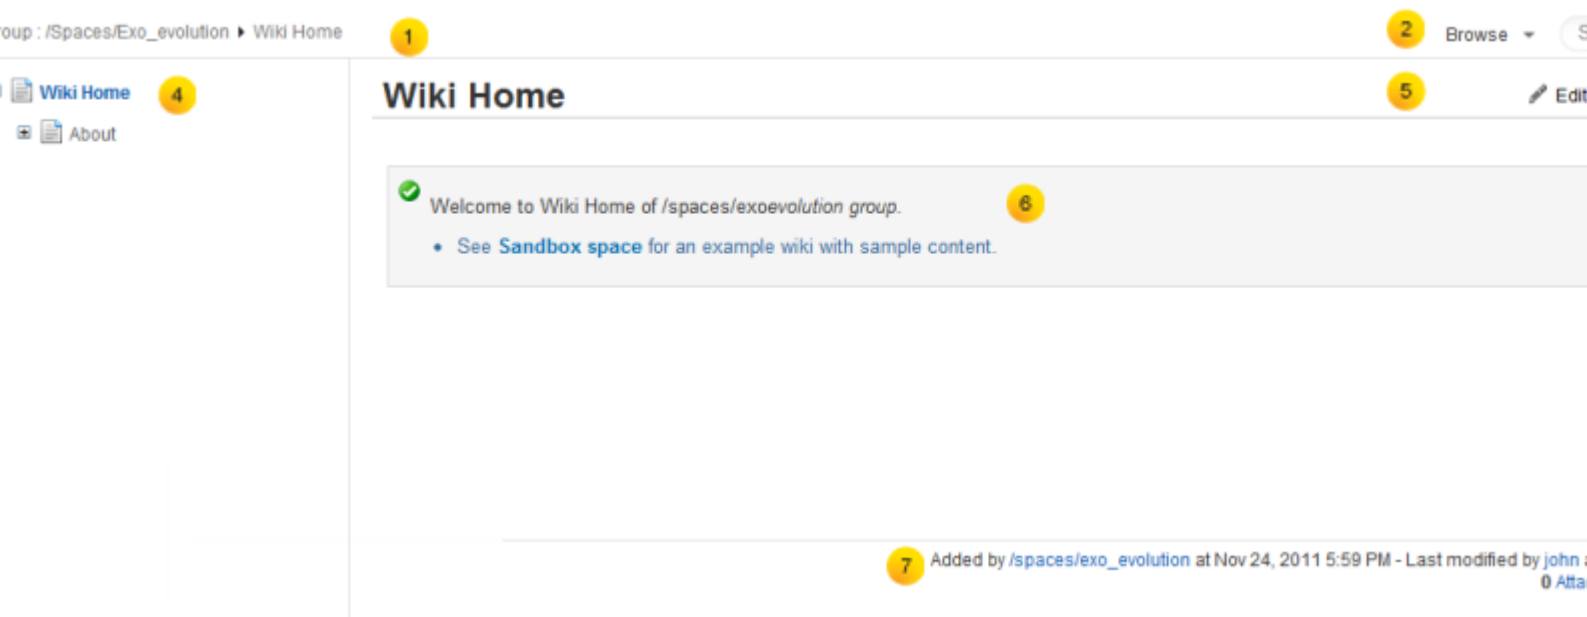

4. Click **Save** to accept importing.

After being imported successfully, the forum and topic data will be displayed properly in the **Forum** homepage.

How To Use Wiki?

Overview

This section provides you a guide to use all **Wiki** features and configure the **Wiki** portlet to make it work in your desired way. Before going further, you should know some basic concepts about **Wiki**. After *accessing the Wiki application*, the **Wiki** homepage will appear automatically as below.

Details:

Item	Description
1	The Breadcrumb which shows the page hierarchy.
2	The Wiki administration area which allows administrators only to do space settings.
3	The Search box.
4	The pages tree view.
5	The Page Control area which helps users take actions with the current page.
6	The default content. The small page could be a Wiki quick guide that explains how to create a page, switch between different edit modes, or create a page, and more.
7	The page information. Click View Change to go to the Page History page for

Item	Description
	comparing changes between versions. Click Attachment(s) and Revisions links to open the Attachments details pane and the Revisions pane respectively right under the Page information bar. These two panes can be collapsed by clicking the relevant links again.

The page hierarchy in Wiki

Wiki is organized as a tree of pages in which each page may contain many sub-pages. The hierarchy is reflected on UI by the **Breadcrumb** and the page tree at the left pane. When a page is added, it is always defined as a sub-page to the current one. **Wiki** is a wiki platform which can host several wikis. So, you can have wikis for portals, wikis for groups or users. However, the page hierarchy is not reflected in the URLs as they are flatly accessible by their URLs.

Wiki Spaces

Spaces represent a partitioning of **Wiki** data. A space is a set of pages. So, the space partitioning means they are independent trees. This separation is to enable **Wiki** to provide silos of knowledge for different interest groups.

There are 3 types of spaces:

- **Portal wiki**: wiki for the current portal.
- **Group wiki**: wiki available for members of a group.
- **User wiki**: wiki for personal pages.

Note

In this document, Spaces are referred as wikis, particularly portal wikis, group wikis, and user wikis.

Any space which has an implicit root page is named Wiki Home.

Work with Wiki pages

Pages are sites where information in **Wiki** is stored and shared. Pages are stored within a **Space**. To do or view actions on a specific **Wiki** page, you should contact the administrator to get the appropriate permissions. See the [Page Permissions](#) for detailed permissions.

In a page, you can:

- [Create a page with its content using the simple markup language or the Rich Text editor.](#)

- [Edit a page.](#)
- [Delete a page.](#)
- [Move a page to another location.](#)
- [Watch a page.](#)
- [View page information.](#)

Create a page

There are two ways to create a page:

The first way

In this way, you need to use the toolbar.

1. Go to a Wiki space in which you want to create a page.
2. Click **Add Page** and select **Blank Page** or **From Template...** from the drop-down menu if you want to use an available template.

If you select **From Template...**, a list of available templates appears.

Select Template

Template Title	Description	Action
Two-Column Layout	Global	Select Preview
Three-Column Layout	Global	Select Preview
Status Meeting	Global	Select Preview
HOW-TO Guide	Global	Select Preview
Leave Planning	Global	Select Preview

Chapter 4. How To Use Wiki?

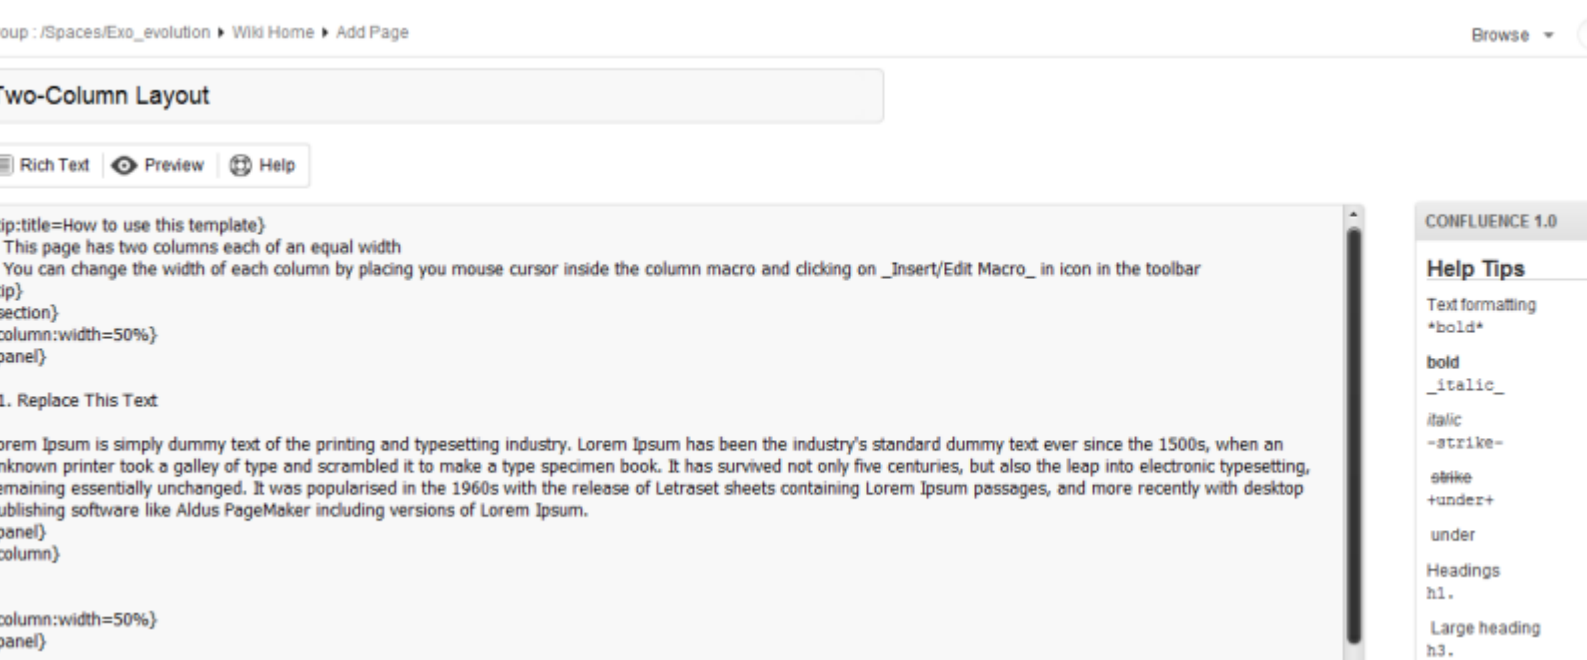

You can:

- i. Click **Preview** corresponding to the template you want to see. The template preview appears:

- ii. Click **Select** corresponding to the template you want to select for your new page.

The selected template appears:

- 3. Enter the title for your page. The page title must be unique.
- 4. Enter the content for your page by using **Wiki Markup** or the **Rich Text** editor.
- 5. Optionally, click **Preview** to see how your page looks like.
- 6. Click **Save** to finish.

The second way

In this way, you need to use the undefined link in a page.

In the **Wiki** application of eXo Platform, you can add a link pointing to a page which you are going to create later. Such links are called undefined links. These links are often used to remind other **Wiki** users to create the page.

Add an undefined link for creating a page later

1. Add a link by typing the page title between square brackets '[[...]]' or '[....]' (depending on your selected syntax) into your page body.

For example:

Syntax	What you type	What you get
Xwiki 2.0	[[eXo User Guide]]	eXo User Guide
Confluence 1.0	[eXo User Guide]	eXo User Guide

2. Click **Save** to save the page containing the link. The undefined link is colored in red with the underline.

3. Click the created red link to open the 'Add Page' form.

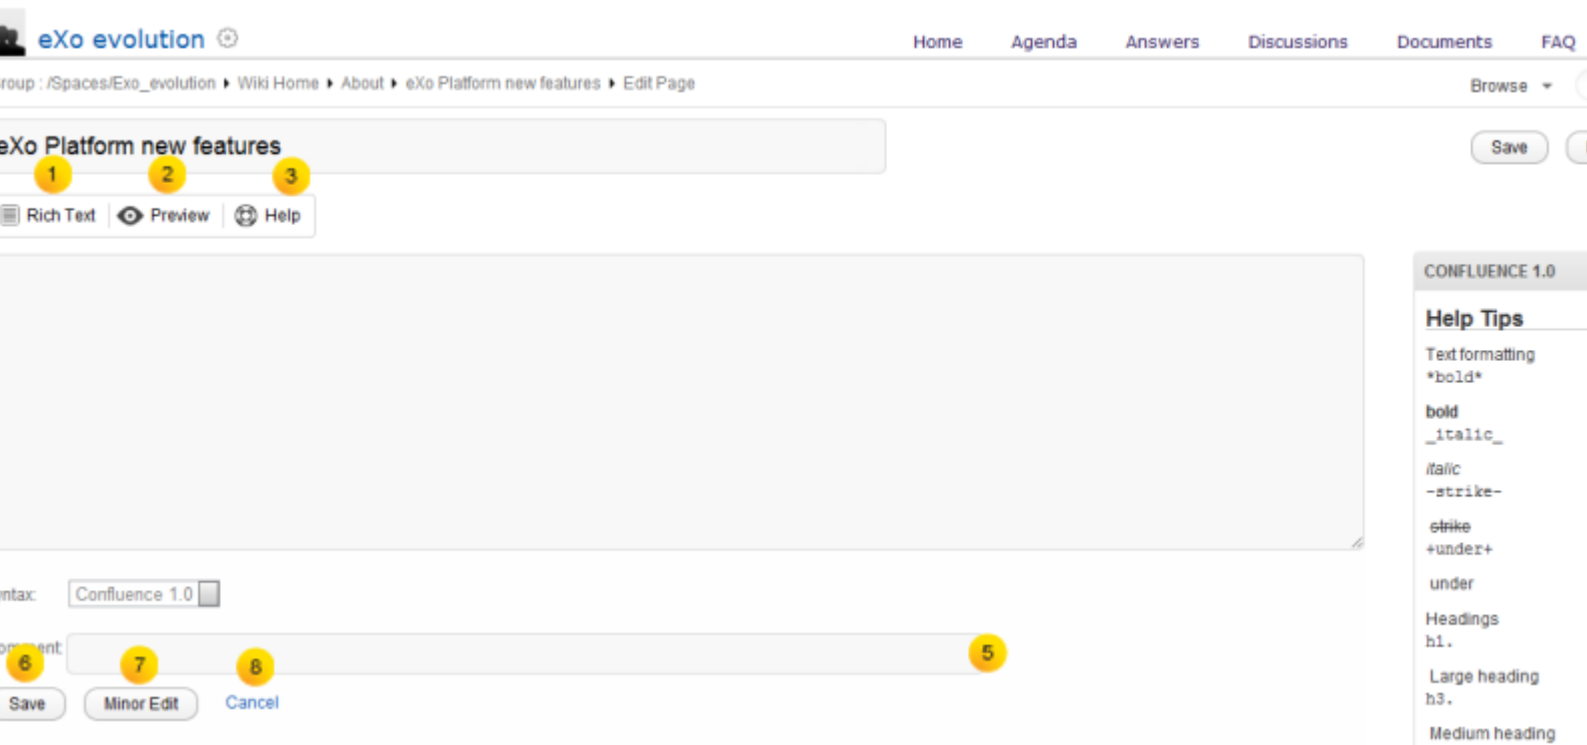

4. Follow the steps stated [above](#) to enter the page title, content, and save the page.

Edit a page

You can edit a page at any time provided that you have the edit permission on that page.

To edit a page, click **Edit** in the **Page Control** area. Your page will switch to the Edit mode.

Now, you can rename the page and edit the page content. The toolbar in the edit mode will be changed to activate the following actions.

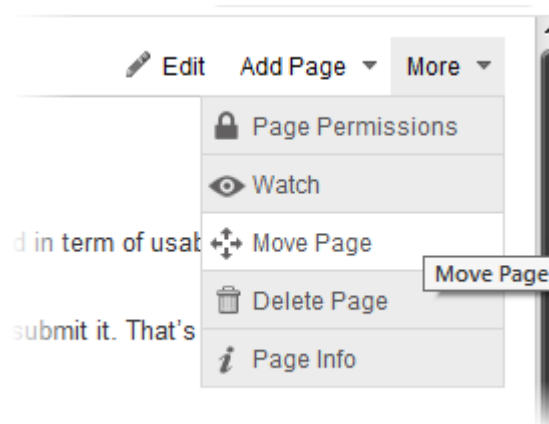

Details:

Item	Description
1	Switch to the Rich Text (WYSIWYG) editor.
2	Open the Wiki syntax help page.
3	Display the preview mode of the currently edited content. Previewing a page helps you verify the result of rendering the markup you just entered without saving.
4	Show more syntax help.
5	Input the edit reason if neccessary.
6	Save the current page and go back to the view mode.
7	Save the current page without sending notification to the watcher.
8	Discard the current changes and go back to the view mode.

Move a page to another location

1. Select the page that you want to move.

2. Click **More** in the **Page Control** area, then select **Move Page** from the drop-down menu.

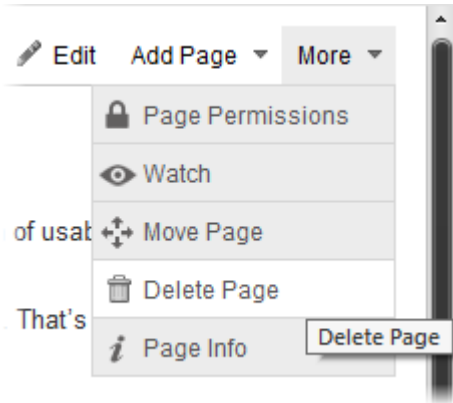

The form to select the destination page appears.

A screenshot of a dialog box titled 'UIWikiMovePageForm'. The dialog has a close button in the top right corner. The main text says 'You are about to move the page: eXo Platform new features'. Below this is a section titled 'Destination' containing a tree view of the Wiki structure. The tree shows 'Wiki Home' as the root, with 'About' as a sub-item. Under 'About', there are two items: 'eXo Platform new features' (which is selected) and 'Platform 3.5'. Below the tree, there are labels for 'Current Location' and 'New Location'. The 'Current Location' is shown as 'Group : /Spaces/Exo_evolution > Wiki Home > About > eXo Platform new features'. The 'New Location' is currently empty. At the bottom of the dialog are two buttons: 'Move' and 'Cancel'.

3. Select the destination page.
4. Click **Move** to commit.

Delete a page

1. Open the page you want to delete and select **More** in the **Page Control** area.

- 2. Click **Delete Page** from the drop-down menu.
- 3. Click **OK** in the confirmation message to accept your deletion.

View page information

Viewing page information is accessible to users who have the View permission on that page. The page information provides you all details about related pages of the current page, the hierarchy structure of the current page, the page history, and more.

- 1. Select the page you want to view the information.
- 2. Click **More** from the page toolbar, then select **Page Info** from the drop-down menu.

All information of the opening page, including page summary, related pages, page hierarchy, recent changes, will be displayed.

Add a related page

This feature allows you to add pages related to your page. This function is only activated to users with the Edit permission and can be done in the **Page Info** view.

1. Click **Add More Relations** in the *Page Info* view, then select the related pages in the **Select a page** window.
2. Click **Select** to add the selected page to the list of the **Related Pages**.

The related pages of the opening page are displayed in the side pane as below.

View a page history

To access the page history, just click **View Page History** in the *Page Info* view.

The **History Page** appears.

Details:

Area	Function
	<i>Compare selected page versions.</i>

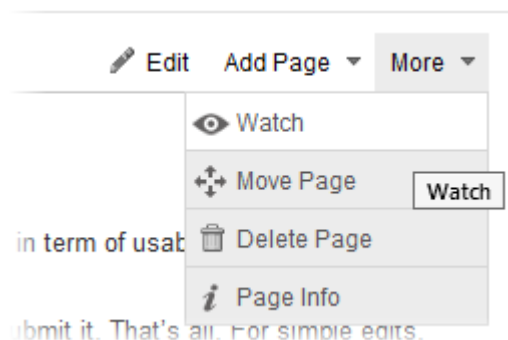

Area	Function
1	
2	Allow you to select two versions that you want to compare.
3	Allow you to specify the number of versions of the page and view a specific version .
4	The date and time when the page is changed.
5	The authors who make changes of the page.
6	The summary of reasons why the changes are done. It is optional.
7	Restore a page to the current version .

Watch a page

Watching a page allows you to receive a notification message about any additions in the page.

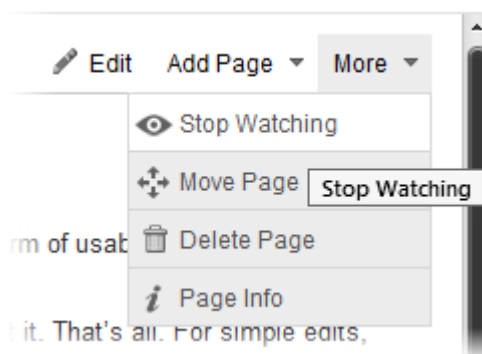

Watch a page

1. Open the page you want to watch.
2. Click **More** in the **Page Control** area, then select **Watch** from the drop-down menu.

Stop watching a page

1. Open the page which have been watched.
2. Click **More** in the **Page Control** area, then select **Stop Watching** from the drop-down menu.

Work with attachments

Attachments are any files enclosed with your pages. The attachments may be images, documents, presentation or multimedia files.

In this section, you will know how to:

- [View all attachments of a page.](#)
- [Add an attachment.](#)
- [Delete an attachment.](#)
- [Download an attachment.](#)

View all attachments of a page

1. Open the page you want to view attachments.
2. Click **Attachment(s)** link from the **Page info** at the bottom right corner of the opening page.

Added by [john](#) at Nov 24, 2011 6:10 PM - Last modified by [john](#) at Nov 24, 2011 6:22 PM ([View Change](#))
2 Attachment(s) - [5 Revisions](#)

Add an attachment to a page

There are two ways to add an attachment to a page:

The first way

In this way, you need to use the attachment pane at the bottom of the page.

1. Click the **Upload New File** field. The upload window will appear.
2. Select a file from your local device and click the **Open** button. The file will be uploaded automatically then.

The second way

In this way, you need to use the **WYSIWYG** editor (Rich Text editor).

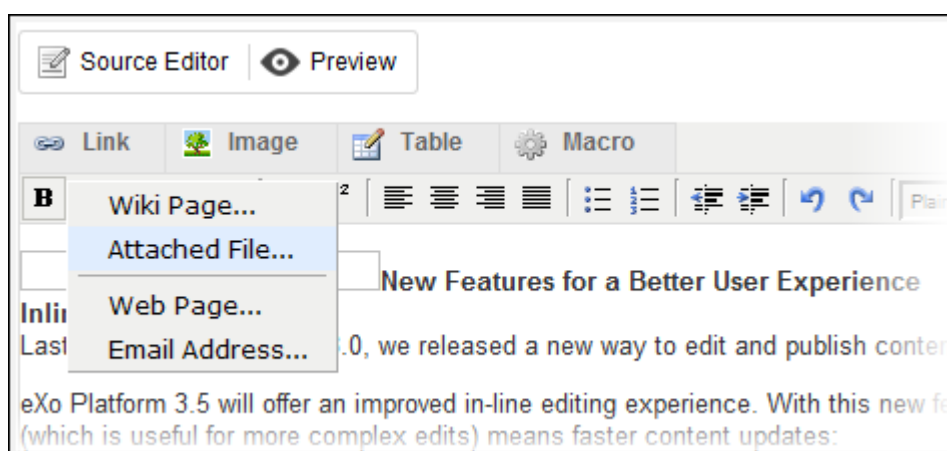

1. Select a page to which you want to add an attachment.
2. Select **Edit** at the **Page Control** area. For more details, see the [Edit a page](#) section.
3. Select the **Rich Text** editor on the page toolbar.

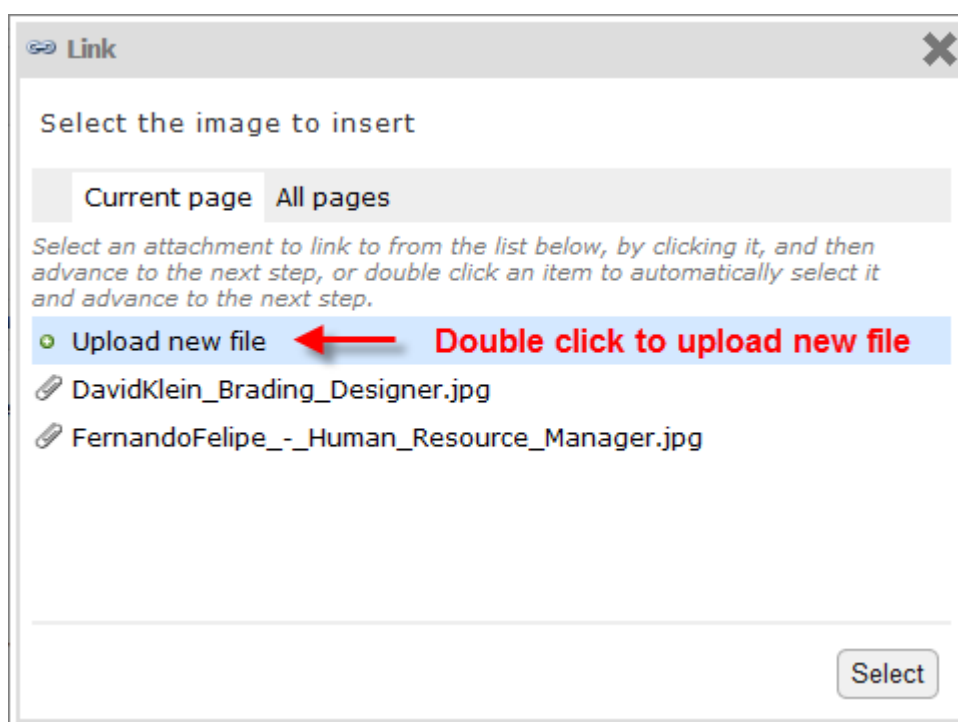

4. Click

on the toolbar of the **Rich Text** editor, then select **Attached File...** from the drop-down menu.

The **Link** form is displayed as below.

5. Select a file to upload by doing one of two following cases:

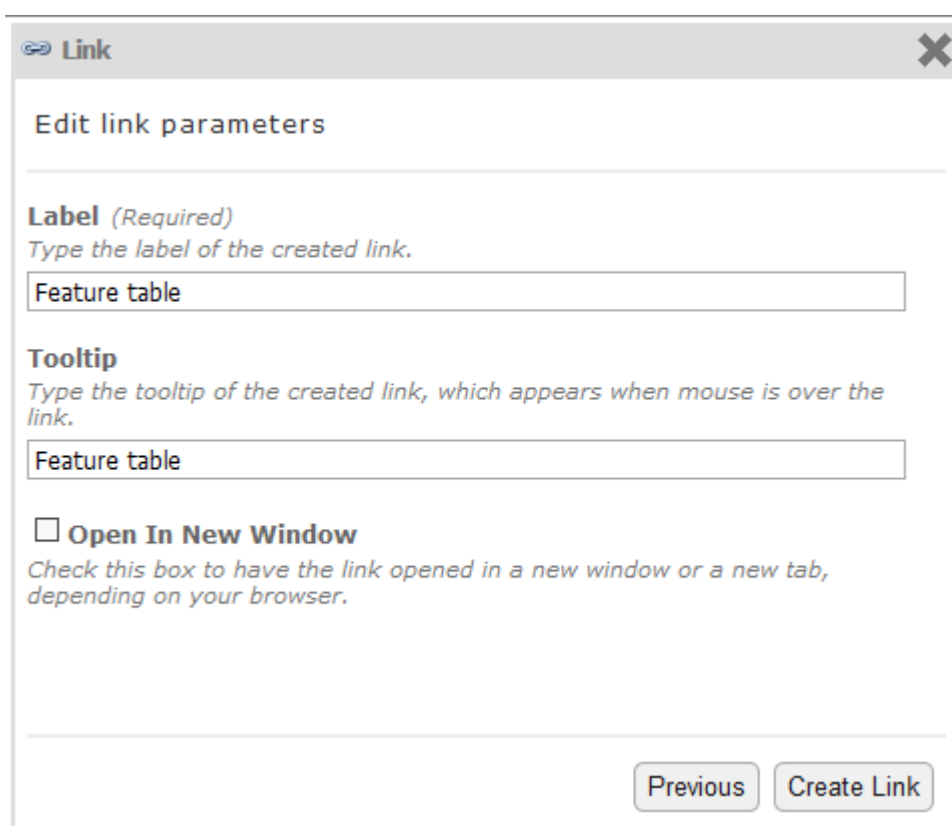

- **Upload a new file from your local device:**

- i. Double-click **Upload new file** or click **Upload new file --> Select** in the **Current page** or **All pages** tab.

- ii. Click **Browse** to select a file from your local device, then click **Upload**.

- **Select an existing file:** Double-click it or click it, then click **Select** in the **Current page** or **All pages** tab.

The form to edit the link parameters appears.

The screenshot shows a dialog box titled "Link" with a close button (X) in the top right corner. The main heading inside is "Edit link parameters". Below this, there are two text input fields. The first is labeled "Label (Required)" with a subtext "Type the label of the created link." and contains the text "Feature table". The second is labeled "Tooltip" with a subtext "Type the tooltip of the created link, which appears when mouse is over the link." and also contains the text "Feature table". Below these fields is a checkbox labeled "Open In New Window" with a subtext "Check this box to have the link opened in a new window or a new tab, depending on your browser." At the bottom right of the dialog are two buttons: "Previous" and "Create Link".

6. Edit the link parameters by typing the label and the tooltip for the link.

7. Click **Create Link** to commit.

The uploaded file will be in the undefined link format. By clicking this link, you can create a new page.

Note

If you click **Upload new file** in the **All pages** tab, it means that the attachment is added to all pages.

Delete an attachment

To delete an attachment, just click corresponding to the attachment.

Download an attachment

To download an attachment, just click the name of the attached file.

Link to an inserted image

1. Click

on the text editor, then click **Insert Image...**

2. Select an inserted image of the current page or click the **All Pages** tab to select an image attached to another page in the space.

3. Click **Insert Image**.

Use the WYSIWYG Editor

WYSIWYG stands for What You See Is What You Get. You can switch between the **Source** and **WYSIWYG** editors at any time by clicking

or

In the **Source** editor, which is selected by default when you edit a page, you have to use the wiki markup language for text formatting, while the **WYSIWYG** editor enables the contents to be appeared during editing that is very similar to the published result. Thanks to available tools on this editor, you can format your content visually without using **Wiki** markups.

Note

If the final result is not similar to what you wish when editing a page by the **WYSIWYG** editor, you can go back to the **Source** editor and use **Wiki** markups to edit the content.

To learn how to use the **WYSIWYG** editor, you can refer to these guides.

- [Admin guide](http://platform.xwiki.org/xwiki/bin/view/AdminGuide/WysiwygEditor) [http://platform.xwiki.org/xwiki/bin/view/AdminGuide/WysiwygEditor]
- [User guide](http://platform.xwiki.org/xwiki/bin/view/Features/WysiwygEditor) [http://platform.xwiki.org/xwiki/bin/view/Features/WysiwygEditor]

Syntax Help

If you do not know how to use a syntax, you can use the Syntax Help function. The **Syntax Help** is displayed by clicking

from the page toolbar. When being clicked, a lateral pane slides beside the editing area will show all the information of the most common syntaxes. The lateral pane can be hidden by clicking

in the upper right corner or by clicking

again.

You can click

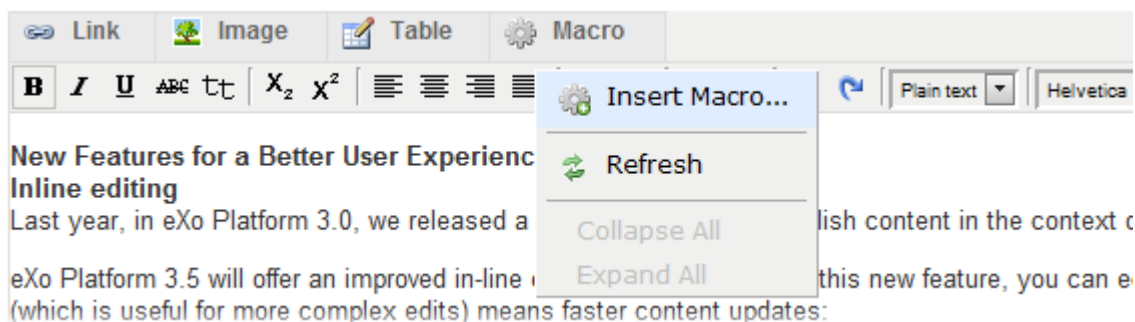

[More](#)

at the bottom of short **Help Tips** form to view the full help.

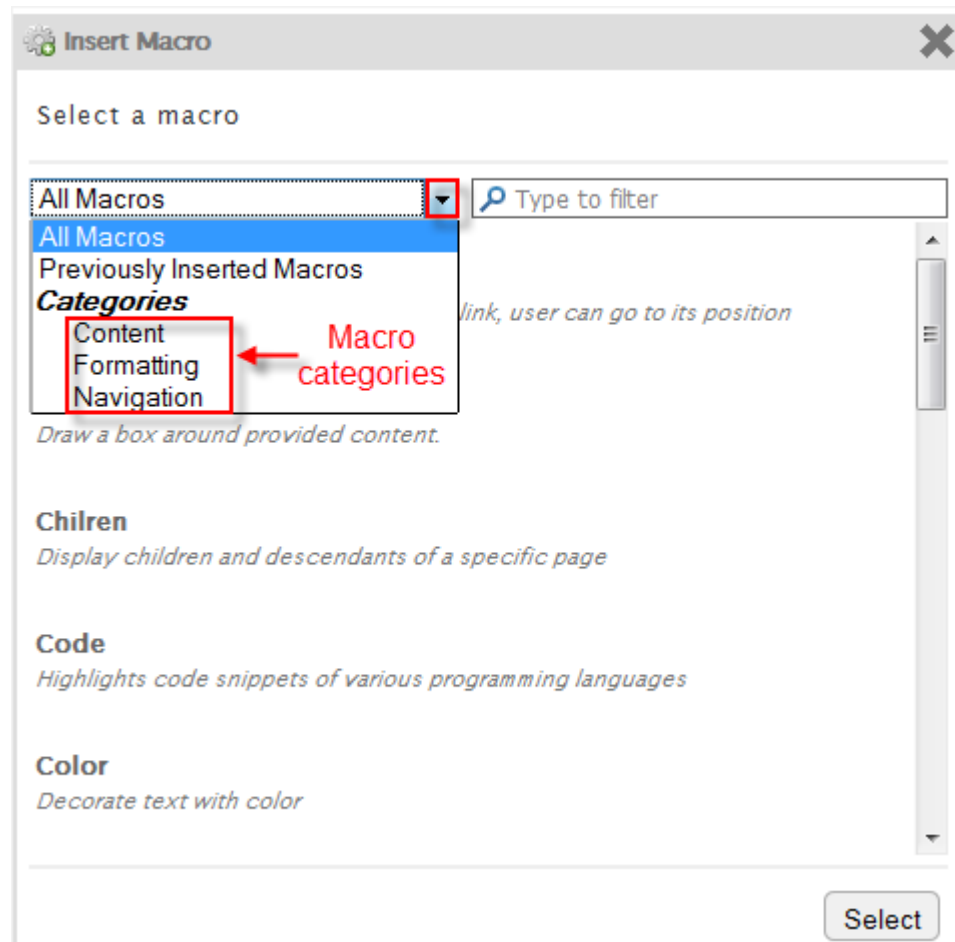

Work with Macros

Using a macro, you can apply extra formatting, functionality and customization to your content. You can easily add macro tags by using the **Rich Text** editor.

1. Click **Rich Text** to open the rich text editor.
2. Click **Macros**, then select **Insert Macros...** from the drop-down menu.

The **Insert Macros** form appears.

The macros are classified into different categories: **Content**, **Formatting**, **Navigation**.

3. Select a macro category.

4. Select your desired macro from the selected categories list and then click the **Select** button; or double-click it. For example, if you select the **Box** macro, you are redirected to the Macro Parameters form.

 Insert Macro ✕

Macro: Box

Draw a box around provided content.

CssClass

A CSS class to add to the box element

Image

The reference to the image to display in the message box

Title

The title which is to be displayed in the message box

Width

An optional width for the box, expressed in px or %

Previous

Insert Macro

5. Enter parameters into the corresponding fields for your selected macro. Click **Insert Macro** to perform your macro insertion; Or, click **Previous** to return to initial **Insert Macro** form.

The following table describes specific functions of common macros.

Macro	Function
Excerpt	Create additional information for the current page and it can be set to "hidden" in the current page, but displayed to add more information as the summary about the page when it is used with the Page Tree macro.
Include Page	Include the content of another page in the current page.
Box	Draw a box around the provided content.
Color	Change the text color.

Decorate text with color

Macro	Function
Code	Highlight code snippets of various programming languages. <pre> public interface OrganizationService { /** * This method return an UserHandler object * the user * opeation such create, update , detele , fi * * @see UserHandler */ public UserHandler getUserHandler(); } </pre>
Error Message	Display an error message note.
Float	Allow a content to 'float' on the left or the right. <div>Allow content to 'float' to the le</div>
Info Message	Display an info message. <div>Displays an info message note.</div>
NoFormat	Keep the content displayed when you type. <pre> h3. Goals * Respond to market pressure on * Give content control to porta * deploys _Wiki_ portlet </pre>
Note Message	Display a note message. <div>Displays a note message.</div>
Panel	Embrace a block of text within a fully customizable panel. <div> Panel header The content to put in the panel </div>

Macro	Function
Table	Inset a table.
Table cell	Insert a table cell.
Table row	Insert a table row.
Tip Message	Display a tip message block.
Warning Message	Display a warning message block.
Anchor	Create an anchor for the selected contents.
Children	Display the children and descendants of a specific page in the current page.
Page Tree	Display the hierarchy of a page in the current page.
Related Pages	Render the related pages of the current page.
Table of Content	Generate a table of content for the current page.

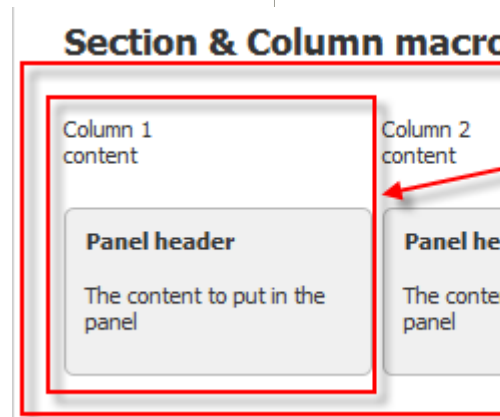

✔ Displays a tip message.

! Displays a warning message note.

Work with page versions

When editing the content of a page, **Wiki** will automatically create a version of that page after it is saved. Thanks to the page versions, you can make changes to the page safely and rollback to an earlier version without worrying about messing things up.

In the [Page History](#) view, you can see all versions of a page.

Each version includes the following information:

- Revision numbers.
- Author making changes.
- Date and time when changes are made.
- Summary (if any).

In the Page History page, you can:

- [View versions of a page.](#)
- [Compare page versions.](#)
- [Restore a page version to the current version.](#)

Note

All functions, including viewing, comparing and restoring, can also be done by clicking the **Revisions** link at the **Page Info** bar. One pop-up pane appears right under this bar, allowing you to do the same steps as described below.

View versions of a page

To view a specific version of a page, just click a version number in the **Page History** page. The selected version of that page will be displayed.

At a version of the page, you can do the following actions:

Item	Description
1	Compare the current version with the selected one.
2	Replace the current version with the selected version.
3	Go to the Page History page.
Prev	View content of the previous version.
Next	View content of the next version.

Compare page versions

Wiki tracks histories of changes to pages by maintaining a version of the page each time it is modified. To compare two versions, select two checkboxes corresponding to each relevant version, then click

Page History

	Revision	Date	Author	Summary
<input type="checkbox"/>	CURRENT (v. 7)	Nov 24, 2011 6:33 PM	john	
<input checked="" type="checkbox"/>	v. 6	Nov 24, 2011 6:33 PM	john	
<input checked="" type="checkbox"/>	v. 5	Nov 24, 2011 6:22 PM	john

David Klein Brading Designer.jpg!New*New Features for a Better User Experience*
in-line editing*
last year, in eXo Platform 3.0, we released a new way to edit and publish content in the context of a website. This was a major step forward in term of usability but also a great product reliability.

Exo Platform 3.5 will offer an improved in-line editing experience. With this new feature, you can edit a specific individual content item then submit it. That's all. For simple edits in-line editing is the best direction to the Content Editor (which is useful for more complex edits) means faster content updates:

http://paillereau.com/blog/wp-content/uploads/2011/10/blog1.png!\\

Double-click on the text you wish to change; edit, save and you're done.

What would be the advantage of in-line editing if you still needed to go to the Content Editor to push your changes live? We therefore added a new action to allow content publication in-line. It's fully dynamic and relies on the existing content publication workflow. Only users with publisher rights will see the publish button while making in-line edits to content:

http://paillereau.com/blog/wp-content/uploads/2011/10/blog2.png!\\

The changes between two versions will be marked with colors:

- Words/lines which are red-highlighted with strike-throughs indicate that they were removed.
- Words/lines highlighted in green indicate that they were added.

Note

Only two revisions can be selected at one time.

Restore a page version to the current version

When you notice that there are changes in the current page version that you are not satisfied, you can rollback to an older version of that page quickly.

To restore an older version, click

Restore

corresponding to your desired version in the **Page History** page.

Note

Restoring an older version will create a copy of that version. For example, if the [current version (v.15)] is restored to the [older version (v.10)], **Wiki** will create a new version (v.16) containing contents of v.10. The version v.16 will become the current version.

Work with Spaces

Wiki provides permanent bookmarkable URLs to all wiki pages. **Wiki** will resolve wiki pages by inspecting the URL used to call it and outputting links as clean URLs in the following form:

```
http://hostname/$CONTAINER/$SITE/$NAV_URI[$OWNER_TYPE/$OWNER]/  
$WIKI_PAGE_URI
```

Item	Description
\$CONTAINER\$	The portal container.
\$SITE	The portal site (e.g,'classic').
\$NAV_URI	The URI of navigation bound to a page containing the Wiki portlet.
\$OWNER_TYPE	May be 'group' or 'user'.
\$OWNER	The wiki owner which can be name of user or of group.
\$WIKI_PAGE_URI	The URI inferred automatically from the wiki page name.

Any wiki page should be accessed by a friendly URL, for example:

- Portal wiki URL: http://hostname/portal/classic/*wiki/eXo+Wiki+Specification.
- Group wiki URL: http://hostname/portal/classic/*wiki/group/platform/Administrators/Admin+Guide.
- Personal wiki page URL: http://hostname/portal/classic/*wiki/user/john/Sandbox.

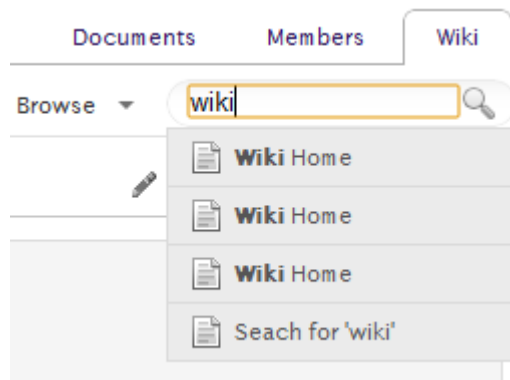

Search

In **Wiki**, you can search spaces, or pages in a space and attached files. There are two types of search in **Wiki**:

- [Quick Search](#)
- [Advanced Search](#)

Quick Search

1. Enter a key word in the search box.

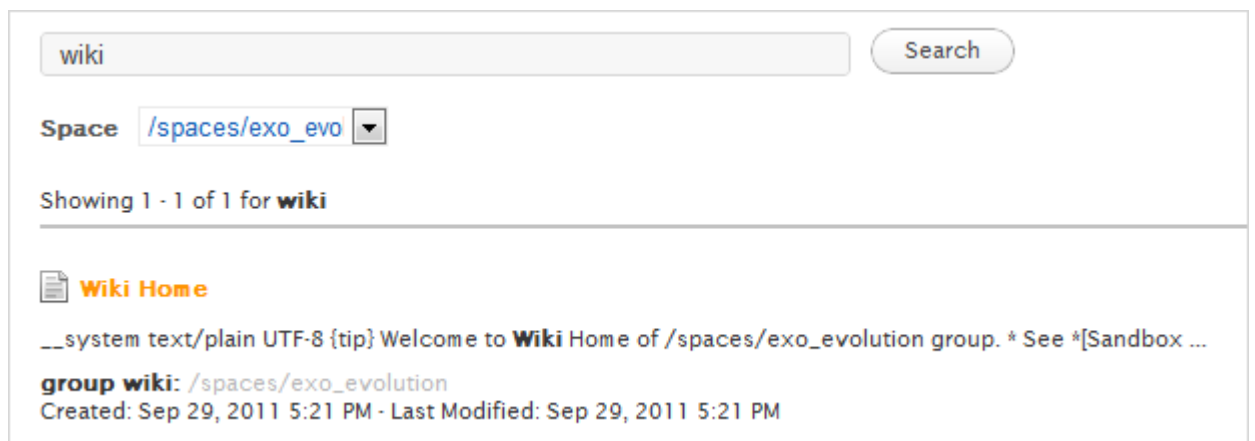

2. Select your desired page or space from the drop-down menu. You will be redirected to the selected page or space.

Advanced Search

The Advanced Search function allows you to search with a key word in a specific space. This mode helps you limit the search results.

1. Enter a key term into the search box and hit the **Enter** key.

If the results are matched with the key word, the search results are displayed like the illustration below.

If no results matched with the key words, the search screen informs "**there is no search result...!**"

2. Click

to select a space from the drop-down menu to define a space where to search for the entered word.

3. Click **Search**.

Wiki Administration

Note

This section is for administrators only.

The administrator has the highest right in **Wiki**. The administrator can delete a page, change the space settings, set the edit permission for users, and more.

Set up space settings

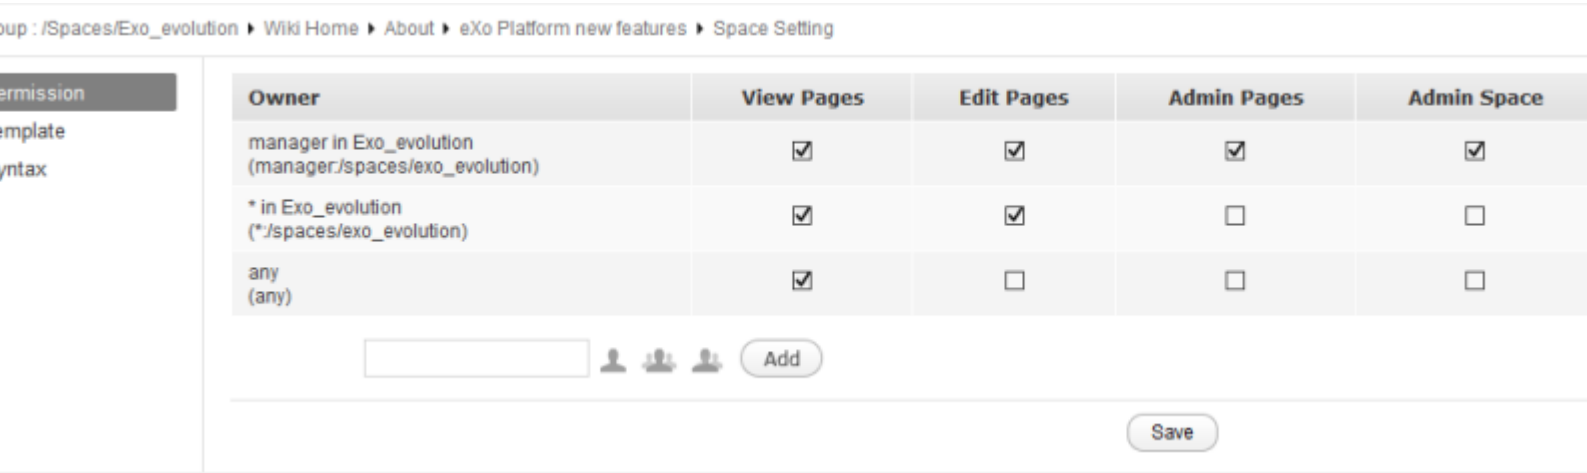

For each space, you can manage page templates and change the syntax used.

Access the Space Settings page

- 1. Open a **Wiki** space.
- 2. Click **Browse**, then select **Space Settings**.

The **Space Settings** page appear.

Now you can:

- [Manage permissions on spaces and pages.](#)
- [Manage a page template.](#)
- [Set up wiki syntax.](#)

Manage Permissions

Wiki gives you the choice to make a space or an individual page to be open or restricted to specific users, groups or memberships. There are two levels of permissions in **Wiki**: Space Permissions and Page Permissions.

Space Permissions

Each space may have its own permissions. Space permissions determine which actions a user can do within the space. A permission can be assigned to any users, groups or memberships.

To change the space permission, open a space, click **Browse** and select **Space Settings** from the drop-down list. Click **Permission** in the **Space Settings** page that appears.

Group : /Spaces/Exo_evolution ▶ Wiki Home ▶ About ▶ eXo Platform new features ▶ Space Setting

Owner	View Pages	Edit Pages	Admin Pages	Admin Space
manager in Exo_evolution (manager/spaces/exo_evolution)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
* in Exo_evolution (* /spaces/exo_evolution)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
any (any)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select User/Group/Membership to add

There are some permissions to a space as follows:

Permission	Description
View Pages	Specify who can view and watch pages of this space, its attachments and history.
Edit Pages	Specify who can edit pages of this space.
Admin Pages	Specify who have the administration rights on this space.
Admin Space	Specify who can administrate the space permissions and settings

In the **Space Permissions** form, you can add or remove the space permissions of the users, groups and memberships.

Add space permissions

In the **Space Permissions** form, you can add permissions for individual users, groups of users or memberships.

1.

Click

to assign permissions to a user, a group or a membership respectively.

The form to select the user, the group and the membership appears.

2. Select a user, a group or a membership, then click **Add**.

3. Click the plus icon to add the selectors to the **Owner** tab in the **Space Permissions** form.

4. Click the checkboxes corresponding to each permission you want to assign to the selectors.

5. Click **Save** to commit.

Note

View, Edit, Admin Pages permissions are applied by default to any pages of the space unless specific page permissions are set. The super user has all permissions implicitly.

Delete space permissions

To delete the permissions of a user, group or a membership in a space, just click

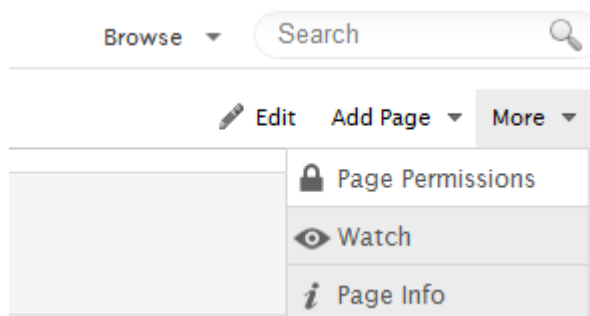

corresponding to a user/a group or a membership in the **Space Permissions** form.

Page Permissions

The **Page Permissions** allows you to set the view and edit permissions for a specific page of a space.

1. Open a page of the space that you want to set the permissions.

2. Click **More** and select **Page Permissions** from the drop-down menu.

The **Page Permissions** form appears.

Page Permissions			
Owner	View Pages	Edit Pages	Action
manager in Exo_evolution (manager:/spaces/exo_evolution)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
* in Exo_evolution (*:/spaces/exo_evolution)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
any (any)	<input checked="" type="checkbox"/>	<input type="checkbox"/>	

Pages are viewable/editable according to the space permission. On each page, a user with the **Admin Pages** permission will be able to override the view and edit permissions on this specific page.

A **Page Permissions** action appears in the page action menu when the user has the **Admin Pages** permission.

You can add and delete the **View Pages Permission** or the **Edit Pages Permissions** for the page. Do the same as [Add space permissions](#) and [Delete space permissions](#).

Manage a page template

When adding a new page, you are not required to write the content from scratch. You can start by selecting a page template which is actually a **Wiki** page with predefined contents.

In the **Space Settings** form, select the **Template** tab, and the form to manage templates appears.

Portal : Intranet ▶ Wiki Home ▶ Space Setting

Permission
Template
Syntax

Template Title	Description	Action
Two-Column Layout	Global	
Three-Column Layout	Global	
Status Meeting	Global	
HOW-TO Guide	Global	
Leave Planning	Global	

Details:

Item	Description
1	Search for a template.
2	Create a new template.
3	Edit a template.
4	Delete a template.

Search for a template

This feature allows you to find your desired template quickly from the existing list as follows:

1. Input a word included in the title of your desired template in the **Search** textbox.
2. Press the **Enter** key; Or click the **Search** button next to the textbox to start your search.

All matching results which contain your entered search term are displayed right below the textbox.

Note

The **Search** function is only performed by the template titles, and you must enter a complete word into the **Search** textbox. For example, to find the template whose title contains "daily report", you can input "report" rather than "repo", or "daily" rather "ly".

Create a new template

1. Click **Add more...** in the **Space Settings** page and the sample template form appears.

Sample Template Title...

Description...

 Preview  Help

2. Add the title for the template.
3. Write the description in the **Description....**
4. Write the content for the template.
5. Select the **Syntax** to write the content.

6. Click **Save Template** at the **Page Control** area. A message will inform your successful template creation.

Edit a template

1. Click the **Edit** icon corresponding to the template you want to edit.
2. Change the title, the description, the content as you want.
3. Click **Save Template** at the **Page Control** area.

Delete a template

1. Click

corresponding to the template you want to delete.

2. Click **OK** in the pop-up confirmation message.

Set up the wiki syntax

By setting up the Wiki syntax, you can select the default syntax or use another one while writing a document.

1. Click **Syntax** in the **Space Settings** page.

Group : /Spaces/Exo_evolution ► Wiki Home ► Space Setting

Permission Template Syntax	Default Syntax Allow users to select other syntaxes	<div> Confluence 1.0 ▼ <ul style="list-style-type: none"> XWiki 1.0 XWiki 2.0 Creole 1.0 Confluence 1.0 MediaWiki 1.0 JSPWiki 1.0 TWiki 1.0 </div>	Save
---	--	--	------

2. Click the **Default Syntax** box and select a syntax from the drop-down menu. This syntax is set as the default for your document.

In case you want to use another syntax, tick the **"Allow user to select other syntaxes"** checkbox.

Note

It is highly recommended that you should use such simple xyntaxes, such as XWiki 2.0, or Confluence 1.0.
